GIFT OF

Pacific Theol. Sem

Class

A COMPLETE
REFERENCE GAZETTEER

OF THE

UNITED STATES OF NORTH AMERICA ;

CONTAINING A

GENERAL VIEW OF THE UNITED STATES,

AND OF EACH STATE AND TERRITORY,

AND A NOTICE OF THE VARIOUS CANALS, RAILROADS, AND
INTERNAL IMPROVEMENTS ;

WITH A

BRIEF AND COMPREHENSIVE DESCRIPTION OF THE LAKES, RIVERS, BAYS,
HARBORS, MOUNTAINS, COUNTIES, CITIES, TOWNS AND VILLAGES ;

TOGETHER WITH

ALL THE POST OFFICES IN THE UNITED STATES ;

AS PUBLISHED BY THE AUTHORITY OF THE POST OFFICE DEPARTMENT ;

TO WHICH ARE ADDED

A NUMBER OF VALUABLE TABLES OF THE POPULATION, COLLEGES, AND
BENEVOLENT INSTITUTIONS, AND OTHER SUBJECTS
OF USEFUL KNOWLEDGE :

THE WHOLE FORMING A COMPLETE

MANUAL OF REFERENCE

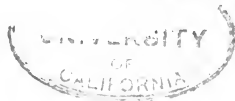

ON THE GEOGRAPHY AND STATISTICS OF THE UNITED STATES.

BY WILLIAM CHAPIN.

NEW YORK :

PUBLISHED BY W. CHAPIN AND J. B. TAYLOR.

1839.

E15:
.C5

ENTERED,
According to Act of Congress, in the year 1838, by
WILLIAM CHAPIN & JEREMIAH B. TAYLOR,
In the Clerk's Office of the Southern District of
NEW YORK.

PIERCY & REED, PRINTERS, 7 THEATRE ALLEY.

P R E F A C E.

IN the preparation of this Gazetteer and the Map, which has occupied nearly three years, the principal object has been to present a work as complete and comprehensive as the present state of statistical and geographical knowledge would admit, within the smallest practical size. To accomplish this design, and make it eminently practical as a *book of reference*, the principal places only are described in detail, and the descriptions are confined for the most part to matters which are permanent in their character.

The great inconvenience attending large and expensive gazetteers, in a country undergoing such vast changes and improvements as ours, is, that much of the detail becomes in a very few years obsolete and useless. The author has therefore preferred to substitute a larger number of places, and other matter of a less ephemeral nature. And the Gazetteer is offered as embracing several thousand more names than is to be found in any other single work of a similar character. Besides the usual places, all the post offices in the United States are given from the official list of the Post Master General up to the year 1837.

Although intended to accompany the Map of the United States, yet the Map and Book are not necessarily connected—each being complete in itself, with the single exception of a few reference initial letters of towns and villages inserted on the map, where it was impossible conveniently to give the names in full. The whole work taken separately, or with the Map, is particularly calculated for business men, as a complete geographical reference.

To obtain the latest information, the following letter was extensively circulated throughout the country, particularly in the western and southwestern sections.

DEAR SIR,

Having been engaged about two years in the preparation of a large MAP OF THE UNITED STATES, the engraving of which is nearly finished, to be accompanied with a complete REFERENCE GAZETTEER;—and desirous of making them as perfect as the latest geographical knowledge of our country will admit, especially in reference to the increasing and flourishing states of the west and southwest:—I respectfully request your answer to the following questions, or either of them:

1. Have any new *counties* been created in your neighbourhood or

state within the last two years?—if so, give the names, boundaries, and population.

2. What new *towns*, or *townships*—their situation, &c.?

3. What new *villages*—their situation, population, and distances from other neighboring villages?

4. What *canals* and *railroads*, or other internal improvements, have been projected or completed within the same period—with the places connected thereby?

5. What new public or stage road has been established?—and please state, generally, such other information as may be interesting, concerning your section of the country.

Reasonable compensation, to be agreed upon, will be cheerfully given for manuscript and other original documents and surveys, that may contribute to the perfection of the Map and Gazetteer.

Very respectfully yours, &c.,

WILLIAM CHAPIN.

This circular elicited many answers from gentlemen of intelligence in various sections of the country, with much local information in manuscript and otherwise, for which the author owes many obligations.

It is not expected that this work is free from errors. It would be impossible from its difficult and complicated nature to be perfect. But no labor nor expense has been spared to make it as correct and acceptable to the public as possible.

New York, June, 1838.

GENERAL VIEW OF THE UNITED STATES.

As many of the principal details will be presented in the descriptions of the several states, in their appropriate places, it is not thought necessary to give them here. This article will therefore be confined to a more general view of the United States and the territories, and to such particulars as cannot be so well embraced in any other place.

BOUNDARIES AND EXTENT.

The territory of the United States is bounded on the N. by the British and Russian possessions; on the E. by N. Brunswick and the Atlantic Ocean; on the S. by the Gulf of Mexico; and on the W. by the Pacific Ocean. Its general length E. and W. is 3000 miles; its breadth N. and S., from the Lake of the Woods to the S. point of Florida, is 1700 miles. Commencing at Passamaquoddy Bay, and tracing the whole outline of the U. S., we have the following result:—

From Passamaquoddy Bay to the S. end of Florida	Miles. 1900
From the S. end of Florida to the mouth of Sabine river	1300
From the mouth of the Sabine along the southern boundary to the Pacific Ocean	2500
Along the Pacific coast to the N. W. corner	900
From the N. W. corner, along the northern boundary to Passamaquoddy Bay	3600
Entire outline	10,200 miles.

HISTORY.

The settlement and early history of each state are given in their respective places. The first settlement by the English was in 1607. From that period to 1775, the colonies were under the government of Great Britain. On the 4th of July, 1776, the American Congress at Philadelphia, composed of the Delegates from the 13 original states, declared their Independence. These states united under articles of Confederation in Nov. 15, 1777, and continued under them through the struggle of the Revolution, and until the year 1787, when the present Constitution (since amended) was adopted. The 13 states which adopted the Constitution were New Hampshire, Massachusetts, Rhode Island, Connecticut, New York, New Jersey, Pennsylvania, Delaware, Maryland, Virginia, N. Carolina, S. Carolina, and Georgia.

The original cause of the disaffection of the colonies towards Great Britain was her attempt to tax them without their consent or representation in the British Parliament. The effects were more openly manifested, on the imposition of the Stamp Act in 1765, and in the duty on tea. The Colonists determined to resist the importation of teas under this duty. Accordingly, a number of persons collected together, and proceeded to some ships that lay at the Boston wharves, and threw their cargoes of tea overboard. The British ministry determined to punish this aggression by shutting up the port of Boston, and garrisoning the town with troops. The exasperation of the people on this intelligence led to a Congress of delegates of the Colonies, who assembled in Philadelphia to consider the best means of redress. At this momentous period the battle of Lexington was fought between the British troops and the undisciplined and half-armed inhabitants, near Boston. This was the first blood that was spilt—and the effect throughout the country was electric. It was a signal for a general burst of indignation, and a determination to resist. The war of the Revolution followed, which gave birth to a nation, and established

those principles of civil and religious liberty which elevate man to the just standard of his natural rights. After a long and arduous struggle, in which every privation, hardship, and sacrifice, was endured by the American armies and people, and the wisdom, fortitude, and perseverance of Washington were so signally exemplified;—the surrender of Cornwallis at Yorktown, Virginia, in 1781, put an end to the war. In 1783, a treaty of peace was signed, by which Great Britain acknowledged the Independence of the United States.

SURFACE AND CLIMATE.

The vast territory of the U. States presents a great variety of surface, with two great ranges of mountains stretching generally in a northeasterly and southwesterly direction, and dividing the country into three unequal divisions. The Rocky Mountains are the highest, and connect with the Cordilleras Range of Mexico; commencing at the Isthmus of Darien, and reaching to the Arctic Ocean, a distance of 5000 miles. The other principal range is the Appalachian, including the Alleghany Mountains, which reaches along the Atlantic states about 1800 miles. The lesser ranges are the Green, Ozark, and White Mountains.

There is a great diversity in the climate, from the extreme cold of the northern winters to the bland and mild perpetual summers of the south. There are also great and sudden changes in the temperature of the weather. The climate has much improved since the early settlement of the country, and will probably undergo still further changes for the better. But it is generally healthy, except in some of the southern states in the summer months.

SOIL AND PRODUCTIONS.

While the country presents the greatest variety of soil, it abounds in vast tracts of inexhaustible fertility, particularly in the south and west. The Atlantic border, and the N. England states generally, are in a high state of cultivation, but are less productive in grain than the country west of the Alleghanies. More particular descriptions of the soil are given under the heads of the respective states.

The productions of the country are almost as various as the soil. The great staples are cotton, wheat, rye, Indian corn, sugar, rice, tobacco, and wool. All kinds of vegetables, and nearly every description of fruits, are produced in the greatest abundance. There is perhaps no country in the world so bountifully blessed by the Creator with the necessaries of life, and the means of universal happiness.

LAKES, RIVERS, BAYS, &c.

The principal lakes are Superior, Huron, Michigan, Erie, Ontario, St. Clair, and Champlain.

The principal rivers are the Mississippi, Missouri, Arkansas, Columbia or Oregon, Red, Kansas, Lewis, Clark, Yellow Stone, Canadian, Ohio, Tennessee, Alabama, Appalachicola, Connecticut, Des Moines, Cumberland, James, Gt. Pedee, Illinois, Multomah, Mobile, Susquehannah, Platte, Wabash, St. Peters, Washita, White, Tombigbee, Big Horn, St. Johns, Sabine, Roanoke, Potomac, Penobscot, Pearl, Osage, Kentucky, Hudson, Wisconsin, Green, Gt. Kannawha, Delaware, Coosa, Chattahoochee, Cape Fear, Alleghany, and Altamaha.

The principal bays are the Chesapeake, Delaware, New York, Massachusetts, Cape Cod, Narragansett, Penobscot, Passamaquoddy, Buzzards, Mobile, Pensacola, Tampa, and Appalachicola.

The principal sounds are Long Island, Albemarle, and Pamlico.

The most prominent capes are Cape Ann, Cod, May, Henlopen, Charles, Henry, Hatteras, Look Out, Fear, Canaveral, Florida, Sable, St. Blas, Sandy Hook, and Montauk Pt.

MINERALS.

Gold is found in N. Carolina, S. Carolina, Virginia, and Georgia. Iron abounds in nearly every state in the Union. Extensive coal beds are found abundantly in several states, but are worked chiefly in Pennsylvania. Lead is found in great abundance; the greatest supply of which is received from the mines of Missouri. Salt springs and lakes abound in various parts of the U. States. Those in N. York produce annually a large supply of salt.

AGRICULTURE.

Of the great staples, already mentioned, cotton holds a distinguished place. In 1789, but one million pounds of cotton were raised in the U. States.

In 1800,	lbs. 35,000,000	In 1825,	lbs. 255,000,000
1810,	85,000,000	1830,	350,000,000
1815,	100,000,000	1834,	460,000,000
1820,	160,000,000	1835,	486,000,000

Of the amount raised in 1834—

Alabama produced	lbs. 85,000,000	S. Carolina produced	lbs. 65,500,000
Mississippi “	85,000,000	Louisiana “	62,000,000
Georgia “	75,000,000	Tennessee “	45,000,000

The following is a list of the prices of flour for a number of years:—
 In 1796, flour was \$12 00 per barrel; 1803, \$6 50; 1808, (embargo,) \$6 00; 1812, (war,) \$12 50; 1816, (close of the war,) \$9 00; 1817, \$13 50; 1821, \$4 00; 1828, \$5 00; 1832, \$5 50; 1835, \$4 87; 1836, \$6 50; 1837, \$11 00; 1838, \$7 75.

MANUFACTURES.

The value of manufactures of the U. States, in 1810, was estimated at \$172,762, 876. In 1836, the value is estimated at \$600,000,000. In Massachusetts alone at \$100,000,000. The great depression of the times has materially diminished this amount for the year 1837. Two thirds of the clothing worn by the agricultural population in the Eastern, Middle, and Western States, are the products of domestic manufacture. The greatest amount of any single manufacture is from cotton, which reached in 1835 to near 100 millions of pounds;—valued at 48 millions of dollars. 85 millions of dollars are invested in cotton manufactures—and it is estimated that the capital vested in all the manufactories of the U. States is about 1000 millions of dollars.

COMMERCE.

The commerce of the U. States is second only to that of Great Britain. The following table of the value of imports and exports for several periods, exhibits the increase since 1790.

Years.	Imports.	Exports.	Years.	Imports	Exports.
1790	\$23,000,000	\$20,205,156	1817	\$99,250,000	\$82,671,569
1800	91,252,768	70,971,780	1820	74,450,000	69,691,670
1804	85,000,000	77,699,074	1825	96,340,000	99,535,388
1805	120,600,000	95,566,021	1830	70,876,920	73,840,500
1807	138,500,000	108,843,150	1831	103,191,124	81,310,583
1808	56,990,000	22,430,960	1833	108,118,310	90,140,433
1814	12,965,000	6,927,441	1834	126,521,332	104,346,973
1815	113,041,274	52,557,753	1835	149,895,742	121,693,577
1816	147,103,000	81,920,400	1836	189,980,035	128,663,040

In 1837, the imports amounted to \$140,852,980, being \$49,127,055 less than the preceding year. The exports for 1837, amounted to \$116,906,060, of which \$95,183,199 were domestic, and \$21,722,861 foreign goods. The exports were less than the preceding year, by \$11,733,481 domestic, and \$23,499 foreign.

The total amount of American tonnage in 1836, was 1,369,580—of which 404,814 belonged to N. York; 226,779 to Boston; 91,905 to Philadelphia; 81,710 to N. Orleans; 81,252 to N. Bedford; and 62,365 to Baltimore.

FISHERIES.

Nearly all the fisheries are carried on from the N. England states. The most important are the cod fishery, whale, mackeral, and herring. The value of fish, oil, and sperm candles, exported for the year ending Sept. 30, 1836, was \$2,666,058.

PUBLIC LANDS.

These lands consist of territory that belonged to the U. States at the time of their independence, of tracts ceded to the General Government by the several states, and of lands acquired by treaty or purchase. A large quantity of this land is occupied by Indians, who are considered the proprietors until their title is extinguished by purchase. Much difficulty existed after the Revolution in adjusting the various conflicting claims of several of the states to the large region of territory lying west and northwest of Ohio river. They were finally settled, however, by the states of N. York, Virginia, Massachusetts, and Connecticut, ceding their claims to the General Government. Connecticut retained a portion of the territory (called the Connecticut Réserve, now belonging to Ohio) until 1800, from which was laid the foundation of her School Fund.

Out of the above territory, the states of Ohio, Indiana, Illinois, Michigan, and the Ter. of Wisconsin were formed. S. Carolina relinquished her claims in 1787; N. Carolina, in 1789, to the territory now forming the state of Tennessee; and finally, in 1802, Georgia ceded to the General Government the region now forming the states of Alabama and Mississippi. The vast tract west of the Mississippi, and extending to the Pacific Ocean, comprehended under the name of Louisiana, was purchased of France, in 1803, for 15,000,000 dollars; and Florida, of Spain, in 1819.

In 1800, Congress passed an act to provide for the survey and sale of the public lands, which was the foundation of the present system. In 1812, the Land Office was established. Surveys are made by contract, under the direction of the General Land Office, through the Surveyor General.

The *public sales* of land are made by *auction*; but large quantities are sold by private entry. Settlers who have already occupied land without a legal title, are entitled to a pre-emption right of purchase.

The public lands are divided into Districts, in each of which is a Land Office, under the superintendence of a Register of the Land Office, and a Receiver of Public Monies.

The surveys are based upon a series of true meridians, and all the surveys are made to correspond with these lines. The land is divided into *townships*, 6 miles square, and these into 36 *sections*, of one square mile each, or 640 acres. These sections are subdivided into *quarter sections*, of 160 acres each, and *half-quarter sections*, of 80 acres each.

Previous to 1820, the sales were on credit, and the minimum price was \$2 00 per acre. But the speculations and difficulties arising from credit sales, induced Congress in that year to pass an act, establishing all sales to be made for cash, and reducing the minimum price of the land to \$1 25 per acre, at which it still remains.

As stated in the article *Education*, one section of 640 acres in each township is reserved for the support of *common schools*. Five per cent. also of the sales is reserved, three-fifths of which are to be expended by Congress in making roads in the state where the land is located, and the other two-fifths for the encouragement of learning.

The total quantity of public lands surveyed up to Sept. 1, 1835, was 166,897,082 acres; the whole quantity sold was 44,499,620 acres; the net payments into the treasury (after deducting expenses) \$58,619,523.

The following table exhibits the lands sold at certain periods, their annual average, and the net receipts into the treasury therefrom.

	Acres.	Annual average.	Whole amount.	Annual average.
In 10 years, from 1820 to 1830,	9,108,671	910,867	\$13,888,047	\$1,388,804
In 4 " " 1830 to 1834,	13,754,643	3,438,661	14,659,478	3,664,869
In the year 1835,	12,564,478		14,757,600	

In 1836, the sales amounted to the extraordinary sum of \$24,000,000; and in 1837 they had fallen to \$7,004,538.

The population of the new states and territories, formed out of the public domain, increased from 1800 to 1830, from less than 60,000 to more than 2,300,000, and since the latter period to 3,500,000: embracing nine states—furnishing one third of the U. S. Senate, and one sixth of the members of the House of Representatives.

Since 1820, the public lands have only produced 6 cents an acre over the minimum government price.

BANKS.

The first bank which was established in this country was the *Bank of North America*. It owed its origin to the celebrated Robert Morris. It was first chartered by Congress at Philadelphia, in 1781.

In 1792, there were 12 banks; in 1811, 89; in 1815, 208; in 1816, 246; in 1820, 308; in 1830, 330; in 1836, 567; on the 1st Jan.. 1837, 633; 1st July, 1837, 000.

Table exhibiting the condition of the Banks in the U. States, on several occasions.

	Capital.	Discounts.	Circulation.	Specie.
Jan. 1, 1830,	\$145,192,268		\$ 61,323,898	\$22,114,917
Jan. 1, 1836,	251,875,292	\$487,506,080	140,301,038	40,019,594
Jan. 1, 1837,	286,225,990	522,891,461	151,308,120	38,708,995
July 1, 1837,	300,299,185	502,557,093	117,764,759	30,027,004

The amount of specie in the U. States in 1833, was estimated by the Secretary of the Treasury at \$29,000,000. In 1836, at \$73,000,000.

The first United States Bank was incorporated during Washington's administration, in Feb. 1791. The term limited by the charter expired on the 4th of March, 1811—Congress refusing to renew the charter. Its capital was 10,000,000, divided into 25,000 shares of \$400 each. Government held shares to the amount of \$2,000,000.

The late Bank of the U. States was chartered under Madison's administration, on the 10th of April, 1816, to continue for 20 years. Its capital was \$35,000,000, of which government held \$7,000,000. Its charter expired in 1836. Congress previously passed an act renewing the charter, which was vetoed by Gen. Jackson. A new charter was then obtained of the state of Pennsylvania.

REVENUE AND EXPENDITURES.

The revenue of the U. States is chiefly derived from customs and public lands. For the years 1833, 1834, 1835, 1836, the annual receipts averaged \$34,713,000. The expenditures for the same years averaged, annually, \$24,467,000, including a total of \$7,740,000 on account of public debt.

The surplus revenue remaining in the the treasury on the 1st January, 1837, (reserving 5,000,000,) was \$37,468,859. By an act of Congress, passed June 23, 1836, this surplus was directed to be deposited with the several states in quarterly instalments, according to the number of their electoral votes, to commence Jan. 1, 1837. The 1st, 2d, and 3d deposits were made; but the last instalment was postponed, by act of Congress, in consequence of the deficiency of the revenue, arising from the great commercial distress of 1837. The amount actually distributed was \$28,101,645.

The receipts for the year 1837 (including the issue of several millions in Treasury notes) amounted to \$23,499,000. Expenditures \$35,281,000.

PUBLIC DEBT.

The last of the public debt was paid in 1835; when the U. States presented the only example on earth of a government entirely free from debt. The public debt of the U. States originated in the struggle of the Revolution, and presented the largest amount about the close of the war in 1816—being then \$127,334,933. The following table exhibits the debt at different periods, from the close of the Revolutionary War to its final extinction.

PUBLIC DEBT AT DIFFERENT PERIODS.

Years.	Debt.	Paid on Principal, Interest, &c.	Years.	Debt.	Paid on Principal, Interest, &c.
1783	\$42,000,375		1815	\$99,883,660	\$12,628,922
1791	75,463,476	\$5,287,949	1816	127,334,933	24,871,033
1800	82,970,294	4,578,339	1817	123,491,955	25,423,035
1810	53,156,535	8,008,900	1820	91,015,536	8,628,494
1812	45,209,737	4,449,624	1830	48,555,403	11,355,748
1813	55,962,827	11,103,123	1834	4,700,082	6,176,565
1814	81,478,846	7,900,543	1835	37,733	

MINT.

The Mint was established in Philadelphia in 1792. Branch mints have recently been established at New Orleans, Charlotte, N. C., and Dahlonega, Ga. The total amount of coinage from 1792 to 1836 inclusive, is, of gold \$22,102,035; of silver \$46,739,182; of copper \$740,331;—total, \$69,581,548. For four years the coinage was as follows:

In 1833, value	\$3,765,710	In 1835, value	\$5,668,667
1834, " "	7,388,423	1836, " "	7,764,900

In the preceding years, there was deposited in gold for coinage from the U. States mines, \$2,931,500, viz.: In 1833, \$868,000; in 1834, \$898,000; in 1835, \$698,500; 1836, \$467,000.

ARMY.

From the peculiar position of the U. States in regard to foreign powers, and the genius and economy of her republican institutions, it has not been thought necessary, nor politic, to sustain a large standing army. According to official reports the regular army, on the 30th Nov., 1836, amounted to 7,958, organized as follows:

General Staff	14	Topographical Department	10
Medical Department	76	Ordnance Department	308
Pay department	18	Two Regiments of Dragoons	1,498
Purchasing Department	3	Four Regiments of Artillery	2,180
Corps of Engineers	22	Seven Regiments of Infantry	3,829
Total			7,958.

There are two great Military Divisions, divided by a line commencing at the mouth of the Mississippi, following up that river to Cassville, in Wisconsin Territory, thence north to the boundary line between the U. States and Canada. All west of that line is called the *Western Division*; and all east of it, the *Eastern Division*.

The total number of *militia* in the U. States, as given in an official report, dated Nov., 1836, is 1,326, 831. The militia comprises all able bodied white males between the ages of 18 and 45; and when called into actual service, they receive the same pay as the army.

NAVY.

The American navy, though small in point of numbers, is formidable in its power, and very efficient in its organization and discipline. It consisted in 1837, finished and on the stocks, of

11 ships of	74* guns.	2 ships of	24 guns.
1 do.	64 "	13 do.	18 "
14 do.	44 "	6 do.	12 "
2 do.	36 "		—
Total			49

And several smaller vessels.

The navy contains 50 Captains; 48 Masters Commandant; 296 Lieutenants; 50 Surgeons; 14 Passed Assistant Surgeons; 43 Assistant Surgeons; 41 Pursers; 9 Chaplains; 198 Passed Midshipmen; 256 Midshipmen; 27 Sailing Masters; 19 Boatswains; 20 Gunners; 19 Carpenters; 19 Sail Makers.

POST OFFICE.

The first Post in the U. States was established in New York in 1710. In 1789, at the adoption of the Federal Constitution, the whole management of the Posts was conferred on Congress. There were then only 75 post offices in the U. States—there are now (1838) about 12,300.

The following table will exhibit the extraordinary increase of this department and also the rapid growth of the country.

* Rated at 74, but mounting between 84 and 100.

Years.	Number of Offices.	Amount of Postage.	Expenditures.	Years.	Number of Offices.	Amount of Postage.	Expenditures.
1790	75	\$37,935	\$32,140	1825	5,677	\$1,306,525	1,229,043
1795	453	160,600	117,893	1830	8,450	1,919,300	1,959,109
1800	903	280,804	213,994	1834	10,387	1,969,913	
1810	2,300	551,684	495,969	1835	10,770		
1815	3,000	1,043,065	748,121	1836	11,091	3,398,455	2,755,623
1820	4,500	1,111,927	1,160,926	1837	11,770	4,137,056	3,380,847

In July, 1835, the length of the mail routes in the U. States was 112,774 miles:— annual transportation on them 25,869,486 miles.

In July, 1836, the length of the mail routes was 118,264 miles; and the annual transportation on them 27,578,620 miles. On July 1, 1837, the mail routes had increased to 142,877 miles; and the annual transportation to 36,228,962 miles.

RATES OF POSTAGE.

On a Single Letter composed of one piece of paper.

For any distance not exceeding 30 miles,	30	6 cents.
Over 30, and not exceeding 80 "	80	10 "
Over 80, and not exceeding 150 "	150	12½ "
Over 150, and not exceeding 400 "	400	18½ "
Over 400 miles,		25 "

A letter composed of two pieces of paper, is charged with *double* these rates; of three pieces, with *triple*; and of four pieces, with *quadruple*. One or more pieces of paper, mailed as a letter, and weighing *one ounce* shall be charged with *quadruple* postage; and at the same rate, should the weight be greater.

Newspaper Postage.

For each <i>newspaper</i> , carried not over 100 miles,	1 cent.
Over 100 miles,	1½ "
But if carried to any Office in the State in which it is printed,	1 "

Magazines and Pamphlets.

Published periodically, not exceeding 100 miles,	1½ cts. per sheet.
Over 100 miles	2½ " "
Pamphlets not published periodically, not exceeding 100 miles,	4 " "
Over 100 miles,	6 " "

Every printed Pamphlet or Magazine which contains more than 24 pages on a *royal* sheet, or any sheet of *less* dimensions, shall be charged by the sheet; and small pamphlets, printed on a half or quarter sheet, of royal or less size, shall be charged with half the amount of postage charged on a full sheet.

Privilege of Franking.

The officers of the General Government at Washington, and members of Congress, from the period of 60 days before they take their seats until the next meeting of the next Congress, may send and receive letters and newspapers free of postage; if the packet weighs more than two ounces, members of Congress are charged with the excess only.

Postmasters may send and receive, free of postage, letters and packets not exceeding half an ounce in weight; and they may receive one daily newspaper, each, or what is equivalent thereto.

Printers of newspapers may send one paper to each and every other printer of newspapers within the U. States, free of postage, under such regulations as the Postmaster General may provide.

Any person who shall counterfeit the handwriting or frank of any person, or cause the same to be done, in order to avoid the payment of postage, shall for each offence pay five hundred dollars.

RELIGION.

The Constitution of the U. States declares that Congress shall make no law respecting an establishment of religion, or prohibiting the free exercise thereof. The

same principle prevails in the several states. The support of religion is entirely voluntary throughout the U. States. And its happy tendency, so consistent with the mild spirit of the gospel, is everywhere manifest. A provision existed in Massachusetts, by which the Legislature might require the towns to support the Protestant religion. But this was done away in 1833. Nor is it possible that any church and state establishment can ever be formed in the U. States: for if the improbable desire for such a union should ever arise in any one denomination, there would be at least two thirds, comprehending all other denominations, united to oppose it;—without including a large portion of the community not connected with any sect.

But while every individual is left entirely free in the choice of his religion, or in its support, and the law no where enjoins it as an obligation, it is a happy evidence of the prevailing public sentiment, that the Constitutions of the several states recognize the moral obligations and duties of the Christian religion, and extend their protection over its full enjoyment and exercise.

The following summary exhibits in round numbers, dropping fractions, the number of churches, ministers, and communicants, in the U. States in 1836.

Churches or Societies, 21,670; ministers, 16,000; communicants, 2,200,000. Of these there were

	Societies.	Ministers.	Members.
Methodists, including all kinds,.....	4,000	3,600	700,000
Baptists, do. do.	7,130	4,900	492,500
Presbyterians, do. do.	2,800	2,230	275,000
Congregationalists,	1,300	1,150	160,000
Dutch Reformed,	200	200	22,500
Episcopalians,	850	850	
German Reformed,	600	180	30,000
Lutherans,	750	270	62,300
Christians,	1,000	800	150,000
Friends,	450		
Universalists,	650	320	
Unitarians	200	175	
Catholics,	440	390	

All other denominations have about 300 societies or churches. There are estimated to be over 700,000 Catholics in the United States, who increase principally by emigration from foreign countries. The proportion of the Catholic to the Protestant population is as *one to eighteen*.

EDUCATION.

The *general diffusion* of knowledge has always been considered of great importance in a popular government. The U. States present an example of a free people acting upon the principle, with slight exceptions, of *universal suffrage*. Every white male citizen above 21 years of age, in most of the states, has a voice in the choice of his rulers; which implies that every such citizen should be capable, to a reasonable extent, of exercising that right with judgment and discretion. This cannot be expected without a proper attention to the education of the *whole mass* of the people. Nor can any republican institutions be safe without it.

The subject of *popular education*, therefore, has early received the favorable attention of several of the states, particularly the N. England states and N. York; and now this attention is becoming more general and decided. Other states are awakening up to its importance. Pennsylvania, Ohio, and Michigan, have established excellent systems; and the gratifying prospect is presented, that in a short time every state in the Union will have an efficient *common school system*, which will embrace all the children of the land, under a course of good sound education.

The General Government of the U. States does nothing in aid of public instruction, except to reserve for that purpose one section of the public land in every township, being $\frac{1}{36}$ part, or one mile square,—and also certain reservations for colleges. These appropriations for common schools have already amounted to near *nine millions of acres*; and for colleges and academies to near *five hundred thousand acres*. To the states, respectively, belong the duty of providing in a special manner for the education of the young; and these particular efforts will be noticed under the heads of the individual states.

The number of colleges founded in the U. States, up to 1838, is 98, but several of them have not yet gone into operation. The number of volumes in the college libraries, 280,000; the number in the students libraries, 120,000; total, 400,000.

The whole number of Instructors is	750
The whole number of Alumni	26,470
The whole number of Students, in 1837,	9,250

Of the above Alumni, 5,321 were graduates of Harvard University, Mas.; 4,485 of Yale College, Ct.; 2,183 of Princeton College, N. J.; 1,858 of Dartmouth College, N. H.; 1,700 of Columbia College, N. Y.; 1,600 of Union College, Schenectady; and 1,253 of Brown University, R. I.

There are thirty theological seminaries in the U. States and five theological departments connected with other colleges.

The number of Professors in 1837 was	84
The number of Theological Students	1,057
The number of volumes in library	72,500

According to the "Catholic Almanac" for 1837, the Catholics have 13 colleges; 12 ecclesiastical seminaries; 23 female religious institutions; 37 female academies; and 37 charitable institutions.

The Catholic ecclesiastical seminaries contain 84 students. The whole number of Catholic colleges is *thirteen*. In *eight* of these (the number organized in 1837) there were, instructors 130; students 935; volumes in libraries 50,000; whole number of Alumni, 394.

There are 26 medical schools in the U. States, numbering 141 professors and 2,460 students.

PUBLIC LIBRARIES.

In a report to the Senate of the U. States, in 1836, by Mr. Preston of S. C., on the expediency of purchasing the library of the late Count Boutourlin at Florence, for the library of Congress,—it is stated that all the libraries in the U. States amount to about 400,000 volumes: of these there are 50,000 distinct works. Other, and more recent authorities, founded upon particular examinations, give the number as between 700,000 and 800,000 volumes, which is probably correct.

After the destruction of the library of Congress by the British in August, 1814, Government purchased Mr. Jefferson's library, consisting of 6,484 volumes for \$23,950. Since which, additional sums have been appropriated, making a total, since 1814, of \$99,950. The whole number of volumes in the library is 24,600.

Of the other public libraries in the U. States, the following are the largest:

Philadelphia,	44,000 vols.		Boston Atheneum,	29,000 vols.
Cambridge University,	42,000		New York City,	25,000

Among other respectable libraries, the following deserve particular notice: Charleston, S. C.; Andover Theol. Sem.; Antiquarian Society, Worcester; N. York Mercantile; N. York Apprentices; Baltimore and Georgetown College; averaging about 12,000 volumes each.

Although the libraries of the U. States are small compared with the magnificent collections in Europe, which amount to an aggregate of 19,850,000 volumes—(the Paris Royal containing 700,000; Munich, 556,000; London, 244,000 volumes,)—yet when the age of the country is considered, and that libraries are always of slow growth, their number and extent are certainly respectable.

GOVERNMENT.

The Government of the U. States is that of a confederated republic, in which all power belongs to the people. The legislative power is vested in a Congress, composed of a Senate and House of Representatives. The Senate consists of two members from each state, chosen by the legislatures, respectively, for a period of six years. The terms of service are so arranged, that one third of the whole Senate is renewed every two years.

Every Senator must be at least 30 years of age, and have been 9 years a citizen. The present number of Senators is 52.

The Senate has the sole power to try impeachments. The Vice President is President of the Senate, and has a casting vote only.

The House of Representatives is composed of members elected in the several states by the people, for a term of two years. Each state is entitled, under a law passed in 1832, to send one Representative for every 47,700 inhabitants. The present number of members is 242, and two Delegates—one from Wisconsin, and one from Florida territory.

Every Representative must be at least 25 years of age, and have been 7 years a citizen.

The pay of each member of Congress, during the session, is \$8 per day, and \$8 for every 20 miles' travel, to and from the seat of government. The compensation of the President of the Senate, *pro tem.*, who is chosen in the absence of the Vice President, and of the Speaker of the House of Representatives, is \$16 a day.

All bills for raising revenue must originate in the House of Representatives.

No member of Congress can hold any office under the U. States at the same time.

Congress have power to lay and collect taxes—provide for the common defence and general welfare—borrow money—regulate commerce with foreign nations, among the states, and with the Indian tribes—to establish uniform laws on naturalization and bankruptcies—to coin money, regulate its value, and fix the standard of weights and measures—to establish post offices and post roads—to grant patent and copy-rights—to constitute tribunals inferior to the Supreme Court—to define and punish piracies and offences on the high seas, and against the law of nations—to declare war—grant letters of marque and reprisal—to raise and support armies—provide and maintain a navy—to provide for calling forth the militia to execute the laws of the Union, suppress insurrections, and repel invasions—to provide for organizing, arming, and disciplining the militia (the states appointing the officers thereof)—to exercise exclusive legislation over the District of Columbia, forts, magazines, dock yards, &c., and to make all laws necessary and proper for carrying into execution the powers vested by the constitution in the Government of the U. States, or in any department thereof.

The *Executive* power is vested in a President, who is chosen for four years, by electors from from the different states, equal in number to the Senators and Representatives from each state. He must be a native citizen of the U. states, and not under 35 years of age. He is a commander and chief of the army and navy, and of the militia, when in actual service. His compensation is \$25,000 a year. In case of his death, resignation, or inability to act, the Vice President acts as President.

The President makes all treaties, with the concurrence of two thirds of the Senate; and appoints, with the consent of the Senate, ambassadors, judges of the Supreme Court, and other officers, not otherwise appointed by law. He is eligible for re-election, but the example of Washington in retiring to private life after a second term, has established a precedent which has not since been departed from. The President has a Cabinet, consisting of the heads of the different departments, viz., the Secretary of State, Treasury, War, Navy, Postmaster General, and Attorney General.

The judicial power of the U. States is vested in a Supreme Court, composed of a Chief Justice and six associates, which holds its session annually at Washington city, and a District Court in each state. There are also seven judicial Circuits, in each of which a Circuit Court is held twice a year for each state in the Circuit, by a Justice of the Supreme Court, and by a District Judge.

The judges hold their offices during good behaviour. The Supreme Court has *original* jurisdiction in all cases relating to ambassadors and consuls—and *appellate* jurisdiction in all cases arising under the Constitution of the U. States—in all admiralty cases—in controversies between two states—two citizens of different states—and between a state, or its citizens, and a foreign state or its subjects.

The state governments (26 in number) are founded upon the same general principles of popular rights that are adopted in the Constitution of the U. States. Each state has guaranteed to it a republican form of government, and the state constitutions do not essentially differ in their forms from that of the Federal Government.

Each state is independent, and has exclusive legislation on all subjects not delegated to the General Government. Its whole domestic and local policy is, therefore, by this admirable system, brought immediately under the control of its own citizens, through their representatives.

The legislature of every state is now composed of two branches, Vermont having in 1836 established a Senate.

In 8 states, Senators are elected for 1 year; in 4 states, for 2 years; in 3 states, for 3 years; in 10 states, for four years; and 1 state, (Maryland,) for 5 years. In 9 states, Representatives are elected for 2 years; in all others, except Rhode Island, which elects semi-annually, they are elected annually.

Eight states elect their Governors for 1 year; nine states, for 2 years; four states, for 3 years; and five, for 4 years. The Governors of the territories of Florida and Wisconsin are appointed by the President of the U. States and Senate.

In all states, except N. Jersey, Maryland, Virginia, and S. Carolina, the Governor is elected by the people. In Louisiana, the legislature chooses one from the two highest candidates voted for by the people.

Further details of the state governments are given in the description of the particular states, in their proper places.

POPULATION.

The unexampled increase of population in the U. States, since the period of its independence, is a decisive evidence of its growing and substantial prosperity. The first actual enumeration of the inhabitants was made in 1790.

TABLE of the Population from the five enumerations, arranged according to States, with the increase per cent. for the last ten years.

States.	1790.	1800.	1810.	1820.	1830.	Increase per cent. in 10 yrs.
Maine,	96,540	151,719	228,705	298,335	399,455	33.89
New Hampshire,	141,899	183,762	214,360	244,161	269,328	10.30
Vermont,	85,416	154,465	217,713	235,764	280,652	19.04
Massachusetts,	378,717	423,245	472,040	523,287	610,408	16.64
Rhode Island,	69,110	69,122	77,031	83,059	97,199	17.00
Connecticut,	238,141	251,002	262,042	275,202	297,675	8.15
New York,	340,120	586,756	959,949	1,372,812	1,918,608	39.70
New Jersey,	184,139	211,949	249,555	277,575	320,823	15.58
Pennsylvania,	434,373	602,365	810,091	1,049,458	1,348,233	28.46
Delaware,	59,098	64,273	72,674	72,749	76,748	5.49
Maryland,	319,728	341,548	380,546	407,350	447,040	9.74
Virginia,	748,308	880,200	974,622	1,065,379	1,211,405	13.70
N. Carolina,	393,751	478,103	555,500	638,829	737,987	15.52
S. Carolina,	249,073	345,591	415,115	502,741	581,185	15.60
Georgia,	82,548	162,101	252,433	340,987	516,823	51.56
Alabama,			20,845	127,901	309,527	110.93
Mississippi,		8,850	40,352	75,448	136,621	81.07
Louisiana,			76,556	153,407	215,739	40.63
Tennessee,	35,791	105,602	261,727	422,813	681,904	62.00
Kentucky,	73,077	220,955	406,511	564,317	687,917	21.90
Ohio,		45,365	230,760	581,434	937,903	61.00
Indiana,		4,875	24,520	147,178	343,031	133.07
Illinois,			12,282	55,211	157,465	185.16
Missouri,			20,845	66,586	140,455	110.93
Michigan,			4,762	8,896	31,639	255.60
Arkansas,				14,273	30,388	112.90
Dist. of Columbia,		14,093	24,023	33,039	39,834	20.56
Florida Territory,					34,730	
	3,929,827	5,305,933	7,239,814	9,638,131	12,866,020	

According to the above population, the number of representatives which each state is entitled to send to Congress is as follows: Maine, 8; N. Hampshire, 5; Vermont, 5; Massachusetts, 12; Rhode Island, 2; Connecticut, 6; New York, 40; New Jersey, 6; Pennsylvania, 28; Delaware, 1; Maryland, 8; Virginia, 21; N. Carolina, 13; S. Carolina, 9; Georgia, 9; Alabama, 5; Mississippi, 2; Louisiana, 3; Tennessee, 13; Kentucky 13; Ohio, 19; Indiana, 7; Illinois, 3; Missouri, 2; Michigan, 1; Arkansas, 1. Delegates—Florida, 1; Wisconsin, 1;—total, 244;—being one representative to each 47,700 inhabitants, according to the rule prescribed in the Constitution.

The following Table exhibits several classes of the population, according to the census at five different periods.

Years.	White Males.	White Females.	Free Colored.	Slaves.	Total.
1790	1,615,625	1,556,839	59,466	697,897	3,929,827
1800	2,204,423	2,100,061	108,398	893,041	5,305,933
1810	2,987,571	2,874,433	186,446	1,191,364	7,239,814
1820	3,995,133	3,866,804	238,156	1,538,038	9,638,131
1830	5,363,451	5,173,927	319,599	2,009,043	12,866,020

INDIANS.

Some notices of the different tribes of Indians residing in several of the states are given under the appropriate heads, in their alphabetical arrangement. According to a Report of the Commissioner of Indian Affairs, made Dec. 1, 1836, the number of Indians then residing east of the Mississippi, and under treaty to remove, was 48,918, of which 16,000 are Cherokees, and 2,600 Seminoles. Not under stipulations to remove, 8,415—total, 57,433.

Within eight or ten years past, 93,401,637 acres of land have been ceded by the Indians, for which the U. States have stipulated to pay them \$26,982,068, and 32,381,000 acres of land, valued at \$40,476,250, making the whole consideration \$67,451,318.

 AIKMANS Creek, Daviess co. Ia.
ALABAMA, one of the United States, bounded N. by Tennessee; E. by Georgia; S. by Florida and the Gulf of Mexico; W. by Mississippi. Greatest length 336 m. mean breadth 154; area 51,770 square miles, equal to 33,132,800

acres. Pop. 1810, 10,000; 1820, 127,901; 1830, 309,527; of which 117,549 were slaves, and 1,572 free colored persons.

Alabama was organized as a Territorial government in 1817, and admitted into the Union as a state in 1820.

The principal rivers are the Alabama, Cahawba, Choctaw, Conecuh, Coosa, Black Warrior, Tombigbee, Tallapoosa, Chattahoochee, Perdido and Mobile.

Cotton is the great staple, but wheat, corn, rice, &c. are cultivated.

The climate in the uplands is healthy and the summers pleasant. But on the lowlands and the neighborhood of the rivers it is unhealthy.

About half of the surface of the state is composed of *Pine Barrens* which are thinly covered with trees and produce a coarse grass. This soil which is a reddish clay, is favorable to the growth of wheat. In the north parts of the state the soil is generally very good. In the south much of it is low and swampy and the soil thin.

The principal town is Mobile, the other towns of the greatest importance are Blakely, St. Stephens, and TUSCALOOSA, the capital of the state.

The state has two colleges, the *University of Alabama*, and *La Grange College*. There are also about 30 incorporated academies.

The N. part of Alabama was formerly included in Georgia, which was purchased by the U. S. and formed part of the Mississippi Territory.

The Senate consists of 30 members elected for 3 years. The H. of Representatives of 91 members elected annually. Pay of the members \$4,000 per day.

The principal internal improvements in this state recently finished, in progress or projected, are the *Montgomery and Chattahoochee R. R.* 76 m. long. *Tusculumbia and Decatur R. R.* 46 m. *Florida, Alabama and Georgia R. R.* 110 m. to connect Columbus in Georgia with Pensacola, Florida, through Alabama. *Dale-town and Greensborough R. R.* 17 m. *Mobile and Tennessee R. R.* *Benton and Haysville R. R.* 18 m. and the Erie and Greensborough R. R.

The *Huntsville Canal* from *Huntsville* to *Triana* on the Ten. r. 16 m. long, and a canal from the head of *Muscle Shoals* to *Florence* 37 m. long.

ALABAMA R. is formed by the Coosa and Tallapoosa and receives as a tributary the Cahawba from the north. Coosa the main constituent of the Alabama, rises in Tennessee. The course of the Alabama from its union with the

Coosa and Tallapoosa until it joins the Tombigbee to form the Mobile, is 240 m. long, but its comparative distance is 130 m.

ALABAMA, t. Genessee co. N. Y. 257 m. from Albany. Pop. 1830, 819; in 1835, 1,638.

ALACHUA County, E. Florida, generally flat and marshy; soil poor.

ALACHUA SAVANNA, in Alachua co. E. Flor.

ALAMO, v. Montgomery co. Ia.

ALAPAPAH R. in Flor. E. Br. of Suwannee r.

ALAUQA R. in Flor. Walton co.

ALAUQA, c. t. Walton co. Flor.

ALATAMAHA R. Ga. Its principal constituents are the Oconee and Ocmulgee rivers, and after the junction its course is 90 miles to the Atlantic ocean. Boats of 30 tons are navigated to Milledgeville on the Oconee, and farther up the Ocmulgee.

ALBA, v. Bradford co. Pa.

ALBANY County, N. Y. Length about 22 m. by 21, 462 sq. m. Pop. 1830, 53,560; in 1835, 59,762. The soil is rich on the Hudson, but sandy and uncultivated in the interior. One of the earliest settlements in the state was in this county.

ALBANY City, in Albany co. N. Y. the capital of the state, on the W. side of the Hudson r. 145 m. N. of N. Y. 165 m. W. of Boston; 230 m. S. of Montreal, and 376 from Washington City. The Erie canal terminates here after uniting with the Champlain canal, and has greatly added to the wealth and commercial importance of the place. Many steamboats, sloops and canal boats are constantly employed during navigation in conveying freight and passengers to and from N. Y. and the canals. Albany was settled by the Dutch in 1614, and is one of the oldest settlements in the U. S. Its population in 1790, was 3,506; 1810, 10,744; 1820, 12,541; 1830, 24,238; 1835, 28,109. Its public buildings and many of the churches are very beautiful, giving evidence of the taste and enterprise of the inhabitants.

The *Capitol* is a substantial building standing on an elevation 130 feet above the river, it is 115 feet long by 90 broad. Among other public buildings the most conspicuous and elegant are the *Academy*, the *City Hall*, the *State Hall*, *Albany Female Academy* and *Stamwix Hall*.

The city contains also several highly respectable scientific and literary institutions, private academies and select schools, and several excellent public schools, giv-

ing every facility for the education of all the children.

The *Albany Library*, *Albany Institute*, *Young Men's Association* and the *Apprentices Library*, deserve particular notice.

The city is in lat. 42° 39' 3". W. long. from Greenwich 73° 44' 49" and 3° 15' E. long from Washington.

ARGYLE, p. o. Cumberland co. N. C.

ARKANSAS, one of the United States, bounded N. by Missouri, E. by the Mississippi r. S. by Louisiana, and W. by Missouri Ter. Length from N. to S. 245 m. mean breadth 213; area about 52,185 m. Pop. 1833, 40,370; 1835, 58,134, of which about 6,000 are slaves.

Arkansas was settled in 1685; organized into a Territorial government in 1819; and admitted as a state into the Union in 1836. Arkansas is the principal river, the other important rivers are the *White, Red, Washita, Cache,* and *St. Francis*. The eastern part of the state is level which gradually varies to the westward, where the *Black or Ozark Mountains* pass through the state. The soil is fertile, and produces cotton, wheat, tobacco, &c., with rich and extensive prairies. Iron, lead and coal are found, and abundance of salt.

The shores of the Arkansas r. to Little Rock, are considered unhealthy. The level sections of the country are wet and not easily drained. But the great prairie and the smaller prairies in the upper parts of the country are more healthy.

The Legislature meets every two years, and is composed of a Senate of 17 members, and a H. of Representatives of 54 members.

ARKANSAS County, Ark. on Arkansas r. Pop. 1830, 1,426; 1835, 2,080.

ARKANSAS R. rises in the Rocky Mountains, lat. 41° N. Its course is SE. & E. through Missouri Ter. and Arkansas state until it falls into the Mississippi r. in lat. 33° 50', 400 m. above the mouth of Red r. Its great confluent is the Canadian r. which joins it west of the state, in lat. 35° long. 18° W. Steamboats can ascend the r. in high water, about 200 m. Its whole course is about 2,300 m. long.

ARKANSAS, c. t. Arkansas co. Ark. 114 m. from Little Rock, on Ark. r.

BALTIMORE County, near Chesapeake bay and Patapsco r. Pop. 1830, excluding city, 40,250, including city, 120,870.

BALTIMORE City, in Baltimore co. Md. on Patapsco r. 14 m. from Chesapeake bay, 33 m. NE. of Washington city. The Baltimore and Ohio R. R. connects the city with the Ohio r. It is advantageously situated for commerce, which is very considerable, both internal and external. Its population has increased very rapidly and gives evidence of its prosperity and enterprise. In 1775 its pop. was 5,936; in 1790, 13,503; 1800, 26,514; 1810, 35,583; 1820, 62,733; 1830, 80,625; being the third city in pop. in the U. States.

There are many beautiful public buildings, including colleges, seminaries and churches. There are also two monuments, one erected in memory of Washington, 160 feet high, surmounted with a colossal statue, the other a beautiful chaste structure 60 feet high in commemoration of the battle in which many of the citizens fell in the attack of the city by General Ross, in 1814. It has also several spacious and excellent hotels. The inhabitants are distinguished not only for their business enterprise, but also for their hospitality and social intercourse with strangers.

BOSTON, the capital of Mas. Suffolk co.—the fourth city in population in the U. States. It is situated on a peninsula, about 2½ m. long, and 1 broad. It has a fine commodious harbor, and an extensive commerce. Massachusetts Bay on the E. presents a beautiful prospect from the State House. The Middlesex canal and a railroad open a communication with Lowell, from which there is a navigable channel to Concord, up the Merrimack r. Boston is connected with the main land by several bridges, one of which, the Cambridge br. is near 3,500 feet long. It has many elegant and costly public buildings, among which are the State House, Faneuil Hall Faneuil Hall Market, 540 feet long by 50 wide, Tremont House, Trinity Church, County Court House, Massachusetts Hospital, &c.
The wharves and piers are very spacious, some of them from 1,250 to 1,650 feet in length. Boston Common is a public square, near the State House, containing 50 acres.
Boston is distinguished for her literary institutions, and the literary spirit of her enterprising inhabitants. Her public schools and seminaries of learning rank her among the highest in the world for promoting the cause of science and universal education.
A beautiful cemetery is formed at Mount Auburn, with walks shaded by various shrubbery.
Boston was founded, 1630. Pop. 1700, 7,000; 1765, 15,520; 1790, 18,038; 1800, 21,937; 1810, 33,250; 1820, 43,298; 1830, 61,392; 1837, 80,325. Distance from

- Washington, 432 m; from Philadelphia, 300 m; from N. Y. 210 m; from Hartford 100 m; from Providence 40 m; from Portland, Me. 115 m.

BROOKLYN, c. t. Windham co. Ct. the town contains a good soil, and several mill privileges; 41 m. from Hartford. Pop. 1830, 1,450.

BROOKLYN, t. Kings co. N. Y.

BROOKLYN, Kings co. N. Y. a beautiful and growing city, on Long Island, opposite N. Y. from which it is divided by the East r. The increase and improvement of this city have been very remarkable within the past ten years. Its proximity to the business parts of N. Y. has made it a convenient residence for a great number of merchants and others doing business in N. Y. It has a number of Churches, three Banks, a Lyceum, an Institute for young ladies, and many splendid private dwellings. The view of the Bay and City of New York from the heights is very beautiful. Four ferries, each having two good steamboats in constant operation, afford a convenient intercourse with New York at all times. The Navy Yard is situated at Wallabout bay at this place. Pop. 1820, 7,175; 1830, 15,396; 1835, 25,312.

CHICAGO, city & c. t. Cook co. Ill. beautifully situated on Chicago r. at its entrance into Lake Michigan. The growth and prosperity of this place is unexampled. In 1832 it contained only 250 inhabitants and a few small stores. In 1837 it contained nearly 5,000 inhabitants, about 80 or 90 stores, 10 public houses, 21 physicians, 40 lawyers, and 6 clergymen, who have churches. The favourable location of this city must always make it a place of considerable and increasing trade. There are rich prairies back of the town, and along the N. branch of the Chicago fine groves of timber.

CHICAGO R. empties into Lake Michigan, in the NE. part of Illinois. The N. branch rises in Wisconsin Territory, and is well timbered. The south branch rises near Saganaskee Swamp.

CICEROTOWN, v. Hamilton co. Ia.

CINCINNATI, Hamilton co. O. an important commercial city and c. t. It was first laid out in 1789, but took its rise after the defeat of the Indians by Wayne, in 1794. It is situated on the N. bank of the Ohio r. on a level plat of ground. The streets cross each other at right angles, and are well regulated. This city has been justly styled the "Queen of the

West. It is not more distinguished for the enterprise and munificence of its inhabitants, than for their noble spirit in promoting the cause of learning and primary education. Besides several respectable colleges, institutes, lyceums, &c. the large and commodious buildings erected for common school instruction reflect the highest credit upon the public spirit and beneficence of the inhabitants.

Many of the public buildings are very beautiful; among which the new edifice for the Franklin and Lafayette Banks, of the Grecian Doric order, resembling the United States Bank at Philadelphia, stands conspicuous. The spacious Court House and United States Branch Bank building deserve also to be noticed. There are also many fine churches, 4 market houses, college and literary buildings, and several elegant hotels.

The commercial and manufacturing importance of this place is very great. The exports for 1832 were estimated at \$4,000,000, and for 1836 at \$5,000,000. A large number of steam engines are in operation, in cotton and various other manufactories. Various rail-roads, canals, and turnpike roads, projected or in a course of construction, are expected to add still greater facilities of trade and wealth to this flourishing emporium.

The following account of its population at different periods marks its rapid history. Pop. in 1800, 750; 1820, 10,000; 1824, 12,016; 1826, 16,230; 1830, 24,831; in 1838, estimated at 38,000.

Cincinnati, following the Ohio r. is 500 miles from the junction of the Ohio and Mississippi, and 450 from the union of the Alleghany and Monongahela rivers. It is 112 miles from Columbus, 250 m. from Cleaveland, 900 m. from New York, by Lake Erie, 617 m. from Philadelphia, 520 m. from Baltimore, 497 m. from Washington city, and 850 m. from New Orleans.

COLUMBUS, c. t. Franklin co. and capital of the state of Ohio, is situated on the E. bank of Scioto r. and was established as the seat of government in 1812, at which time the town was laid out. The streets are wide and regular, and cross each other at right angles. The state-house is a high two-story building, 50 by 75 feet, with a spire over 100 feet high. North of the state-house is the building for public offices, which is 150 feet long. The new penitentiary is a good substantial building, with two wings, each near 200 feet long and 3 stories high, the centre being 56 feet long and 4 stories high. The wings contain 700 cells. There are also here a lunatic asylum, an asylum for the deaf and dumb, and an institution for the blind—three noble charities, principally under the control of the state. Two newspapers are published here. There are several excellent seminaries of learning. Pop. 1830, 2,435; estimated now at 4,500. Dis. 140 m. SSW. from Cleveland, 126 m. W. from Wheeling, 112 m. NE. from Cincinnati, and 396 from Washington city.

CONNEAUTVILLE, v. Crawford co. Pa.

CONNELLSVILLE, c. t. Fayette co. Pa.

CONNECTICUT, one of the United States, is bounded N. by Massachusetts; E. by Rhode Island; S. by Long Island Sound; and W. by New York. Its mean length from E. to W. is about 88 m. Its mean breadth from N. to S. 53 m. containing about 5,100 square m.

It has several ranges of mountains, which, however, are not of much elevation. The general face of the country is varied by moderate undulations of hill and valley. The valleys generally are very rich. The E. part of the state particularly, contains strong and rich soil—the NW. portion is indifferent. The climate is remarkably healthy.

The principal rivers are the Connecticut, the Housatonic, and the Thames.

The principal cities and villages are Hartford, and New Haven, the two state capitals.—New London, Middletown, Norwich, Wethersfield, and Windsor.

The chief agricultural productions are corn, wheat, rye, oats, barley, buckwheat, &c. There are fine meadows and pasture land, on which many sheep and other stock are raised. *Silk* is also raised in considerable quantities.

There are many manufactories of cotton, paper, leather, iron, &c. in a flourishing condition, and there is a considerable coasting trade with New York, Boston, and elsewhere.

There are two colleges in the state—

Yale College at New Haven, which is the oldest in the United States, founded in 1701—and Washington College, at Hartford, founded in 1826. The Asylum for the Deaf and Dumb at Hartford was the first of the kind established in the United States.

The number of manufactories in 1830, was 1,212; mills, 1,597; dwelling houses, 41,416; cattle, 219,800; sheep, 331,054; acres of land, 2,607,839.

A common school system is established, and extending a good influence over thousands of children; but here, as in other states, the people too much overlook the great claims of these primary schools. The school fund is about \$2,000,000.

Internal improvements completed and in progress, are as follows: The *New York, Providence & Boston Rail Road*, extending from Stonington to Providence, R. I. 47 m.; and the *Worcester & Norwich Rail Road*, 48 m.; and the *Hartford & New Haven Rail Road*.

The *Farmington Canal*, 54 m. long, from New Haven to the Massachusetts state line, uniting with the Hampshire & Hampden Canal, which reaches to Northampton, 22 m.; and the *Enfield Canal*, 5½ m. long, round Enfield Falls, in Connecticut r.

The population of the state in 1810, was 261,942; 1820, 275,248; 1830, 297,675.

CONNECTICUT Lake, in the N. part of N. H. the source of the main branch of Connecticut r. is 6 m. long by 2½ broad.

CONNECTICUT R. the principal r. in the New England states, arises in the N. extremity of N. H. and forms the boundary between that state and Vt. It is about 400 m. long. It is navigable for steamboats and vessels drawing 8 feet, to Hartford, 50 m. from its mouth—but smaller boats proceed up about 280 m. It has several falls, which have been overcome by means of locks and dams; of these, Bellows Falls is the most remarkable. There are many beautiful villages upon its borders.

DELAWARE County, SE. part of N. Y. Watered by Delaware r.—hilly. Pop. 1830, 33,024. Delhi, c. t.

DELAWARE R. a large and important r. rises in the state of New York, Schoharie co. in the Catskill Mountains, forms part of the boundary between N.

Y. and Pa. and between Pa. and N. J. and flows into Delaware Bay. It is about 300 m. long, and navigable for the largest vessels to Philadelphia, and for steam boats to Trenton Falls, 35 m. further.

DELAWARE Bay, between the states of Delaware and New Jersey, near 20 m. wide at its mouth, from Cape May to Cape Henlopen. Within the latter cape, a breakwater is constructed, forming a safe artificial harbor for vessels in stormy weather.

DELAWARE, one of the United States, bounded N. by Pennsylvania; E. by Delaware r. and Bay, and the Atlantic; and S. and W. by Maryland. It is 93 m. long—mean breadth 22 m. Area, 2,110 square m. or about 1,350,000 acres.

The general surface of the country is level. The soil is a rich clay in the northern parts of the state, and along the Delaware r. but in the extreme N. it is stony, and becomes sandy on the sea coast. The climate is mild and healthy.

Wheat is the principal production, from which very beautiful white flour is produced. Corn, rye, barley, and flax are also raised in considerable quantities.

There are several important manufactures of cotton, wool, paper, and gunpowder in the neighborhood of Wilmington, and some of the largest grist mills in the country.

The principal towns are Wilmington, Dover, the state capital, and Newcastle.

The principal rivers are the Brandywine and Christiana crs. which unite and fall into the Delaware below Wilmington.

The state is divided into three counties, which are subdivided into 24 hundreds.

Delaware has no college, but some very respectable private academies, and a system of common schools, supported by the interest of a fund, and a tax of equal amount raised in the school districts.

The state was first settled at Fort Christiana, on the creek of that name, by the Swedes and Finns in 1627. In 1655 the colony was taken by the Dutch of New York; and after the conquest of New York by the English, in 1664, it was annexed to that colony. In 1682, it was granted, with Pennsylvania, to William Penn. The colonies were separated in 1701, but remained under one governor until 1776, when Delaware adopted a new constitution.

Internal Improvements.—The Chesapeake & Delaware Canal connects Delaware r. with the head of Chesapeake Bay, and lies principally in this state. It is 13½

m. long, 66 feet wide at the top, and 10 feet deep. It was commenced in 1824, and finished in 1829, at a cost of \$2,200,000.

The *Newcastle & Frenchtown Rail Road*, extends from Newcastle, on the Delaware r. to Frenchtown, on Elk r. It is 16 1-5 m. long—was finished in 1832, and cost \$400,000.

The *Wilmington & Susquehanna Rail Road*, extends from Wilmington to the Susquehanna, opposite Havre de Grace, and forms part of the line of rail road communication between Philadelphia and Baltimore. (See Maryland.)

Pop. of the state, 1810, 72,674; 1820, 72,749; 1830, 76,739; of which 3,305 were slaves.

DETROIT, c. t. Wayne co. Michigan, and capital of the state—a flourishing city, and increasing rapidly. It is on the NW. bank of Detroit r. in the E. part of the state. Lat. 42° 24'; long. 6° W. Its public buildings are very respectable, and its trade is considerable and increasing. There is a daily intercourse by steamboat between this place and Buffalo, and in the favorable season immense numbers of travellers and emigrants arrive here. The city was settled in 1683, by the French. It was captured by the British in 1812, and afterwards taken by the Americans. Pop. 1830, 2,222. Dist. 526 m. from Washington.

DES SOTO County.

DETROIT R. uniting Lake Erie with Lake St. Clair—forms part of the boundary between Michigan and Canada. It is about 28 m. long, and at Detroit three-fourths of a mile wide. Navigable for sloops and steamboats.

ERIE County, W. part of N. Y. on Niagara r. and Lake Erie. Watered by Buffalo, Seneca, Cayuga and Cauquaga crs. and other streams. Buffalo, c. t. Pop. 1820, 15,668; 1830, 35,719.

ERIE, Lake, one of the five-great lakes, is situated between the states of N. York, Pennsylvania and Ohio, on the S. and SE. and U. Canada on the N. Its greatest length is 267 m.—its circumference about 650 m. The waters of Lakes Superior, Michigan and Huron flow into Lake Erie through Detroit r. Its outlet is Niagara r. which connects it with Lake Ontario. Its greatest depth does not exceed 150 feet. The Erie canal connects it with Hudson r. forming an internal communication by water from the Atlantic to the head of Lake Michigan and Lake Superior. It is also connected with the Ohio r. by the Ohio & Erie Canal. The commerce on this lake is very considerable, and rapidly increasing with the growing improvements of the West.

ERIE, v. Tioga co. N. Y.

ERIE, t. Erie co. N. Y. 23 m. NE. of Buffalo.

ERIE County, is the NW. co. of Pa. adjoining Lake Erie. Soil fertile—surface undulating and diversified. Watered by branches of French cr. and other streams. Erie, c. t. Pop. 1830, 17,041.

ERIE, c. t. & t. Erie co. Pa. and port of entry. Has a good harbor, formed by Presque Isle, and considerable trade. 272 m. NW. from Harrisburg. Pop. 1830, 1,329.

EVANSVILLE, c. t. Vanderburg co.
 Ia. on Ohio r.

EVERGLADES, of Florida. A letter
 from an officer in the Florida army thus
 writes of this comparatively unknown
 region: "At this season, (dated Fort
 Brooke, December, 1837,) the appearance
 of the everglades is like that of a bound-
 less field of wheat in the harvest season.
 A species of grass, about five feet in
 height, covers the earth, and extends be-
 low the horizon. The country is perfect-
 ly level; and the winds, which are al-
 ways blowing, wave the grass like a
 troubled sea. Near Fort Gardiner, which
 is seventy miles due east from here, there
 are strips of hammock land, and when
 the surface rises a little, of pine barren;
 but the Indians state, that in the lower
 part of the country the prairie land
 stretches to the horizon all around you,
 except here and there a few spots of wood
 called Islands. It is the general impres-
 sion that these everglades are uninhabit-
 able during the summer months, by rea-
 son of their being overflowed by the abun-
 dant rains of that season; but if it should
 prove that these inundations are caused
 or increased by obstructions to the natural
 courses of the rivers, as outlets to the nu-
 merous lakes, American industry will re-
 move these obstructions."

FLORIDA, t. Montgomery co. N. Y. Pop. 1835, 2,896.

FLORIDA, v. Orange co. N. Y. 111 m. S. of Albany.

FLORIDA, the SE. Territory of the United States, bounded N. by Georgia and Alabama, E. by the Atlantic, W. and S. by the Gulf of Mexico and

part of Alabama. It is usually divided, in describing it, into East and West Florida. Length, 360 m.—breadth, 150 m.

The surface of the country generally is flat, and a great portion of the soil in the peninsula is wet, swampy and unfit for cultivation.

In other parts there is a rich, productive soil, and many excellent forests of live oak and other timber.

The climate is hot and unhealthy, except between the months of October and June, when it is very pleasant and healthy.

Florida was discovered by Ponce de Leon, a Spaniard, in 1512, and settled by the Spaniards in 1524, who were long and obstinately opposed by the native Indians. The country was subdued by De Soto, in 1539. In 1763, it was ceded by Spain to Great Britain, in exchange for Havanna. The Spaniards re-conquered it in 1781, since which they held it until it was ceded by Spain to the United States, in 1821.

Florida has been remarkable since that period for two wars with the Seminoles. The first broke out in 1818, and was soon brought to a close by Gen. Jackson. The second war has been more obstinate and bloody.

Tallahassee, in W. Florida, is the seat of government. The other principal towns are St. Augustine and Pensacola.

The principal rivers are the St. Mary's, St. John's, the Suwanee, the Apalachicola and the Withlacouchee.

Pop. 1830, 34,720; 1838, 48,800.

Internal Improvements.—Among the rail roads and canals projected or commenced, is a canal and rail road from St. Joseph to Wimico Lake, opened in 1836—12 m. long. Incorporated to extend to Tallahassee, 70 m.

The *East Florida Rail Road* has been surveyed, to extend from Jacksonville to St. Marks, 160 m.

Brunswick & Florida Rail Road Company, to extend from Brunswick, Ga. to Apalachicola Bay.

Tallahassee Rail Road, from Tallahassee to St. Marks, 20 m. *Florida, Alabama & Georgia Rail Road*, to extend from Columbus, Ga. to Pensacola Bay.

A rail road to extend from Jacksonville to Tallahassee, 150 m.

A rail road from Pensacola Bay to Mobile Bay, 40 m. Several other canals and rail roads have been incorporated.

GEORGETOWN Cross Roads, p. o. Kent co. Md.

GEORGIA, one of the United States, bounded N. by Tennessee and N. Carolina, E. by South Carolina and the Atlantic Ocean, S. by Florida, and W. by Alabama. Its length N. to S. is about 280 m.—breadth 250—square m. 58,500.

On the margin of the rivers and on the sea coast, the country is generally low and marshy. The pine barrens extend 60 or 80 m. from the sea, beyond which the country rises and undulates, with considerable elevations. In the interior the land is strong and productive, and well adapted to the cultivation of cotton, rice

and tobacco. Oranges, limes and figs are also raised abundantly.

Considerable gold has been found in the neighborhood of the Blue Ridge.

The climate is very healthy in winter, but hot and subject to fevers in the summer season.

The chief cities and towns are Savannah, Augusta, and Milledgeville, the capital.

The university is situated at Athens, and has a library of about 5,000 volumes. There are over 100 schools in the state, with a fund of \$500,000 for their support.

Until recently, a large portion of the NW. section of the state was occupied by the Cherokee Indians, and of the W. part by the Creeks, who have recently been removed to the lands assigned them by the United States W. of Arkansas.

The principal rivers are the Savannah, the Altamaha, the Great Ogeechee, the Chatahoochee, the Ockmulgee, the Oconee, St. Mary's and Flint.

Georgia was the last settled of the Atlantic states. In 1732, James Oglethorpe and a body of emigrants founded Savannah. A representative assembly was first established in 1755. Previous to the revolution, the colonists were frequently harassed by the Indians, and during the revolution the country was often overrun by the British.

Pop. 1790, 82,548; 1800, 162,686; 1810, 252,433; 1820, 348,989; 1830, 516,823, of whom 217,530 were slaves.

Internal Improvements.—*Augusta & Athens Rail Road*, 14 m. long, connected with the rail road in S. Carolina, which extends from Hamburg to Charleston. *Central Rail Road*, to connect the cities of Savannah and Macon, by way of Milledgeville, about 200 m. long, in progress—commenced in November, 1836.

Altamaha & Brunswick Rail Road, 12 m. long.

Macon & Forsyth Rail Road, 25 m. long.

Augusta & Columbus Rail Road, about 210 m. long.

Savannah & Ogeechee Canal, from Savannah to Ogeechee r. 16 m. long, finished in 1829. It is proposed to extend this canal to the Altamaha, 60 m.

HARTFORD, v. Windsor co. Vt.

HARTFORD City, Ct. one of the capitals of the state, is situated on Connecticut r. at the head of sloop navigation, 34 m. above New Haven. It is a handsome city, and a place of considerable trade with Boston, New York and West Indies. Some of the public buildings are very beautiful, among which are the state house, a college, a state arsenal, a deaf and dumb asylum, retreat for the insane, several churches and banks. There are also several respectable institutions of learning. The citizens are distinguished for their enterprise and manufacturing industry, as well as for their attention to literature and education. The surrounding country is very fertile and highly cultivated. Pop. 1830, including the t. 9,789.

HARTFORD County, in the central part of Ct.—the Connecticut r. flowing through it from N. to S. The surface is diversified, and the soil very fertile and productive. It contains many manufactories, particularly of cotton. Hartford, c. t. Pop. 1830, 51,141.

- HUDSON**, or North R. named from the discoverer, Hudson, an important r. of the state of New York, rises in the mountains in Essex and Hamilton cos. SW. of Lake Champlain, flows nearly S. about 300 m. and empties into New York Bay. It has three expansions, called Tappan, Haverstraw and Peekskill Bays. Mohawk r. is its principal tributary, and unites with it at Waterford, between Albany and Saratoga cos. The Hudson is remarkable for its bold shores, and its varied and beautifully picturesque Highland scenery. It is navigable for large steamboats to Albany and Troy, 165 m. It is

connected with Lake Erie by the Erie Canal, and with Lake Champlain by the Champlain Canal, and is the great channel of trade and travelling to the north and west from New York city.

HURON, v. Sangamon co. Ill.

HURON, Lake, one of the five great
 lakes, situated between the state of Mich.
 and Upper Canada, is 255 m. long—mean
 breadth, 70 m. without including Lake
 Iroquois, (or Manitouline.) Its depth in
 some places is said to be unfathomable.
 It contains a chain of islands, stretching
 along the N. part, the principal of which
 is the Great Manitou. That portion of
 the lake on the NE. is variously named
 Lake Iroquois, Lake Manitouline, and
 Georgian Bay. It is about 130 m. long
 and 45 wide. The outlet of Lake Huron
 is St. Clair r. which unites it with Lake
 St. Clair, and thence by Detroit r. it is
 connected with Lake Erie.

HURON R. in the SE. part of Mich.
 rises in Oakland, Ingham and Jackson
 cos. and flows through Washtenaw and
 Wayne cos. into Lake Erie. Comparative
 course, 70 m.

HURON R. Mich. rises near Pontiac,
 and flows into Lake St. Clair 20 m. above
 Detroit.

ILLINOIS, one of the United
 States, bounded N. by Wisconsin Terri-
 tory and Lake Michigan, E. by Indiana,
 SE. by Kentucky, SW. by Missouri, and
 NW. by Missouri Territory—lying be-
 tween 37° and 42° 30' N. lat. and be-
 tween 10° 25' and 14° 30' W. long. Ex-
 treme length, 382 m.—extreme width, 220
 m. Area, 59,300 square m. or 37,952,000
 acres.

In 1763, the territory embracing Illinois
 was ceded to Great Britain by the French,
 who first made settlements along the Illi-
 nois and Mississippi rs. as early as 1673.

After the revolution, the country was held by the state of Virginia, and ceded by that state to the United States in 1787. When the territory now forming the state of Ohio was set apart, Indiana and Illinois were united. In 1809, they were organized into two distinct territories; and in 1818, Illinois was admitted as a state into the Union.

The surface of the state is generally level, with a little inclination, and gently undulating. In the southern part it is more hilly, but without any considerable elevations. The soil of a great portion of the state is extremely rich, and has gained for it from some travellers the appellation of the garden of America. There are, however, some extensive plains and prairies, which are scarce of timber and pure water. Some of them are for a portion of the year inundated with water. But in general, these rich prairies are susceptible of being drained at small expense, which will undoubtedly take place as the population becomes more dense, and which will remove the danger of sickness produced in such neighborhood by the miasma arising from the ponds and swamps. Much of the prairie land is quite dry. The "bottom" lands, which are flooded at times, but on which the waters do not stand, are inexhaustible in fertility—the soil reaching to a depth of 20 or 30 feet.

The principal productions are *wheat* and *maize*, or Indian corn; but other grains, and also cotton, hemp and tobacco, can be raised. Vegetables can be produced abundantly. Over seventy millions of pounds of lead have been produced from 1821 to 1835, yielding to the U. S. government six million pounds.

The population of the state has increased very rapidly. In 1810, it was 12,282; 1820, 55,211; 1830, 157,575; and in 1835, according to the state census, it was 285,799.

Principal rivers—Illinois, Rock, Kaskaskia, Sangamon, Little Wabash, Fox and Kankakee.

Vandalia is the capital of the state.

Internal Improvements.—The state has commenced an extensive system of internal improvements. At the session of the Legislature in 1837, an act was passed appointing a Board of Commissioners of Public Works, and appropriations to the amount of \$9,600,000 were authorized for various improvements, some of which are as follows: A *rail road* from Cairo, near the junction of the Ohio and Mississippi rs. by way of Vandalia and Decatur, to a point at or near the S. termination of

the Illinois and Michigan Canal, and thence to Galena, \$3,500,000. A rail road from Quincy, on the Mississippi r. by way of Columbus, Meredosia, in Morgan co. Springfield, Sangamon co. Danville, in Vermilion co. to the state line, towards Lafayette, Ia. \$1,850,000. A rail road from Alton to Mount Carmel. A rail road from Alton to Shawneetown, to diverge from the former at Edwardsville. A rail road from Peoria to Warsaw, on the Mississippi r.

A branch of the Central Rail Road, at a point on a line from Shelbyville, Shelby co. to Hillsboro', via Charleston, Coles co. and Paris to the Indiana state line, in the direction of Terre Haute.

A rail road from Lower Alton, via Hillsboro', to the Central Rail Road, to intersect the former rail road to Terre Haute.

A rail road from Bloomington, McLean co. to Mackinaw t. Tazewell co. with a branch to Illinois r. to connect with the Peoria and Warsaw Rail Road, and another branch to Pekin.

A rail road from Belleville, by way of Lebanon, to intersect the rail road from Alton to Mount Carmel.

Besides these, there are several rail roads undertaken by private companies; among which are, a rail road from Jacksonville to Augusta, 22 m.; a rail road from Chicago to Des Plaines, 12 m.; a rail road from St. Louis to the coal mines at Bluffs, 6 m.; a rail road from Naples to Jacksonville.

The *Illinois & Michigan Canal* extends from Chicago, on Lake Michigan, to Peru, on Illinois r. 100 m.

Besides these, liberal appropriations have been made for improving the Wabash, Illinois, Rock, Little Wabash, and Kaskaskia rs. and several public roads.

ILLINOIS R. a very important r. whose northern source is Fox r. rising in Wisconsin Territory, and its E. source the Kankakee. When the Kankakee and the R. des Plaines unite, they take the name of Illinois. The comparative length of the Illinois, including Fox r. is about 400 m. falling into the Mississippi 20 m. above its junction with the Missouri. The length of the Illinois proper is about 265 m. It is navigable, generally, for 210 m. and at high water as far as Ottawa, about 220 m. The navigation of the r. by steam and other vessels is considerable and fast increasing.

INDIANA, one of the United States, bounded N. by Michigan and the Lake, E. by Ohio, S. by Kentucky, and W. by Illinois. Its greatest length from N. to S. is 275 m. by 145 m. in breadth, and contains about 35,000 square m.

The surface of the country is generally level, with occasional broken and uneven sections, which, however, are more particularly confined to the neighborhood of the Ohio r. in the S. part of the state. There are many prairies, some of which are extensive, containing belts of good timber on the streams which cross them.

The climate is similar to that of Ohio and Illinois, and is generally healthy, except on the borders of Lake Michigan, which are subject to heavy rains. The winters are short, and not usually very severe.

The soil is extremely rich and productive. The prairies are beautiful and well adapted to the growth of wheat and Indian corn. But much of the country in the N. part of the state is low, and too wet for cultivation.

The principal rivers are the Ohio, which forms the S. border of the state—the Wabash, White, White Water, Kankakee, Salamanic and Mississinewa.

The chief towns are New Albany, Jeffersonville, Vincennes, Indianapolis, (the

late capital of the state,) and Springfield, the present state capital.

Indiana College was founded in 1827, and is located at Bloomington. The U. S. granted two townships of land to this college. The general subject of common school education had not been much attended to, up to the year 1838, although provided for in the constitution.

The population of the state has increased very rapidly. In 1800, it was only 5,641; 1810, 24,520; 1820, 147,178; 1830, 343,031.

Indiana was visited as early as 1703 by the French traders and soldiers from Canada, and some small settlements were made, particularly on the Wabash, among which was Vincennes. The settlers lived a long time in almost entire seclusion from the rest of the world. The savages frequently harassed them and broke up their settlements. In 1763, the country passed by treaty into the hands of the English, but it was merely nominal. Before 1800, Indiana was included in the general territory NW. of the Ohio r. and from 1800 to 1809, it was united in its territorial government with Illinois. In 1816, it was admitted into the Union as a state.

The settlers suffered so much from the savages, that in 1811, Gen. Harrison was sent against them with an armed force. They encamped at Tippecanoe, near Prophets town, where the Indians were assembled to the number of 600 warriors. After negotiation, in which the Indians professed great friendship, they arose at night and attacked the American camp with horrid shouts and yells. The troops were at first thrown into confusion, but were rallied, and succeeded in entirely defeating the savages. Two hundred Americans fell in the battle.

Internal Improvements.—The public improvements now in progress in this state are—The *Wabash & Erie Canal*, to connect Lake Erie at Toledo, on the Maumee Bay, with the Wabash r. at Terre Haute.

The *Central Canal* connects the Wabash and Erie Canal, at Peru, on the Wabash r. with the Ohio r. at Evansville, and is again connected with the Wabash and Erie Canal at Terre Haute, by a cross cut intersecting it at Point Commerce, at the mouth of Eel r. 40½ m. long.

The *White Water Canal* is to connect Cambridge City, on the national road, with the Ohio r. at Lawrenceburgh, 76 m. A branch extends from the main canal at Harrison to Cincinnati, Ohio.

The *Madison & Lafayette Rail Road*,

(of which 22 m. are completed, from Vernon to Madison,) is expected to be finished in 1842. Length, 160 m.

In addition to these, two McAdamized roads are in progress—one from Jeffersonville to Crawfordsville, connecting the Ohio, opposite Louisville, with the Wabash and Erie Canal—158 m. long; and

The *New Albany & Vincennes Road*—length, 104 m.

KENTONTOWN, v. Harrison co. Ky.

KENTUCKY R. rises in the Cumberland Mountains, in the SE. part of Ky. and flows NW. to the Ohio r. at Port William, Gallatin co. It is navigable in high water for steamboats to Frankfort, the capital. Length, 325 m. This r. flows through a rich agricultural country, containing coal, iron, salt and lumber, and a population of 180,000.

KENTUCKY, one of the United States, is bounded N. by Indiana and Ohio, E. by Virginia, S. by Tennessee, and W. by Missouri and Illinois. Its greatest length is 400 m. from E. to W. Its mean breadth, N. and S. 140 m.—with an area of 40,600 square m. or about 26,000,000 acres.

The state originally formed part of Va. and was first settled by the celebrated Col. Daniel Boone, the backwoodsman, who built a log hut, and established himself with his family, in the midst of great dif-

ficulties and discouragements, in 1769. Lexington was founded in 1776. The state was set apart from Va. in 1790, and in 1792 it was admitted into the Union.

The citizens of Kentucky have always been distinguished for their gallantry and chivalry, which were particularly manifested in their enthusiasm to share in the toil and glory of the late war of 1812.

The principal rivers are the Ohio, which forms the whole northern boundary, the Kentucky, Licking, Green, Cumberland, Tennessee, Salt, and Big Sandy r. which forms half of the E. boundary. The Kentucky r. flows through a chasm of limestone several hundred feet perpendicular height.

The chief towns are Louisville, which is the largest; Lexington, which is the oldest; Maysville, and Frankfort, the state capital.

The surface of the country is undulating and diversified, presenting but few great elevations, except in the eastern part, which is mountainous. A large portion of the central section of the state is a rich and most beautiful country, not surpassed by any in the world. The soil generally throughout the state is very fertile.

The climate is healthy and agreeable—the winters seldom lasting longer than three months.

The whole country W. of the mountains rests on a bed of limestone from 8 to 10 feet below the surface. There are many remarkable cavities, called "sink holes," caused by the waters penetrating through the limestone. Some of them are 60 feet deep, and 250 in circumference at the top.

There are also a number of wonderful caverns of great depth and extent. The Mammoth Cave near Green River is the most celebrated. It has been explored to the extent of 15 m. without reaching the termination.

Iron is found abundantly—also copers, lead and coal are found in different parts of the state. Salt springs are numerous.

The principal agricultural productions are wheat, hemp and tobacco. Indian corn and cotton are also raised, and a great variety of fruits.

A great trade is carried on by river navigation, in the various agricultural productions. A large number of fine horses and cattle are also raised and transported on flat boats down the rivers, or driven across the mountains into the Atlantic states.

Of religious denominations, the Baptists are the most numerous. There are

also a large number of Presbyterians and Methodists. The Catholics and Episcopalians are less numerous.

There are several colleges in this state, viz: The Transylvanian University, at Lexington; the Central College, at Danville; Cumberland College, at Princeton; a college at Augusta, and one at Georgetown. Also a Catholic Seminary, called St. Joseph's College, at Bardstown. Common school education has not yet received that attention which its great importance demands.

Population at various periods:

	Total Pop.	Slaves.
In 1790,	73,677	12,430
1800,	220,959	43,344
1810,	406,511	80,561
1820,	564,317	120,732
1830,	687,917	165,350

Internal Improvements.—*Lexington & Ohio Rail Road*, to connect Lexington with a point on Ohio r. above Louisville—about 80 m. long.

Green River Rail Road—two routes surveyed; one from Hopkinsville to Cumberland r. terminating at Harman's Ferry, 56 m.; the other terminating at Eddyville, 47½ m.

Portage Rail Road, from Bowling Green to Barren r. 1½ m.

Charleston & Cincinnati Rail Road, designed to open a direct communication between the valleys of Ohio and Mississippi and the Atlantic, to extend from Cincinnati to Louisville through Kentucky, thence to Cumberland Gap, (see S. Carolina,) thence to Columbia, S. C. thence to Charleston, S. C.

Several other rail roads have been projected, but not commenced.

The *Kentucky River Navigation*, intended to extend from its mouth to the three forks, by means of dams, locks and slack water. The latter for the distance of 250 m. to admit steamboats of 150 tons burden. The locks to be 175 feet long, and 35 feet wide.

Green and Barren rs. are also to be improved by means of dams and locks, part of which is in progress.

LONG Island, N. Y. extends from the Narrows, which separates it from Staten Island below N. Y. city, to Montauk Pt.

122 m. and is divided from Ct. by L. I. Sound. Its average width is 10 m. A low sandy beach reaches along nearly the entire S. side of the island, with numerous inlets, forming several long bays abounding in fish. The southern part of the island is generally flat and sandy, but is productive in Indian corn, wheat, rye and vegetables. A range of hills and rocks extends along the N. part. The island is divided into three counties—Kings, Queens, and Suffolk. It was first settled in 1636. Principal towns, Brooklyn, Williamsburgh, Jamaica, Flushing, Flatbush, Huntingdon, and Sag Harbor.

Pop. 1731, 17,820; 1790, 36,949; 1810, 48,752; 1830, 69,775; 1835, 71,880.

LOUISA, c. h. Louisa co. Va. 54 m. from Richmond.
LOUISA, c. t. Lawrence co. Ky. 127 m. from Frankfort.
LOUISBURG, c. t. Franklin co. N. C. 30 m. from Raleigh.
LOUISIANA, one of the United States, bounded on the N. by Arkansas and Mississippi, E. by Mississippi and the Gulf of Mexico, S. by G. of Mexico, and W. by Texas. Its greatest length, E. and W. is 320 m. Its greatest breadth N. and S. 270 m. and contains about 48,000 square miles.
 In 1682, part of the country was explored by La Salle, and called Louisiana after Louis XIV. He began a settlement in 1684 at the Bay of St. Bernard on the G. of Mexico about 300 m. W. of the mouth of the Mississippi. The Mississippi r. had been already discovered in 1673 by two French missionaries, who crossed from Quebec, by way of the Lakes, to the Mississippi, and down the r. to the mouth of the Arkansas.
 A more permanent settlement was made in 1699: and in 1717, the city of New Orleans was founded. In 1763, Louisiana, which included Arkansas, Missouri, and all the territory now in possession of the United States W. of the Mississippi r. was ceded by France to Spain, but was not taken possession of by that power until 1769. It was ceded back to France in 1800; and in 1803 it was purchased by the U. States for 60,000,000 francs, or over 15,000,000 dollars. In 1812 Louisiana, as at present defined, was admitted into the Union as a sovereign State. In 1814 the State was invaded by a British army under Gen. Pakenham, which, after several indecisive actions, was completely repulsed with great slaughter, by Gen. Jackson, below New Orleans, Jan. 8, 1815.
 Three-fourths of the surface of the state may be considered an entire level—divided into swamps, prairies, alluvions, pine forests, hickory and oak lands. The elevations are very slight, and are principally

in the western section. Some of the prairies are of vast extent, containing from 5,000 to 8,000 square m. The Attakapas and the Opelousas prairies are the largest. They contain rich pasture for cattle, and are fringed with forests of pine on the N. and S. Many spots exhibit beautiful fertile plantations, on which cotton and indigo are cultivated, and large herds of cattle may be seen quietly grazing.

A great portion of the state, amounting to 5,000,000 acres, is annually inundated by the waters of the Mississippi. Part of this soil is of the greatest fertility, and is susceptible of being drained—other portions are composed of cypress swamps and marshes.

Cotton is the great staple of the state, but sugar is produced in great quantities in the more elevated soil. Rice also is produced on the banks of the Mississippi.

The principal rivers are the Mississippi, Red r. Washita, Atchafalaya, Black, Lafourche, Sabine, Tensaw, Calcasia and Beuff. The state abounds in numerous lakes, the principal of which are Lake Borgne, Pontchartrain, Sabine, Calcasia and Barrataria.

The chief towns are New Orleans, the capital of the state, Donaldsonville, St. Martins, Alexandria, St. Francisville, Baton Rouge and Natchitoches—but N. Orleans is the only town of considerable size.

The Catholic is the prevailing religion. Other denominations do not number over 40 ministers.

There is a college at New Orleans, and one at Jackson, and \$40,000 annually are appropriated for the education of the children of the poor.

Population at various periods:

In 1810, (including slaves,) 76,556
1820, " " 153,407
1830, " " 215,739

of which 109,588 were slaves.

Internal Improvements, completed, projected, and in progress: *Carrollton Rail Road*, between New Orleans and Carrollton, 6½ m. with branches, making 11½ m. Cost near \$300,000—completed.

Pontchartrain Rail Road, from New Orleans to Lake Pontchartrain, 4½ m. Cost, with improvements, \$450,000—completed.

In progress: *New Orleans & Nashville Rail Road*, surveyed in 1836—length 564 m.—capital \$10,000,000; laid out to the state line, 80 m. and part of it under contract. This great work is proposed to be continued through Tennessee and Virginia to Baltimore, and thus form part of the great rail road communication from Louisiana to Maine.

St. Francis & Woodville Rail Road, 27 m. long. Capital \$500,000.

New Orleans & Lake Borgne Rail Road, an extension of the Pontchartrain Rail Road, 20 m. Capital \$200,000.

Alexandria & Cheneyville Rail Road, from Cheneyville to Alexandria, on Red r. 30 m. Capital \$500,000.

Baton Rouge & Clinton Rail Road, 20 m. Capital \$250,000.

Atchafalaya Rail Road, to connect Point Coupee with Opelousas. Capital \$500,000.

Lake Providence Rail Road, from Providence, on the Mississippi, to the great raft on Red r.—100 m. Capital \$800,000.

Port Hudson, Jackson & Clinton Rail Road, 28 m. Capital \$400,000.

N. Orleans & Bayou Sara Rail Road, (proposed,) 101 m. Capital \$1,400,000.

New Orleans & English Turn Rail Road, 4½ m. Capital \$60,000, (proposed.)

Barrataria Canal, to extend from the Mississippi, 6 m. above New Orleans, to the Lafourche, thence through the lakes to the sea by Barrataria Bay—22 m. A small part is finished.

Carondelet Canal, extends from New Orleans to Lake Pontchartrain, through Bayou St. John, 4 miles. Cost about \$900,000, including improvements.

Orleans Bank Canal, 4½ m. from New Orleans to Lake Pontchartrain.

Lake Veret Canal, to extend from Barrataria or Lafourche Canal to Lake Veret, 8 m.

A *ship canal* is proposed, to lead from the Mississippi to the ocean, 8 m. long, to commence 3 m. below Fort Jackson. Estimated cost, \$500,000.

Among other public works, that of the *Draining Company* deserves to be particularly noted. The object is to drain, by means of steam engines, the swamps between New Orleans and Lake Pontchartrain, containing about 23,000 acres, on a plan similar to that used in Holland. Profits to be derived from the increased value of the lands drained, which are well adapted to cultivation of the sugar cane.

LOUISVILLE, city & c. t. Jefferson co. Ky. on the S. bank of Ohio r. above the falls. It is the largest town in the

state. Bear Grass cr. falls into the Ohio above the town, and affords a good harbor for steamboats and other vessels. The city is neatly built, and contains some handsome public buildings. The site of the town rises gradually from the river, and presents a fine prospect of the river and opposite shore. The commerce on the r. is very extensive, and the enterprising citizens of Louisville have done much in various manufactures. As an evidence of the rapid increase of the place, the population in 1800 amounted to 1,350, and in 1830 to 10,354. Dist. 52 m. N. of Frankfort, 110 by land from Cincinnati, and 590 from Washington City.

LOWELL, t. & v. Middlesex co. Mas. a very thriving manufacturing v. situated at the junction of the Merrimack and Concord rs. 25 m. NW. of Boston, with which it is connected by a rail road and canal. The growth of this place is a most remarkable example of the activity and enterprise of the American people. In 1817, there was but one manufactory; it now contains a large number, principally cotton, with several millions of dollars invested, and some of them the largest in the U. States. The water is conveyed from the river by means of a canal 60 feet wide and 8 feet deep, from which smaller canals supply the factories. Pop. 1830, 6,474; 1837, 18,000.

MAIDSTONE, t. Essex co. Vt.

MAINE, one of the U. States, in the NE. part, is bounded N. and NW. by Lower Canada, E. by New Brunswick, S. by the Atlantic Ocean, and W. by New Hampshire. It lies between 43° 5' and 48° 6' N. lat. and 66° 49' and 71° W. long. from Greenwich.* Its greatest length is 348 m.—greatest breadth, 180 m. Area about 33,300 square m.

The country was originally granted to the Council of Plymouth by James I. in 1606, who attempted a settlement at the mouth of the Kennebeck r. which failed.

In 1624 the company granted it to Gorges and Mason, under whom it was first permanently settled in 1630. Massachusetts purchased the territory of them, and in 1691 her charter embracing it was confirmed. It remained a district of Massachusetts until 1820, when it became a separate state, and was admitted into the Union.

The surface of the country, though not mountainous, presents some broken ridges in continuation of the Appalachian range; and occasional elevations which rise several thousand feet. A range of highlands enters the state from the N. part of New Hampshire and runs parallel with the St. Lawrence, continuing a northerly and westerly course, intersecting the N. and S. line which forms the E. boundary of Me. These are the highlands which divide the waters which flow into the St. Lawrence from those which flow into the Atlantic. There are other considerable elevations in irregular groups, of which the principal are the Katahdin, White Cap, Saddleback, Ebeeme and Spence Mountains. The Katahdin is 5,375 feet high; several of the others are from 3,500 to 4,000 feet above tide.

The winters are generally severe. The ground is covered with snow in the inte-

* The limits here given are according to the American claim under the treaty of Ghent, describing the boundary in these words:—"From the north-west angle of Nova Scotia, viz: that angle which is formed by a line drawn due north from the source of St. Croix river to the highlands, along the said highlands which divide those rivers that empty themselves into the St. Lawrence from those that fall into the Atlantic Ocean to the northwesternmost head of the Connecticut river." This boundary is now in dispute. The British claim a line S. of the head waters of the Aroostook, Allagash and S. branch of St. Johns—beginning at Mars-hill. The award of the King of the Netherlands, making the channel of St. Johns and St. Francis rivers the boundary, being a positive departure from the terms of the treaty, has not been acceded to by the U. S.

rior and southern parts for three or four months in the year, and in the forests and mountainous regions for five months. The summers are hot, but not sufficiently long for the favorable cultivation of Indian corn, though a considerable quantity is raised. The longest season of vegetation is between the 20th April and 15th October.

The soil is extremely various. Between the rivers Kennebeck and Penobscot it is very fertile, and favorable to the growth of wheat and other grains. Along the coast it is generally of a poorer quality. The country abounds in timber, which may be considered its chief production. Much of the land is well adapted to grazing.

The principal lakes are the Moosehead, 50 m. long by 12 broad; Umbago Lake, (partly in N. H.) 18 m. long by 10 broad; Chesuncook Lake, 20 m. long by 3 broad, and Sebago Pond, 12 m. long. The state abounds in numerous smaller lakes and ponds.

There are numerous islands on the coast. The principal are Mount Desert, Grand Menan, Deer Island and the Fox Islands.

The principal bays are Penobscot, Passamaquoddy, Frenchman's, Casco and Portland harbor. There are many other fine harbors favorable for commerce.

The chief rivers are the Penobscot, Kennebeck, Androscoggin, Saco, St. Johns and St. Croix. Abundance of fish are taken all along the coast.

Iron abounds in many parts of the state, and lead is found in small quantities. Slate of a superior quality exists between the Kennebeck and St. Johns rs. Marble is found on the Penobscot, and good building granite abounds in all parts of the state. Lime is abundant in Waldo and Lincoln cos.

The principal towns are Portland, the former capital, Hallowell, Augusta, the present state capital, Bath, Brunswick, York, Saco, Bangor, Waldoboro, Machias, Wiscasset, Eastport and Kennebunk.

The state has many respectable institutions of learning. Bowdoin College, at Brunswick, founded from lands granted by Hon. James Bowdoin, in 1794, and other lands from Massachusetts and Maine. Waterville College, incorporated in 1813. Bangor Theological Seminary. Maine Wesleyan Seminary, at Readfield, incorporated in 1822. Gardiner Lyceum, established in 1822, to prepare young men by a scientific education to become skilful farmers and mechanics.

Besides these, there are about 35 incorporated academies, aided by grants of land from the state. The state has also provided for common school instruction. A sum equal to 40 cents for each inhabitant is raised by law in every town, to be apportioned among the school districts.

Pop. 1790, 96,540; 1800, 151,719; 1810, 223,705; 1820, 298,335; 1830, 399,462; 1837, 472,151, exclusive of foreigners, which are estimated at 10,000. The increase of population from 1830 to 1837, was 72,689. Paupers in 1835, 2,480—annual expense, \$68,188.

Internal Improvements.—The *Cumberland & Oxford Canal*, extends from Portland to Sebago Pond, 20½ m. and has 26 locks. It was completed in 1829. By means of a lock in Songo r. it is united with Brandy and Long Ponds, making the whole water communication 50 m. Total cost, near \$250,000.

The *Bangor & Orono Rail Road*, from Bangor to Orono or Oldtown, 10 m. long, completed in 1836. No other canal or rail road is completed.

A rail road has been projected from the coast of Maine to Quebec, and a reconnaissance of three routes has been made by Col. Long, of the United States Topographical Engineers. The route from Portland to Quebec, 277 m. is estimated to cost \$2,446,000. The route from Wiscasset to Quebec, 246 m.; cost, \$1,963,500. The route from Belfast to Quebec, 227 m.; cost, \$1,721,500. The last route is pronounced the most eligible.

A rail road has been projected from Portland to Bangor, 132 m. long.

The *Portland, Saco & Portsmouth Rail Road* was incorporated in 1837, 48 m. long, designed to connect with the *Eastern Rail Road* from Boston to Portsmouth.

MARY Ann, t. Licking co. O.

MARY Ann Furnace, p. o. Huntingdon co. Pa.

MARY Ellen, v. Warren co. O.

MARYLAND, t. Otsego co. N. Y. 16 m. S. of Cooperstown. Pop. 1835, 2,015.

MARYLAND, one of the U. States, is bounded N. by Pennsylvania, E. by Delaware and the ocean, S. & W. by Virginia.

Maryland was first explored by Lord Baltimore, a Catholic, who visited the country to form a settlement on account of the persecution of that sect in England. He died on his return to England, while preparing for emigration. His son obtained the grant of the territory, and named it Maryland, in honor of Henrietta Maria, the Queen of Charles I. He appointed his brother, Leonard Calvert, governor of the colony, who established a settlement in 1634, at St. Mary's, on the Potomac. The Catholics were severely persecuted for some years after, and the colonists experienced various troubles, which were removed at the restoration of Charles II. in 1660. The Calvert family were a second time deprived of the government, by William and Mary, and Maryland continued a royal government until 1716, when the proprietor was again restored to his rights. On the 14th of August, 1776, the constitution of the State was ratified.

The only mountains are along the N. bank of the Potomac, where the Appalachian ridge crosses a narrow strip of the State. The rest of the State is generally undulating and level.

There is much good land in the State, adapted to the cultivation of wheat and tobacco. The valleys in the W. part of the State particularly, are extremely fertile and productive.

The climate is rather milder than that of Pennsylvania, and somewhat warmer in summer. The weather is liable to sudden changes of heat and cold. In the low lands, on the shores, it is subject to intermittent fevers; but in the more elevated and undulating sections, the climate is salubrious and healthy.

The principal rivers are the Potomac, Susquehannah, Patuxent, Patapsco, and the Severn, which fall into Chesapeake Bay on the W. side. On the E. side are Chester, Choptank and Nanticoke rs.

The N. half of Chesapeake Bay penetrates far into the interior, dividing the State into two sections, called the Eastern and Western shores. The principal islands are Kent island, the Tangier islands, and Assatigues island.

The chief towns are Baltimore, the commercial metropolis, Annapolis, and Fredericktown.

Maryland, though not called a manufacturing State, contains numerous manufactories of cotton, wool, copper, and iron-rolling and flouring mills. Flour is the great staple of the State; and tobacco is also produced in considerable quantities.

Washington College, at Chestertown, was instituted in 1782; St. John's College, at Annapolis, was founded in 1784. The Medical College was founded in Baltimore, 1807, and in 1812, was chartered as the "University of Maryland"—having added to it the faculties of Law and Divinity. St. Mary's College at Baltimore, a Catholic institution, was founded in 1799. The College at Mt. St. Mary, near Emmitsburg, also Catholic, was founded in 1830.

Population at various periods: In 1660, 12,000; 1701, 25,000; 1755, 108,000.

Year.	Whites.	Col'd.	Slaves.	Total.
1790	208,647	8,043	103,056	319,728
1800	221,998	19,987	108,554	348,824
1810	235,117	33,927	111,502	380,546
1820	260,222	39,730	107,398	407,350
1830	291,093	52,912	102,878	446,913

Internal Improvements.—Two of the most important improvements in the U. States have been undertaken in Maryland. The *Chesapeake & Ohio Canal*, and the *Baltimore & Ohio Rail Road*.

The *Chesapeake & Ohio Canal* was chartered by Virginia in 1824, confirmed by Maryland and Congress, 1825, and commenced in 1828. It is to extend from the Potomac, near Georgetown, to Cumberland on the Potomac; thence by Wills cr. Youghiogeny and Monongahela rs. to Pittsburg. Length 341½ m. Distance from Georgetown to the Pennsylvania State line, 189 m. The original estimate of cost was \$22,375,000. A later estimate is \$9,347,408. The State of Maryland subscribes \$3,000,000 for the work, and the U. States Government \$1,000,000.

The whole lockage required will be 3,215 feet. The locks are to be 100 feet by 15. Breadth of the canal at the surface of the water, from 60 to 80 feet; at the bottom, 50 feet; depth from 6 to 7 feet. A tunnel is required through the Alleghany mountains, at the summit level, 4 m. and 80 yards in length.

Port Deposit Canal, 10 m. long, along the E. bank of the Susquehannah r. extends from Port Deposit to the boundary of the State—designed to overcome the rapids.

The *Baltimore & Ohio Rail Road*, was incorporated in 1827, by the Legislatures of Maryland, Virginia, and Pennsylvania, commenced July 4, 1828—to extend from Baltimore to the Ohio river, about 360 m. \$3,000,000 of the stock have been subscribed by the State of Maryland, and \$3,000,000 by the city of Baltimore. A considerable portion of the road is completed and in operation.

The *Baltimore & Port Deposit R. Road*, originally designed to connect with the Oxford and Columbia rail roads to Philadelphia extends from Baltimore to Havre de Grace, 5 m. below Port Deposit; and from Baltimore 34½ m. From a point opposite to Havre de Grace, the Wilmington & Susquehanna rail road continues the route to the line between Delaware and Pennsylvania. Thence the Philadelphia & Baltimore rail road completes the communication to Philadelphia. The whole distance by this route is 93 m. The route by way of the Oxford & Columbia rail roads, would be 118 m. The Oxford rail road is for the present suspended.

The *Baltimore & Washington Rail Road*, 40 m. long, was completed in 1835.

The *Baltimore & Susquehanna Rail Road*, to extend from Baltimore to York, Pa. 59½ m. was begun in 1830, and considerable progress has been made in the sections within the State of Maryland.

MASSABESICK Pond, Rockingham co. N. H. 6 m. long.

MASSACHUSETTS, one of the United States, is bounded N. by Vermont and New Hampshire, E. by the Atlantic Ocean, S. by Rhode Island and Connecticut, and W. by New York. Mean length from E. to W. 140 m.—mean breadth about 75 m. Area about 8,000 square m.

Although Cabot, when he discovered North America in 1497, sailed along the coast of Massachusetts, yet no regular discovery was made until 1602, when Bartholomew Gosnold explored Cape Cod and Buzzard's Bay. Capt. Smith, in 1614, explored the whole coast of Maine and Massachusetts, to the S. extremity of the bay. The flourishing descriptions he gave of the country induced Charles I. then Prince Charles, to call it New England. No regular settlement, however, was made until December 22d, 1620, when the Puritans, to the number of 101, emigrated to America on account of their persecutions in England. They landed at Plymouth, and established a republican form of government, on the principles of virtue and intelligence. Every child in the community was to be instructed. Religion was an object of special care with the colonists, which extended even to the privilege of voting being confined to the church members. Other settlements were soon made along the coast. Salem was founded in 1627, and Boston in 1630. The hardships and dangers of the early settlers were very great. The first general court, consisting of 24 representatives from the different settlements, was held in 1634. Previous to this, all the freemen assembled from time to time for the transaction of public business. Trial by jury was now established. In 1643, a union took place between all the New England colonies. In 1664, the province of Maine placed itself under the protection of Massachusetts. The colonists suffered much in a war with Philip, which broke out in

1675. The colony of Massachusetts Bay and that of Plymouth, or the Old Colony, were united by a royal charter in 1692. The governors were appointed by the king of England, who exercised the power also of annulling the colonial laws. This was the general condition of the colony until the revolution, in 1776, in which Massachusetts took a foremost and active part. A state constitution was formed in 1780, which was revised in 1820, and again revised and ratified in Nov. 1836. A serious insurrection broke out in the state in 1786, under Shays, which was not quelled without great difficulty by the troops and militia under Generals Lincoln and Shepard.

The general surface of the country is somewhat rough and uneven, without any very considerable mountains. The Green Mountain range of Vermont enters the W. part of Massachusetts, which are here called the Hoosac and Tagkannuc ridges. Of the latter, the highest elevation is Saddle Mountain, in the N. part, near 4,000 feet high; and Tagkannuc Mountain, 2,800 feet high. The Hoosac range is less elevated, and divides the branches of the Hoosac and Housatonic rs. The other highest elevations are Wachusett Mountain, in Worcester co.; Mount Holyoke and Mount Tom, in Hampshire co. and Mount Toby, in Franklin co.

The chief rivers are the Connecticut and its tributaries, Westfield, Deerfield, Millers and Chicopee rs.; the Merrimac, Housatonic, Hoosac, Quinnebaug, Pawtucket, Charles, Concord, Taunton and Nashua rs. Of these, only two afford much facility for navigation.

The principal bays are Massachusetts, Cape Cod, Buzzards, Boston, Barnstable and Plymouth Bays.

The principal islands are Nantucket, Martha's Vineyard and Elizabeth Islands. The prominent capes are Cape Cod, Cape Ann and Nahant.

The winters are occasionally severe, but less so than formerly. Early in the spring, the NE. winds are cold and disagreeable, but the weather in May and during the summer becomes settled, mild and agreeable. The country assumes a rich and beautiful appearance, the air is pure and healthy, and art and nature seem to vie in rendering the whole face of things delightful to the eye.

The middle and western sections of the state contain many beautiful, fertile tracts, in a high state of cultivation. In the southern and eastern parts the soil is lighter, and on the coast there are occasional marshy and barren tracts.

The commerce of Massachusetts is extensive, and second only to that of New York. Much of the shipping is employed in the mackerel, cod and whale fisheries. The whale fishery is carried on chiefly from Nantucket and New Bedford. This adventurous business has been justly considered as a nursery of skilful and enterprising seamen.

This state is distinguished for her manufactures of every description. The most considerable are those of cotton, woollens, boots and shoes, leather, cordage, wrought and cast iron, nails, hats, straw bonnets, glass, paper, oil and salt. The most extensive manufactories are situated in Lowell, Waltham, Taunton, Fall River and Amesbury.

The principal towns are Boston, Salem, New Bedford, Gloucester, Nantucket, Springfield, Lowell, Newburyport, Lynn, Marblehead, Plymouth, Worcester, Fall River, Northampton and Haverhill.

Massachusetts contains many excellent literary institutions, among which are Harvard University, at Cambridge, founded in 1638, principally from a donation of John Harvard; Williams College, at Williamstown, founded in 1755; Amherst College, near Northampton, founded in 1821; the Theological Seminary at Andover, founded in 1807. Besides these, there are numerous highly respectable incorporated academies in the state.

Common school instruction is also liberally provided for all the children in the state. The amount raised by tax in the towns for common schools, according to the report of 1837, was \$391,993; by voluntary contribution, \$47,593; paid for tuition in private schools and academies, \$326,642: total, \$766,228. Sum apportioned by law from the school fund, \$19,002.

According to the revision of the constitution in 1836, the number of representatives in the Legislature is reduced from 634 to 417. Each town or city having 300 ratable polls, may elect one representative, and for every 450 in addition to the first 300, one representative more. Formerly one representative was chosen for every 150 ratable polls, and one for every additional 225.

Population at various periods: In 1790, 96,540; 1800, 422,845; 1810, 472,040; 1820, 523,287; 1830, 610,408; and in 1837, 701,331.

According to the returns of March, 1837, the number of paupers the preceding year was 5,580, of which 3,720 were born in Massachusetts, 633 in other states, and 1,192 in foreign countries.

Valuation of taxable property in 1830, \$208,360,407.

Internal Improvements.—The *Middlesex Canal* extends from Boston harbor to the Merrimac r. 2 m. above Lowell, 27 m. long—completed in 1808; cost \$528,000. This was the first canal of any magnitude undertaken in the United States.

Hampshire & Hampden Canal, is a continuation of Farmington Canal, from the Connecticut line to Northampton, 22 m. Whole extent from New Haven, 76 m.

Blackstone Canal, extends from Worcester to Providence, R. I. 45 m.—completed in 1828; cost \$600,000.

Montague Canal, 3 m. long, was constructed to pass the falls in the town of Montague; and a canal 2 m. long to pass the falls at South Hadley.

The *Quincy Rail Road*, the first in the United States, 3 m. long, was finished in 1827.

Boston & Lowell Rail Road, incorporated in 1830, was opened in 1835—26 m. long; cost \$1,505,645.

Andover & Haverhill Rail Road, 15½ m. long—was opened in 1837.

Nashua & Lowell Rail Road, to extend to Nashua, N. H. incorporated in 1836; proposed to be extended to Concord, N. H.

Boston & Providence Rail Road, incorporated in 1831, was opened in June, 1835, 41 m. long; cost \$1,650,000. There is a branch to Dedham, 2½ m. long, and a branch to Taunton, 11 m. long, uniting with the Boston & Providence Rail Road at Mansfield—opened in 1836.

New York, Providence & Boston Rail Road, extends from Providence to Stonington, Ct. 47 m. It is proposed to connect this line with the Long Island Rail Road, 98 m. long, by means of a ferry across the sound, from Stonington to Greenport, making the whole distance from Boston to New York by this line 211 m.

Boston & Worcester Rail Road, incorporated 1831, and opened July 4, 1835—44 m. long; cost \$1,577,516.

Worcester & Norwich Rail Road, incorporated 1832, 59 m. long. Whole distance from Boston to Norwich by the two rail roads, 103 m.

The *Western Rail Road*, incorporated in 1833—capital stock, \$3,000,000, of which the state took \$1,000,000—to extend from Worcester to the Connecticut r. at Springfield, 54½ m.; thence to the New York state line, 62½ m.—total, 117 m.—where it is to unite with rail roads leading to Albany, Hudson and Troy. A continued line will then be completed from

Boston to Utica, and from thence in a few years to Buffalo.

The *Eastern Rail Road*, from Boston to Salem; to extend thence to Newburyport and Portsmouth, N. H. from which it is contemplated to carry it to Portland and Bangor, Me. Incorporated in 1836.

Mount Hope Rail Road was incorporated in 1836—proposed to extend from Taunton to Somerset.

MASSACHUSETTS Bay, lies between Cape Ann and Cape Cod, and is about 40 m. long. Within this bay is Boston Bay, and the harbors of Boston, Dorchester, Quincy and Hingham, and numerous islands.

MEXICO, Gulf of, a large inland sea, bounded, generally, N. by the U. S. South by Cuba, and W. by Mexico. Its greatest length E. & W. is about 950 m. by 600: area, about 600,000 square miles. It receives a current through the Cuba channel, and discharges through the Florida channel into the Atlantic. This Gulf is remarkable for its depth, and for affording so few good harbors along such an extensive coast.

MEXICO, p. o. Crawford co. O.

MEXICO, p. o. Miami co. Ia.

MEYER'S Mills, p. o. Somerset co. Pa.

MIAMI County, W. part of O. watered by Gt. Miami r. and other streams. The Miami Canal also passes through it. The soil is fertile, and generally under cultivation. Pop. 1830, 12,806.

MIAMI R. Great, a large stream, rising in Hardin co. O. flowing SW. until it falls into the Ohio r. in the SW. corner of the state. It is over 100 m. long, and near 200 yards wide at the mouth. Its waters flow rapidly, which renders navigation difficult.

MIAMI R. Little. (See Little Miami.)

MICCOSUKEE, p. o. Leon co. Flor.

MICHAELSVILLE, v. Harford co. Md.

MICHIGAN, one of the United States, bounded N. by Lake Superior, E. by Lake Huron, and rivers St. Clair & Detroit, which separate it from Upper Canada and Lake Erie; S. by Ohio and Indiana, and W. by Lake Michigan and Montreal r. Greatest length from N. to S. 280 m. Greatest breadth, 180 m. Area about 40,000 square m.

The earliest settlements in Michigan

were made by the French, from Canada, at Detroit, in 1670; but little increase was made in the number of its inhabitants for the next century. The United States did not obtain actual possession of the country until 1796. A territorial government was established in 1805. During the war of 1812, the country was overrun by the British troops, and recovered by Gen. Harrison the following year. Since that period, and especially in late years, the increase of population has been rapid beyond all anticipation. On the 11th May, 1835, a convention assembled at Detroit, to form a constitution for the state, which was ratified in October; and on the 26th of January, 1837, Michigan was admitted into the Union, by an act of Congress.

The surface of the country is generally level, gently inclining E. & W. presenting but few elevations. A ridge of table land in the centre of the state divides the streams which flow into Lake Michigan from those which flow into Lakes Huron, St. Clair, and Erie.

The climate is mild and pleasant, but frequently subject to extremes of heat and cold. The winters are less severe than formerly, except in the northern parts.

The soil is exceedingly fertile—producing wheat, corn, and other grain, and grass in great abundance. A considerable portion of the country is rich prairie, interspersed with belts of beautiful woodland. On the E. shore of Lake Michigan are ranges of sand hills, which rise from 100 to 300 feet high—blown up by the prevailing west winds. The country abounds with streams and small lakes.

The principal rivers are Grand r. St. Josephs, Kalamazoo, Raisin, Huron, Saginaw, Maskegon, Flint, Pent Water, Tittibawasse, and Monistic.

The principal towns are Detroit, the capital, Monroe, Tecumseh, Brownstown, Ann Arbour, Ypsilante, Pontiac, and Dexter.

An act was passed on the 18th March, 1837, to establish the University of Michigan, to consist of three departments: 1. The department of literature, science, and the arts; 2. Law; 3. Medicine; and to have 26 professorships. The government to be invested in a board of regents, consisting of 12 members. The lands constituting the funds of the university, are estimated at \$921,000.

An act has been passed for a geological survey of the state, under Dr. Houghton, and \$29,000 appropriated for that purpose.

The legislature have also organized a system of common school instruction. A valuable provision was made by congress,

by which a section of land in each township is reserved for the support of primary schools. These lands are estimated at \$3,520,000.

Internal Improvements. A number of important rail roads have been projected, and incorporated, some of which have been commenced. In March, 1837, an act was passed establishing a system of internal improvement, under the direction of a board of commissioners, and a loan of \$5,000,000 was authorized.

The board was directed to cause surveys to be made of the three following rail roads across the state:

1. The *Central Rail Road*, to extend from Detroit to the mouth of St. Josephs r.

2. The *Southern Rail Road*, to extend from the navigable waters of the river Raisin to New Buffalo, *via* Monroe.

3. The *Northern Rail Road*, to extend from Palma, or the mouth of Black r. to the navigable waters of Grand r. or to L. Michigan.

The following rail roads have been projected by incorporated companies:

The *Gibraltar & Clinton Rail Road*. Capital, \$400,000.

The *Detroit & Shiawassee Rail Road*. Capital, \$500,000.

The *Detroit & Maumee Rail Road*, to extend from Detroit to the river Maumee. Capital, \$500,000.

The *Toledo & Kalamazoo Rail Road*, to extend from the Toledo to the mouth of the Kalamazoo.

Many other rail roads and canals have been projected.

The legislature, in 1838, made appropriations for internal improvements to the amount of \$1,050,000, as follows:

For the Southern Rail Road,	\$350,000
“ Central Rail Road,	350,000
“ Northern Rail Road,	60,000
“ Clinton & Kalamazoo Canal,	205,000
“ Saginaw Canal,	47,000
“ Improvement of Maple & Grand Rivers,	30,000
“ Improvement of Kalamazoo River,	8,000

MICHIGAN, t. Clinton co. Ia.

MICHIGAN City, v. Laporte co. Ia. pleasantly situated on Lake Michigan, and advantageously situated for business.

MICHIGAN, Lake, one of the five large lakes, and the only one entirely within the territory of the U. States. Its entire length is 320 m.—average breadth, 60 m. Area about 19,000 square m. It discharges its waters into Lake Huron through the straits of Michilimackinac. Green Bay is connected with this lake on

the NW. On the N. part are several islands, the principal of which are the Beaver and the Fox Islands. The lake abounds with fish, and is navigable for vessels of any size.

MICHIGANTOWN, v. Clinton co. Ia.

MICHILIMACKINAC County, in the NW. part of Mich.

MICHILIMACKINAC Island and Straits, between Lake Michigan and Lake Huron. A fort is built upon the island, called sometimes Fort Mackinac.

MISSISSINEWA, a fine river, which rises in O. and flows W. into the N. part of Ia. and unites with the Wabash.

MISSISSIPPI, v. on the E. side of Mississippi r. Grant co. Wis. T.

MISSISSIPPI, one of the United States, is bounded N. by Tennessee, E. by Alabama, S. by Louisiana and Lake Borgne, and W. by Louisiana and Arkansas. Greatest length, 320 m. greatest breadth, 160 m. Area, 42,600 square miles.

A settlement was made at Natchez, in this state, by the French, in 1716, who built a fort there. But as the territory was long in dispute between the French and the Spanish, and afterwards between the French and the English, further settlements were retarded for many years. Great difficulties were experienced with the Indians, who, in 1729, massacred all the French at this post, including both sexes, several hundred in number. The Indians were soon after entirely subdued. The whole country, in 1763, was ceded, as part of

Florida, by the French to Great Britain. The territory, in 1781, again fell into possession of Spain, by whom it was ceded to the United States in 1798. It was organized as a territory, including Alabama; and in December, 1817, was admitted into the Union as a state.

The surface of the country in the S. part is level, with some moderate elevations in the SW. In the N. it is gently undulating. A portion of the state is composed of pine barrens. The soil in the S. part is thin, and in the neighborhood of the Mississippi it is generally inundated by the overflowing of the river. In the N. parts the soil is very fertile.

The climate is unhealthy in the low and swampy lands, and in the S. parts of the state, in the summer season. There are no winters; but ice is sometimes seen in the N. parts.

The principal rivers are the Mississippi, Pascagoula, Pearl, Yazoo, Big Black, and branches of the Tombebee.

The chief towns are Natchez, Monticello, Warrenton, Vicksburg, and Jackson, the capital.

The northern part of the state was occupied until recently, by the Chickasaw and Choctaw Indians, which is now all organized into counties. The state contains in all 56 counties.

There are three colleges—Jefferson College, at Washington, near Natchez, founded in 1802; Oakland College, founded in 1831; and Mississippi College, at Clinton, founded in 1830. There are also several very respectable academies.

According to a return made in 1837, there were cultivated in 1836, 1,048,530 acres of land; and in the same year, 317,783 bales of cotton were produced. Population in 1816, 45,929; 1820, 75,448; 1830, 136,806; 1837, 308,744, of which 164,393 were slaves.

Internal Improvements:—*Mississippi Rail Road*, incorporated 1836, to extend from Natchez to Canton, 150 m.—cost estimated at \$3,000,000.

Vicksburg & Clinton Rail Road, 54 m. long.

West Feliciana Rail Road, incorporated 1836, to extend from Woodville to St. Francisville, 38 m.

Jackson & Brandon Rail Road, incorporated in 1836, 14 miles long—cost \$250,000.

Grand Gulf & Port Gibson Rail Road, incorporated in 1836, 7 m. long.

Lake Washington & Deer Creek Rail Road, to extend from Princeton to Deer cr.—incorporated in 1836,—length 20 m.

Mississippi & Alabama Rail Road, in-

incorporated in 1836, to extend from Brandon to Mobile.

New Orleans & Nashville Rail Road, designed to extend from New Orleans to Nashville, 564 m.—will pass through this state—incorporated by Mississippi in 1837.

Natchez & Woodville Rail Road, a proposed branch of the Mississippi Rail Road—41 m.

Several other rail roads have been incorporated and projected.

MISSISSIPPI County, in the NE. part of Ark. recently organized. It has St. Francis r. on the W. and Mississippi r. on the E. Surface generally low. Pop. 1835, 600.

MISSISSIPPI R. for the extent of its basin and commercial importance, and its large and numerous tributaries, may be justly considered the most important river in the world. Its extreme source, as discovered by Schoolcraft in 1832, is Itasca Lake, a little SW. of Cass Lake, 3,160 m. from its mouth, and 1,500 feet above the level of the sea. The r. is navigable to the Falls of St. Anthony. From these falls to the mouth of the Missouri, the current averages about 2 m. an hour; below this it varies from 2 to 4 m. an hour. The navigation is considerably obstructed by sawyers and snags. The sawyers are large trees which have been swept into the current by the floods and the falling banks; their roots are at the bottom, and their tops at the surface of the water. Snags are trees which are fast on the bottom of the river, and are dangerous at low water. Many of these obstructions have been removed by government. Steam boats ascend the river, with full cargoes, at the rate of 7 or 8 m. an hour. They reach Louisville from New Orleans, a distance of about 1,600 m. in 8 or 10 days. Formerly, the time occupied in ascending the river with keel boats, to the mouth of the Ohio, 960 m. was from 7 to 8 weeks, and frequently longer. The ascending navigation is now entirely confined to steam boats, which has changed the whole aspect of business in the west. The first steam boat on the Mississippi was built at Pittsburg, in 1811. This noble stream is now the channel for a great portion of the trade of the eight states upon its borders and its tributaries.

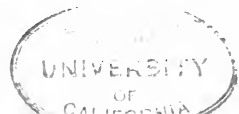

At the mouth of the Missouri, the Mississippi is a mile and a half wide. Below this, to the mouth of the Ohio, the average width is three quarters of a mile. Its average width thence to its mouth, does not exceed one mile. The annual flood above the mouth of the Missouri com-

mences generally in March, and subsides about the last of May. Its medium height is 15 feet. Below the mouth of the Ohio, the medial height is 50 feet; the highest rise, 60. At Baton Rouge it is about 30 feet, and at N. Orleans, 12. During the flood the river, below the Ohio, overflows its banks in many places for 20 or 30 miles. The plantations of Louisiana are protected by levees thrown up on the banks of the river, principally between Baton Rouge and New Orleans. It is a remarkable circumstance, that, notwithstanding the numerous large rivers which pour their waters into the Mississippi, its width is rather diminished than increased below the mouth of the Missouri. Its peaceful waters, however, are changed into a more turbid and violent current, and its channel is considerably deeper. At Donaldsonville it is about 120 to 130 feet deep, and at New Orleans about 100 feet. At low water, above the mouth of the Ohio, the channel is about 6 or 7 feet deep, and above the mouth of the Missouri, to the Des Moines rapids, it is about 4 or 5 feet.

The principal tributaries of the Mississippi, are the St. Peters, St. Croix, Chippewa, Wisconsin, Des Moines, Illinois, Missouri, Ohio, St. Francis, White, Arkansas, and Red rivers.

MISSISSIPPI, Valley of the, comprehends the vast region of country drained by the Mississippi r. and its branches, between the Alleghany and Rocky mountains—extending E. and W. from three to five thousand miles. It abounds in soil of unequalled fertility, and within the states and organized territories, is rapidly increasing in population. For a more particular description, see the notices of the several states and territories.

MISSOURI R. the main stream of the Mississippi, and in connection with that river, the longest in the world. Although the course of discovery has established the name of the Mississippi for the stream below the junction, yet the Missouri is much the longer, and is already a considerable river when it approaches and passes the sources of the Mississippi. The Missouri rises in the Rocky Mountains, in three streams, called Jefferson, Madison, and Gallatin rivers, lat. 44°. W. lon. from Washington, between 32° and 34°; and from Greenwich between 111° and 113°. The entire length of the Missouri, including the Mississippi below the junction, to the Gulf of Mexico, is 4,420 m. Length of the Missouri proper, to its mouth in the Mississippi, according to the estimate of Lewis and Clarke, 3,100 m. It is navigable from the Great Falls to the

sea, 4,392 m. The principal tributaries are the Yellow Stone, Running Water, Jacques, Platte, Kansas, Grand and Osage rivers. The springs which form the remotest sources of the Oregon or Columbia r. and the Missouri, are within one mile of each other. The Great Falls are 2,575 m. from the Mississippi, where the river descends 355 feet in 18 m. The principal falls, for grandeur and beauty, are surpassed only by Niagara. The river, which is here 840 feet wide, falls perpendicularly 96 feet. The pass through the Rocky Mountains, 110 m. above the falls, presents the wildest and sublimest scenery imaginable. The rocks rise perpendicularly on each side of the river, from 1,000 to 1,200 feet, for a distance of 6 m. The current of the Missouri is rapid, and more difficult of ascent than the Mississippi. From the Kansas to the Mississippi, it flows from 5 to 6 m. an hour; and further below it sometimes reaches 10 m. an hour. The annual floods commence in March, and the r. continues to rise and fall until July, the highest being in June. The whole course of the Missouri is within the territory of the U. States.

MISSOURI, one of the United States, is bounded N. by Iowa Territory, E. by Illinois, Kentucky and Tennessee, and S. by Arkansas. Its medium length, N. and S. is 282 m.; E. and W. 200 m.; area, about 56,400 m.

The surface of this great state presents the greatest variety of soil—from barren, swampy and rocky to extremely fertile. Much of it is rich and productive, particularly on the Missouri r. The climate is mild and salubrious.

The principal rivers are the Mississippi, which forms the E. boundary, the Missouri, Osage, Grand, Chariton, Gasconade, Big Black, Maramec and St. Francis. The chief town is St. Louis. Jefferson City is the capital.

One of the greatest peculiarities in this state is the immense lead mines, which cover an area of 3,000 square m. which have produced from 6 to 14 millions of pounds of lead annually. Coal is also found in abundance.

The principal agricultural productions are wheat, corn, rye, oats, hemp, flax and tobacco.

The principal religious denominations are Baptists, Methodists and Presbyterians. There are also a considerable number of Catholics.

Members of the Legislature are chosen for two years. The governor for four years, with a salary of \$1,500.

There are six colleges in the state, viz:

The University of St. Louis, (Cath.;) St. Mary's, (Catholic;) Marion, at New Palmyra; St. Charles, Columbia and Fayette. In Marion College there is a theological department. Provision is also made by law for common school education.

Missouri was formerly part of the great territory known by the name of Louisiana. It became a state and was admitted into the Union in 1820, after a severe struggle in Congress on the question of receiving it as a slave state.

Population at different periods:

		Slaves.
In 1810,	19,833	3,011
1820,	66,586	
1824,	80,677	10,222
1830,	140,455	25,081
1836,	244,208	40,540

Internal Improvements, projected or in progress:—A Rail Road from St. Louis to the lead mines in Washington and Franklin cos.

NANTMEAL, West, t. Chester co. Pa. Pop. 1830, 1,498.

NANTUCKET County & Island, Mas. about 12 m. E. of Martha's Vineyard, Atlantic ocean, and 20 m. S. of the main land. Its greatest length is 15 m. and greatest breadth 11 m. containing about 29,350 acres. The soil is sandy, and is without a tree of native growth upon its surface, though formerly covered with trees. This island owes its importance to the whale fishery, in which most

of its inhabitants are engaged. The climate is milder than on the main land. Nantucket shoals lie off on the SE. extending 50 m. in length, and 30 to 40 in breadth, on which many vessels have been wrecked. Pop. of the county in 1820, 7,266; in 1830, 7,202; in 1837, 9,048. Nantucket, the c. t. is the only t. in the co.

NATURAL Bridge, p. o. Jefferson co. N. Y.

- NATURAL** Bridge, v. Rockbridge co. Va.
- NATURAL** Bridge, Rockbridge co. Va. a great natural curiosity, forming a passage over a valley which cannot elsewhere be crossed for a considerable distance. The stream which flows under it is called Cedar cr. The bridge is over 200 feet high, and 60 feet in width at the top. Mr. Jefferson describes the scene as sublime beyond description. "The fissure continuing narrow, deep, and straight, for a considerable distance above and below the bridge, opens a short but very pleasing view of the North mountain on one side, and Blue Ridge on the other, at the distance each of them of about 5 m."
- NAVARINO**, v. Onondaga co. N. Y.

- NEWARK**, t. Tioga co. N. Y. Pop. 1835, 1,385.
- NEWARK**, c. t. Essex co. N. J. a beautiful and flourishing town, celebrated for its enterprise and manufacturing industry. Situated on the W. side of Passaic r. 9 m. W. of New York, and 49 m. NE. of Trenton. It contains several large and splendid public buildings and church-

es, and many elegant private dwellings. The various religious and benevolent operations of the present day are liberally sustained by the inhabitants of Newark, who are as much distinguished for their moral and religious character as for their business enterprise. The academies and private schools are highly respectable. The Union School, from its benevolent character, particularly, is creditable to its founders and all connected with it. The manufactures of Newark are noted for their excellence and skill. Large quantities are sent off constantly to the Southern markets. The Morris Canal terminates here from the W. and the rail road between Jersey City and New Brunswick passes through this place. Pop. 1830, 10,953; estimated in 1838, 14,000.

NEWARK Bay, N. J. formed by the confluence of the Passaic and Hackensack rs. and is connected with New York and Amboy bays by Staten Island Sound.

Contains 175 inhabitants.

NEW Hamburg, p. o. Dutchess co. N. Y.

NEW HAMPSHIRE, one of the United States, bounded N. by Lower Canada, E. by Maine and the Atlantic, S. by Massachusetts, and W. by Vermont. Greatest length, 175 m.—greatest breadth, 86 m. Area about 9,500 square m.

New Hampshire was discovered by Capt. Smith in 1614. In 1622 it was granted by patent to John Mason, under the name of Laconia. The first settlements were made in the following year, at Dover and Portsmouth. In 1629, all the territory, including lands purchased of the Indians by Rev. John Wheelwright, between the Merrimack and Piscataqua rs. and extending 60 m. from the sea, was called New Hampshire. In 1641, all the settlements voluntarily united themselves to Massachusetts, and composed part of the county of Norfolk. In 1679 they were made a separate province, by Charles II.

The first General Assembly convened at Portsmouth, in 1680. In 1689 it was again united to Massachusetts, and again separated in 1692. From 1702 to 1741 it was united to Massachusetts, when it became a separate government. During the revolution, it was under a temporary administration. In 1784 a new constitution was adopted, which was amended in 1792.

The surface of the state within 20 or 30 m. of the seacoast is generally level. In the N. and NW. parts it is hilly and mountainous. The White Mountains, in Coos co. are considerable elevations, and the highest in the United States. There are several elevations of this ridge between the Connecticut and Merrimack rs. the principal of which are Monadnock, Sunapee, Kearsarge, Mooselock, (or Moosehillock,) and Carrs Mountain. Moosehillock is over 4,600 feet high.

The soil generally is fertile, and particularly so along the rivers. The hills afford pasturage for immense numbers of cattle and sheep. Some of the valleys are poor, but one side or the other is mostly rich and productive. The climate is less severe than in Maine. The rivers are generally frozen in November, and the earth is covered with snow, which continues until April, and in the more elevated and uncultivated sections, until May. The summers are mild and salubrious. Epidemics are seldom known. Iron, copper, plumbago and soapstone are found in this state. Beautiful granite abounds near Concord, Hopkinton, Boscawen and other places, and has given this the appellation of the "granite state."

This state produces much excellent pine timber, which grows here very high and straight. The whole surface was originally covered with forest trees of all varieties. Grain, pork, beef, butter and cheese are produced, and much of the latter articles exported.

The principal rivers are the Connecticut, which rises in the N. of the state, the Merrimack and Piscataqua. The largest lake is the Winnepiseogee. There are some smaller lakes, such as Squam, Sunapee and Ossipee. New Hampshire has but 18 m. of sea coast, and one harbor and seaport, Portsmouth.

The principal towns are Portsmouth, Concord, Dover, Exeter and Amherst. Much of the produce of the state finds its way into Maine, from the N. and into Boston and Hartford from the S. and W. There are large manufactories at Dover, Somersworth and elsewhere, particularly of cotton and wool.

Dartmouth College was established at Hanover in 1770; Gilmanton Theological Seminary, in 1835, at Gilmanton. Phillips Academy, at Exeter, was founded in 1781. The common schools are supported in part by tax; about one hundred thousand dollars a year is thus raised, in addition to an income of 9 or \$10,000 from the Literary fund. There are about 65,000 children in the state of a fit age to attend school.

Internal Improvements.—Various canals have been made to overcome the falls in Merrimack r.—viz. Bow canal, 3 m. below Concord; Hookset canal; Amoskeag canal; Union canal, below Amoskeag falls; and a canal round Sewalls falls, at Concord.

Nashua & Lowell Rail Road, extends 15 m.—incorporated in 1836. It is proposed to continue it from Nashua to Concord.

NEW HAVEN County, in the S. part of Ct. on L. Island Sound. Surface undulating and moderately fertile. New Haven, c. t. Pop. 1820, 39,616; 1830, 43,847.

NEW Haven, city & c. t. New Haven co. and one of the capitals of the state of Ct. is situated on a plain at the head of a small bay which opens into Long Island Sound, 4 m. distant. The city is handsomely laid out in regular squares, with wide streets. On one of the squares are the college buildings, several churches,

and other edifices, which, with the beautiful elms and shade trees, have a very striking effect. This city is much admired for its chaste and elegant appearance. The state house is a splendid edifice, after the model of the Parthenon. Yale College, one of the oldest in the country, founded in 1700, is located here. There are also many very respectable male and female seminaries. The coasting trade, particularly with New York, is considerable, and steamboats daily arrive and depart. The Farmington canal terminates here, forming a connection with Connecticut r. at Northampton. Distance, -SW. from Hartford, 34 m. 76 NE. of New York. Pop. 1820, 8,326; 1830, 10,678.

NEW Jefferson, v. Harrison co. O.

NEW JERSEY, one of the United States, bounded N. by New York; E. by N. York and the Atlantic Ocean; S. by Delaware bay, and W. by Delaware r. separating it from Del. and Pa. Its greatest length N. and S. is 163 m. its mean width 50—containing 8,300 square miles.

The first settlement in N. J. was made by the Danes, in 1624, at Bergen, opposite N. Y. city. In 1627, the Swedes formed a settlement on the W. bank of the Delaware. In 1640 the English made

a settlement on the Delaware, but were driven away by the Swedes and Dutch.

In 1655, the Dutch of New York conquered the Swedes and sent them all back to Europe. In 1664, the English took possession of the country, and it was granted to Lord Berkley and Sir George Carteret, and was named New Jersey, in compliment to the latter, who had been governor of the Isle of Jersey. The Dutch afterwards reconquered the whole country, but soon restored it by treaty. In 1676, it was divided into East and West Jersey, which were reunited in 1702. In 1776 a constitution was adopted. N. Jersey was ardently attached to the principles of the revolution, and among the first to accept the new constitution of the U. States.

The S. portion of the state is level and sandy, rising towards the N. into mountainous ridges. There are many rich valleys and sections highly productive of wheat and corn, which are the staples. Iron, copper and coppers are found in various parts. An elevated range of land on the Hudson r. commences above Hoboken, and extends up the river for 20 or 30 m. forming a high perpendicular wall of stone, called the Palisadoes. The highest point is about 500 feet. The climate is mild and healthy.

The principal rivers are the Hudson on the E. and the Delaware on the W. the Raritan, Passaic, and Hackensack. Newark and Amboy are the principal bays.

The chief towns are Newark, New Brunswick, Paterson, Elizabethtown, Trenton, the state capital, Burlington, Bordentown, and Perth Amboy.

The principal manufactories are at Paterson, Newark, Trenton, and Belleville.

The Legislature consists of a Council and House of Assembly, chosen annually. The Council is composed of one member from each county, and the Assembly of three from each county. The Governor is elected annually by the legislature. His salary is \$2,000.

The College of New Jersey, at Princeton, was founded in 1746; contains 12 instructors, 2,183 alumni, 240 students, and 11,000 volumes in the two libraries. Rutgers College, at New Brunswick, was founded in 1770; has 6 instructors, 254 alumni, 93 students, and 6,500 volumes in the libraries. The Theological Seminary of the Presbyterian church, at Princeton, was founded in 1813; it has 5 professors, 130 students, and 7,000 volumes in the library. The Seminary of the Dutch

Reformed church, at New Brunswick, was founded in 1784; it has three professors, and 24 students. The system for the regulation of common schools was modified by the legislature at its session in 1837-38, but it is still considered inefficient in several particulars.

Population at several periods: in 1790, 184,139; in 1800, 211,149; in 1810, 245,562; in 1820, 277,575; and in 1830, 320,823. Deaf and Dumb, 207; blind, 205; Aliens, 3,365.

Internal Improvements.—Morris canal, incorporated 1824, completed 1836, 101 m. long; capital \$4,100,000; extends from Easton to Newark; to be continued to Jersey City. Salem canal, 4 m. long Delaware & Raritan canal, incorporated 1830, completed in 1834; 42 miles long; capital \$1,500,000.

Camden & Amboy Rail Road, incorporated 1830; capital \$1,500,000; finished, 1832; 61 m. long.

Paterson & Hudson River Rail Road incorporated in 1831; capital \$500,000; finished, 1834; 16½ m. long.

New Jersey Rail Road, from Jersey City via Newark, Elizabethtown and Rahway, 31 m. long; incorporated in 1832; finished, 1836. A number of rail roads besides the above have been surveyed, and in part progressed, but the completion of most of them is uncertain. The charters of several have become void, from the expiration of the time in which they were to be commenced.

NEW ORLEANS Parish, in the S. part of La. S. of Lake Pontchartrain. The surface is flat and marshy for the most part, with some strips a little elevated above tide along the streams. **New Orleans**, c. t. Pop. 1820, 41,351; 1830, 50,103.

NEW Orleans, city and capital of the state of La. is situated on the N. bank of a bend in the Mississippi r. 105 m. above its mouth, and 90 in a direct line. It was laid out in 1717, and named after the Duke of Orleans of France. At high water the ground on which the city stands is below the surface of the river, and is protected from inundation by a bank called the levee. The city and suburbs extend about three miles along the river, and over

one-fourth of a mile back. Owing to the spongy nature of the ground there are no cellars. The streets are narrow, and the houses are built chiefly in the French and Spanish style. Among the public buildings are a custom house, a town house, hospital, U. S. mint, cathedral, market house, a court house, an Ursuline convent, and several churches and banks. This city is the great depot of the vast and growing trade of the Mississippi r. The great region of the Mississippi Valley must ever continue to pour in its resources to augment the business and wealth of the place. The levee is constantly crowded with ships and craft of all kinds; and during the cotton season, immense quantities of bales are piled up in the streets. There are sometimes 1,500 flat bottom boats in the harbor at a time. Steamboats are constantly arriving and departing, and 50 or 60 may often be seen together. Half the population are French and Spanish. The city is subject to epidemics every summer, which sweep off many strangers;—yet the population has rapidly increased. In 1810, it contained 17,242; in 1820, 27,178; in 1830, 46,082 inhabitants. New Orleans was the capital of the colony under the Spanish until ceded to France in 1803, and by France it was given up to the United States in 1803. Distance SW. from Washington, 1,203 m. N. lat. 29° 57'; W. long. from Greenwich, 90° 6'—from Washington, 13° 5'.

NEW YORK, City & County, N. Y. 151 m. S. of Albany; 225 m. NE. from Washington; 89 m. NE. from Philadelphia; and 207 m. SW. from Boston. The city, as laid out, embraces the whole of Manhattan Island. Bounded by Hudson, East, and Harlaem rs. and Spuyten Duyvel cr. The compact built parts are confined to the S. point, formed by the junction of East and Hudson rs. The first houses were built in 1621. The bay affords one of the most beautiful harbors in the world, 9 m. long by 4 broad, with Long Island on the east, Staten Island on the south, and New Jersey on the west side, having an outlet to the ocean between Staten and Long islands, called the Narrows. The city is well protected

by forts at the Narrows and on Bedlows and Governors islands.

The city was first settled by the Dutch, in 1615, and called New Amsterdam. It came into possession of the English, in 1664, who called it New York, in honor of the Duke of York. The streets in the lower part of the city are irregular, and were formerly very narrow; but within a few years past great improvements have been made, at immense expense, in widening and straightening them. A great portion of this section has been rebuilt, with large commodious stores. The disastrous fire of Dec. 16, 1835, which destroyed property to the amount of about \$18,000,000, laid waste a large district of the most valuable part of the city, which has since been entirely rebuilt with elegant substantial fire-proof stores, with granite fronts. In the west side of the town the streets are more regular; and above Houston-street, they are regularly laid out east and west, running, north of 12th street, from river to river, up to 155th street, nearly the entire extent of the island. These are intersected with wide and beautiful avenues running north and south. Broadway, which is the principal street, is 80 feet wide and about 3 miles long; contains many splendid stores and private dwellings. It is the most public promenade for the gay and fashionable, and crowds of strangers from various parts of the world. There are several beautiful rides on the avenues and roads leading to Harlaem, Yorkville, Bloomingdale, and Manhattanville. There is a rail road to Harlaem, through Yorkville, affording a rapid and cheap conveyance at all hours. Omnibuses are constantly passing through the principal streets, from one end of the city to another.

Among the public buildings, the principal are the City Hall, Merchants' Exchange, Custom House, Hall of Justice, Astor House, Holt's Hotel, University, Columbia College, St. John's, St. Paul's, and Trinity churches, the Tabernacle, St. Patrick's Cathedral, and several other splendid church edifices, newly erected in Duane and Grand streets, Broadway and Lafayette-place. The City Hall stands on the Park, which contains an area of 11 acres. The front of the building is of white marble. It is 216 feet long, 105 broad, and 65 feet high in the centre. The Hall of Record, east of the City Hall, formerly a jail, is also a neat, chaste building. In the rear, fronting on Chambers-street, is a range of buildings 260 feet long, formerly the Almshouse, now

called the New York Institution, and occupied for various purposes. The Merchants' Exchange, now erecting, is to be a magnificent structure, much larger than the building destroyed at the great fire in 1835, occupying the entire front on Wall-street, between William and Hanover. The Custom House is a noble building of marble, on the corner of Wall, Nassau, and Pine streets. It is 177 feet long, and 89 wide. Its model is the Parthenon. The Astor Hotel is a plain massive building of granite, 201 feet on Broadway, occupying the whole front between Barclay and Vesey streets, opposite the Park, 154 feet deep, and five stories high. It contains between 300 and 400 rooms. Its height is 77 feet. The dining-room is 100 feet by 40. The University of the City of New York is a splendid building of white marble, in the Gothic or English collegiate style of architecture, fronting Washington-square. It is 180 feet by 100. The chapel in the centre receives its light from a window 24 feet wide and 50 feet high. St. John's Chapel is an elegant building, with a spire 240 feet high. An elegant park belongs to this church, occupying an entire square, opposite the church. St. Patrick's Cathedral is 120 feet long by 80 wide, and is the largest church in the city. St. Paul's Church, near the Park, is a fine building, with a spire 234 feet high. Trinity Church is one of the oldest in the city. It was first built in 1696, burned in 1776, and rebuilt in 1778. The spire is 198 feet high. The graveyard attached to the church contains, according to authentic records, 160,000 bodies, exclusive of those buried there during the revolutionary war. Holt's Hotel occupies the corner on Fulton, Pearl, and Water streets; is of marble, seven stories high. Columbia College is a fine stone building. It was established in 1754, under the name of Kings College, which it retained until the revolution. The Penitentiary is situated on Blackwells Island; an extensive stone building, the stone of which was wrought from the quarries by the convicts. The Mercantile Library Association, and the Clinton Hall Association, have a fine building on the corner of Nassau and Beekman streets. The library contains about 17,000 volumes, and is yearly increasing. The Library Association is composed of the merchants' clerks, a very enterprising body of young men. Several courses of lectures are delivered annually, on scientific and popular subjects. The Lyceum of Natural History, and the Stuyvesant Institute, have chaste and

elegant buildings on Broadway. The Lyceum has a library and museum. The N. Y. Society Library, founded in 1754, has above 20,000 volumes. It has recently been united with the Athenæum. The American Institute, incorporated in 1829, was established for the encouragement of domestic industry, in agriculture, manufactures, and the arts. The Mechanics' Institute is somewhat similar in its design. Both societies have annual exhibitions of specimens of American industry. The New York Hospital, in Broadway, opposite Pearl-street, was founded in 1771. It is supported, with its dependencies, by funds from the state, \$22,500 a year; and other incomes amounting to about \$70,000 a year. The Lunatic Asylum, at Bloomingdale, is connected with this institution. The Almshouse establishment, at Bellevue, on the East river, embraces several large and commodious buildings; and the Long Island Farms, opposite Blackwells Island, where between 600 and 700 poor children are supported and educated. The Institution of the Blind is one of the most interesting among the benevolent institutions. It was incorporated in 1831. According to the report of 1838, the whole number of pupils since the commencement was 77; of whom 64 remained. The pupils are taught music, and to read by raised letters, which they do with remarkable facility. They are instructed also in the various branches of arithmetic, geography, grammar, &c., and several of the mechanical branches, such as basket-making, carpet-weaving, &c. The state appropriated \$12,000 towards the erection of a new building, on condition that the institution would raise \$8,000; which has been done, and the building, which is to be a very elegant structure, is partly finished. The Institution for the Deaf and Dumb is also a highly meritorious charity, to which the state appropriates annually about \$17,500. The number of pupils is between 140 and 150. Its location is $3\frac{1}{2}$ miles from the City Hall, on a plat of 10 acres, 9 of which are leased from the corporation. The Hall of Justice, on centre-street, is a fine massive building, of Egyptian architecture.

Among other religious and benevolent institutions, the following deserve particular notice. The American Bible Society; American Tract Society; American Home Missionary Society; N. Y. Sunday School Union; General Protestant Episcopal Sunday School Union; N. Y. Protestant Episcopal Education and Missionary Society; Roman Catholic Be-

nevolent Society; Orphan Asylum; Education Society of the Reformed Dutch Church; Foreign Board of Missions of the Reformed Dutch Church; American and Foreign Bible Society, (Baptist;) American Baptist Home Missionary Society; Methodist Book Concern; Bible, Tract, and Sunday School Union of the Methodist Episcopal Church; American Anti-slavery Society; Roman Catholic Orphan Asylum; St. Joseph's Catholic Institution, for the relief of half orphans.

The Apprentices Library was established in 1820, by the General Society of Mechanics and Tradesmen, who have also an excellent school. The College of Physicians and Surgeons is in a flourishing state. College of Pharmacy, incorporated in 1831, to prevent impositions and errors in the preparation of medicine—a very meritorious institution.

There are four theatres, an opera house, and three principal public gardens for amusement—Niblo's, Vauxhall, and Castle gardens. The Battery, at the extreme south point of the city, is a beautiful promenade, favored with the sea breeze, and a delightful prospect of the bay. Washington Square is another public walk, adorned with shade trees. St. John's Park is not open to the public. There are several other squares, but none are open for public resort except the Park.

New York is destined to continue, as it now is, the commercial metropolis of the Union. From its central position, its proximity to the sea, and favored with a harbor that can be entered at all seasons, and an extensive inland trade by means of its rivers, canals, and rail roads, its great facilities for commerce are unrivalled in this country, and perhaps in the world. The amount of duties paid into this port for several years, is as follows:

In the year	1830,	\$15,012,553
"	1831,	20,096,136
"	1832,	15,070,124
"	1833,	13,039,181
"	1834,	10,183,152
"	1835,	14,468,116
"	1836,	17,114,305

Previous to the general banking law, passed by the legislature in 1838, the banking capital of the city amounted to \$16,611,200. Under that law, several banking associations have been established with large capitals, including a branch of the Pennsylvania Bank of the United States.

The following table exhibits the valuation of real and personal estate, and of the city taxes, for several periods:—

Date.	Valuation.	City tax.
1810	\$25,486,370	\$129,727
1820	69,530,753	270,361
1825	101,160,046	336,868
1830	125,288,518	509,178
1832	146,302,618	665,385
1833	166,491,542	971,865
1834	186,548,511	835,605
1835	218,723,703	850,000
1836	309,500,920	1,085,130

The public schools are justly the pride of the city. They are 17 in number; the buildings are large and convenient, two stories high, with a basement. There are also 28 primary schools, two African public schools, and 6 primary African schools; the whole under the management of the Public School Society, composed of some of the most respectable and benevolent individuals. The number of scholars is about 14,500; the number taught for the year ending May 1, 1837, was 17,932 scholars between the ages of 4 and 16 years. The average number in actual attendance was about 10,000; the board of trustees are between 80 and 90 in number, divided into sections, one of which is attached to each of the buildings. The annual receipts from the Commissioners of the School Fund, are from \$85,000 to \$90,000. Expenses for teachers and monitors, about \$50,000. Other expenses, including building, repairs, fixtures, fuel, stationery, &c. \$40,000. All children have the privilege of attending these schools free of charge, not as charity or free schools, but as the common right of all. The teachers are of the highest character for moral worth and mental qualification; and all the branches of English education are taught.

The city is governed by a mayor and common council, consisting of a board of aldermen, and a board of assistant aldermen. Each ward elects an alderman and an assistant. The corporation owns a large real estate, which is constantly increasing in value.

Besides the splendid lines of packets to Europe, there is now a regular line of steam packets just established between this city and England, the average passages of which are reduced to half the ordinary time of the regular packet ships; forming a new and important era in steam navigation.

The city at present is poorly supplied with water. The principal supply is from the Manhattan Works, and the wells. The corporation have erected reservoirs in 13th street, and laid pipes through the principal streets for the supply

of water to extinguish fires only. But it is now engaged in the great work of bringing the waters of the Croton r. 41 m. distant, to the city, in a stone aqueduct. The supply of the r. is estimated at from 30 millions (the minimum) to 50 millions of gallons daily. The cost of the work is estimated at \$5,412,336.

The city contained in 1656, 120 houses. In 1696, the population was 4,302; in 1771, 21,865; in 1786, 23,616; in 1790, 33,131; in 1800, 60,489; in 1810, 96,373; in 1820, 123,706; in 1825, 166,086; in 1830, 202,589; in 1835, 269,873. Paupers, 1,799. Blacks, 15,129. Deaf & dumb, 177. Blind, 106. Idiots, 34. Lunatics, 176. Voters, 43,091. Subject to military duty, 23,658.

The following is the annual number of deaths for ten years:

1827—5,118	1832—10,359
1828—5,118	1833— 5,746
1829—5,094	1834— 9,082
1830—5,537	1835— 7,033
1831—6,363	1836— 8,009

Of those who died in 1836, 5,721 were natives of the U. States; 1,378 of Ireland; 313 of England; and 213 of Germany.

There are 160 churches in the city, of which 136 have been founded since the year 1800. Of the whole number, there are 38 Presbyterian; 23 Episcopalian; 25 Methodist; 23 Baptist; 16 Dutch Reformed; 7 Catholic; and 23 churches of all the other denominations.

There are ten large and five small daily papers; nine semi-weekly, about thirty-two weekly papers, and twenty monthly and quarterly periodicals.

NEW YORK, one of the U. States, bounded N. by Lake Ontario and Canada; E. by Vermont, Massachusetts and Connecticut; S. by N. Jersey and Pennsylvania; W. by Pennsylvania, Lake Erie, and Niagara r. and N.W. by St. Lawrence r. Greatest length E. and W. excluding Long Island, 340 miles; greatest breadth N. and S. 310 m. Area, excepting the large lakes, 45,650 square m. or 29,219,636 acres.*

New York was first explored by Henry Hudson, an English navigator, in the employ of the Dutch East India Company; who in 1609, sailed 150 m. up the r. which has taken his name. Settlements were made by the Dutch in 1612, at Fort Orange, now Albany, and Fort Amsterdam, now New York; and a trade with the natives was established at these

*The Comptroller's report of 1837, gives 27,650,358 acres, which does not include the smaller lakes, &c.

places. Considerable difficulties existed between the Dutch and the English for some time, the latter disputing the claims of the Dutch to the country; which however were at length acquiesced in. The territory of the Dutch colony, though not accurately defined, was considered to extend from Fort *Goed Hoop*, on Connecticut r. to Fort Nassau, on Delaware r. In 1664, Charles II. set up anew the English claim to the whole country, from Nova Scotia to Delaware bay, and granted it to his brother, the Duke of York and Albany, and immediately despatched a fleet and took possession of it. The name of the colony was changed to New York. On the breaking out of the war between the Dutch and English in 1673, New York fell into the hands of the Dutch, but was restored to the English the next year, by treaty. It now remained a British colony until the revolution in 1776. During the wars with the French, the northern parts of the colony were the scenes of several bloody contests with the French and savages of Canada. In 1790, Vermont, which had before formed part of N. Y. was formed into a separate state.

The general surface of the state is elevated, having several great basins and valleys formed by the lakes and the large rivers. The Appalachian chain of mountains enters the state from N. Jersey and Pennsylvania, and is broken by the Hudson r. along whose shores it is called the Highlands. The Catskill mountains W. of the Hudson, the highest in the state, are from 3,000 to 3,800 feet above the tide. In the N. part of the state is another elevated region called the Peruvian mountains, among which are the sources of the Hudson. Their highest summit is near 3,000 feet.

The climate is varied by the extent of surface embraced in this state. Along the Hudson as far up as the Highlands, and in the neighborhood of N. Y. city, the climate partaking of the sea air, is milder than in the interior, the winds from the ENE. & SE. generally bringing rain. In the N. parts of the state, above the Highlands, the weather is more severe in winter, and snow lays longer. The ice in the Hudson usually breaks up about the 10th or 15th of March. The climate in the middle and western section, though a few degrees colder than in the SE. part, is considerably less so than in the elevated regions in the N. and E. parts of the state.

The soil is generally diversified. Along the valley of the Mohawk it is extremely fertile, and productive of wheat, Indian

corn, &c. but best adapted to the latter. A large district extending from Cayuga lake W. including the entire valley of Genesee r. is celebrated for the growth of wheat. Some of the finest flour is sent from this region to the N. Y. market, where it always commands a high price. The E. part of L. Island contains sandy plains; the W. part is a better soil, and highly cultivated. The principal productions of the state are wheat and other grains, beef, pork, pot and pearl ashes, butter, cheese, lumber, &c. Gypsum is abundant in the W. parts, and extensively used as a manure. Fine marble exists and is manufactured at Sing Sing. In the N. part of the state are large beds of iron ore. Gneiss, granite, limestone, and mica slate are found abundantly in the Highlands and many other parts of the state. There are many mineral springs. Those that have attained most celebrity are in the co. of Saratoga, known as the Saratoga & Ballston Springs, possessing medicinal qualities. There are also the New Lebanon and Clifton Springs, the former near the Shaker v. the other near Farmington, Ontario co. Among the natural curiosities are the Niagara Falls; Genesee Falls, on Genesee r. below Rochester, about 90 feet perpendicular; Trenton Falls, on West Canada cr.; Cohoes Falls, on the Mohawk, near the Hudson; Glens Falls, on the Hudson, 18 m. above Saratoga; Little Falls, on the Mohawk; Jessup's Falls, and Hadley

Falls, on the Hudson; and Claverack Falls, on a stream near the city of Hudson, and the sublime and picturesque cascades of the Catskill mountain.

The principal rivers are the Hudson, Mohawk, Genesee, Niagara, St. Lawrence, Black, Oswegatchie, Oswego, Saranac, and Tioga, a branch of the Susquehanna.

The principal lakes are Erie, Ontario, and Champlain, which border on the state, lakes George, Oneida, Cayuga, Seneca, Crooked, Canandaigua, and Skaneateles.

The principal cities and towns are New York, Albany, Brooklyn, Troy, Buffalo, Rochester, Utica, Schenectady, Poughkeepsie, Newburg, Hudson, Plattsburgh, Catskill, Geneva, Syracuse, Canandaigua, Auburn, Lockport, Lansingburgh, Ithaca, Skaneateles, and Penn Yan.

The commerce of the state principally centres at N. York city, which is the great seaport of the Union. The situation of the state is admirably adapted for an extensive and increasing trade. Its noble river, the Hudson, connected as it is with lakes Champlain and Erie, by canals, must continually pour in the vast resources not only of the interior and N. part of the state, but of the great and growing states of the west.

The following table will best exhibit the general statistics of the state, including the number of manufactories of the various kinds, and their increase or decrease in 10 years, from 1825 to 1835.

	1825.	1835.	Increase.	Decrease.	Value of material.	Value of produce.
Total population,	1,616,458	2,174,517	558,059			
Males,	822,897	1,102,658	279,761			
Females,	793,559	1,071,859	278,298			
Militia,	180,645	201,901	21,256			
Electors,	296,132	422,034	125,902			
Aliens, 1830,	40,430	82,319	41,889			
Paupers,	5,610	6,281	1,221			
Col'd persons not taxed,	38,770	42,836	3,066			
Do. taxed,	931	934	3			
Do. voters,	298	570	290

The year preceding 1835, there were 24,175,357 yards of cotton cloth, and 6,626,058 yards of woollen cloth manufactured, as given in the same returns. The above table shows that the number of acres improved within the preceding ten years is 2,399,378; the whole quantity returned as improved is about one-third the area of the whole state. But the number of acres under actual cultivation is probably not over one-fifth. The number of inhabitants to the square mile is about 47 62-100. In 1825, there were about 37 inhabitants to the square mile. The number of cattle of every description has increased in ten years 1,399,628. The decrease in domestic cotton and woollen manufactures is attributed to the increase of these manufactures in the country generally, and the reduced prices at which they can be purchased.

It is exceedingly gratifying to notice the decreased number of *distilleries*, from 2,129 in 1825 to 693 in 1835—being a decrease of 1,413 in ten years, or 141 yearly. This evidence of moral improvement is undoubtedly to be attributed to the salutary influence of the temperance reformation.

The following table exhibits the population at the different periods when a census was taken. In 1700 it was estimated at 30,000; in 1775 at 238,000 inhabitants. No census was taken before 1790.

Year.	Total.	Slaves.
1790,	340,120	21,325
1800,	586,050	20,613
1810,	959,049	15,017

Tompkins,	36,545	38,008
Ulster,	36,550	39,960
Warren,	11,796	12,034
Washington,	42,635	39,326
Wayne,	33,643	37,788
Westchester,	36,456	38,790
Yates,	19,009	19,796
Total,	1,919,132	2,174,517

The assessed value of real and personal estate in 1836, was \$672,372,484. The amount of county taxes for 1836 was \$768,426; the amount of town taxes, \$1,734,037: total, \$2,502,463—being a small fraction less than 40 cents on \$100.

The state of New York, while making such rapid advances in the improvement of her physical condition, has not neglected to provide liberally the means of education. And nothing is now needed but a corresponding interest on the part of the people, in behalf of their colleges and schools, to give her a moral and mental elevation corresponding with her commanding destiny. The following is a list of the colleges and theological seminaries:

Columbia College, (Episcopalian,) in New York, founded in 1754. Union, in Schenectady, founded 1795. Hamilton, in Clinton, founded 1812. Hamilton Literary and Theological, (Baptist,) in Hamilton, founded 1819. Geneva, (Episcopalian,) in Geneva, founded 1823. University of New York, in New York, founded 1831. Theological Institute of the Episcopal Church, in New York, commenced operation 1819. New York Theological Seminary, in New York. Theological Seminary of Auburn, (Presbyterian,) commenced 1821. Hartwick Seminary, Otsego county, (Lutheran,) commenced 1816. Theological Seminary of the Associate Reformed Church, Newburg, commenced 1836. Nyack College, (Catholic,) 30 m. N. of New York, on the Hudson. College of Physicians and Surgeons, in New York. Geneva Medical College. Poughkeepsie Collegiate School.

In addition to these, there are in the state 64 incorporated academies, each drawing an income from the Literature Fund. The Albany Academy, and the two Albany Female Seminaries, stand deservedly high.

A department has been established in one academy in each of the eight Senate Districts, for the education of common school teachers. The number of students in these departments was, in 1835, 108; in 1836, 218; in 1837, 284; at an expense of \$3,200, or \$400 for each department.

The number of School Districts in the state, reported by the superintendent in Jan. 1838, for the year 1836, was 10,345, from 9,718 of which reports were received. The number of new districts formed during the year was 138. The schools were kept an average period of seven months. Whole number of children between the ages of 5 and 16 years, 536,882. Whole number taught, 524,188. Amount of public money distributed to the districts in 1837, \$342,811. Amount paid for teachers' wages besides public money, \$436,346. Of the public money raised in 1836, \$119,332 was received from the state and local funds, and \$216,562 was raised by tax in the several towns.

A new school law was passed April 17, 1838, appropriating an additional annual sum of \$110,000 to the common schools; also, \$55,000 annually for three years towards the purchase of a library in each district. Each school is required to be taught at least four months by an inspected teacher.

The following abstract exhibits the situation of the common schools for several periods, according to the date of the reports:

Year.	No. of Districts.	No. of children taught.	Public money received.
1816,	2,755	140,106	\$ 55,720
1820,	5,763	271,877	117,151
1825,	7,642	402,940	182,741
1830,	8,872	480,041	214,840
1835,	9,865	531,240	316,153
1836,	10,132	541,401	312,181
1837,	10,207	532,167	313,376
1838,	10,345	524,188	335,895

Paupers are supported by a tax on the inhabitants of the counties where they belong. Most of the counties are provided with poor-houses, with farms attached. The following table exhibits the number of paupers for several years, and the expense of their support:

Year.	Supported or relieved.	Ann. expense of each.	Total expense.
1830,	15,506	\$37 03	\$246,752
1831,	15,564	33 28	245,433
1833,	35,777	32 21	295,239
1834,	32,798	30 78	304,913
1835,	38,362	32 73	323,741
1836,	37,959	32 53	396,100

The value of the labor of paupers in 1836, was \$39,124. There are 6,217½ acres of land attached to the poor-houses. The value of the poor-house establishments is estimated at \$1,433,775. Of the number relieved or supported during the year, there were 6,874 foreigners; 786 lunatics; 271 idiots; and 77 deaf and dumb.

There are two state prisons, one at Mount Pleasant, or Sing Sing, the other at Auburn, each under the direction of five inspectors, who report annually to the Legislature. All convicts are kept at hard labor during the day, and are confined in separate cells at night. Such is the efficiency and economy in the management of the prisons, that the income from the labor of the convicts exceeds the expenses—so that they are no longer a burden to the state. Of 747 persons in the Auburn prison, 311 had a very poor education, and 203 were unable to read the Bible—well educated, only 12. Of the same number, 561 were intemperate before conviction, 177 were temperate drinkers, and only 9 total abstinent.

The Legislature is composed of a Senate of 32 members, who are elected for four years, eight being chosen annually, one from each senatorial district, and a House of Representatives consisting of 128 members. The pay of each member is three dollars a day. The Lieut. Governor, and President of the Senate, receives six dollars a day during the session.

The Governor is elected for two years. He receives an annual salary of \$4,000, is provided with a dwelling house, and receives for postage and other contingent expenses, \$750. His private secretary receives \$600 per annum.

The Secretary of State is also Superintendent of Schools, and receives for his services \$1,750 per annum.

The Comptroller has charge of the fiscal concerns of the state, and receives \$2,500 a year. The Canal Commissioners each receive \$2,000 a year. The Treasurer receives \$1,500, and the Deputy Secretary of State, \$1,500.

The Chancellor and Justices of the Su-

preme Court receive \$2,500 a year each. The eight Circuit Judges receive each \$1,600.

There were in 1837, (according to Williams,) attorneys and counsellors, 2,161; practising physicians and surgeons, 2,876; clergy of different denominations, 2,192.

Internal Improvements.—The successful issue of the great system of internal improvements commenced in New York about 21 years ago, has not only had influence upon her own prosperity, but upon the whole nation. The Erie Canal, one of the greatest works of the kind in the world, was commenced on the 4th July, 1817, and completed in 1825. The principal canals, except the Delaware & Hudson, have been constructed by the state. The rail roads have been undertaken by incorporated companies. The Mohawk & Hudson Rail Road was the first constructed in the state. It was commenced in 1830, and completed in 1833.

The *Erie Canal*, from Albany to Buffalo, 363 m. long. Cost \$19,255.49 per mile: total cost, \$7,143,789.

Champlain Canal, from Albany to Whitehall, including Glens Falls feeder, 79 m. Cost \$1,257,604—being \$15,520 per mile.

Oswego Canal—from Syracuse to Oswego; completed in 1828; 38 miles; cost \$565,437.

Cayuga and Seneca Canal—from Montezuma to Geneva; completed in 1828; 21 miles; cost \$236,804.

Chemung Canal—from Elmira to Seneca Lake, including feeder to Painted Post; 39 miles; cost \$331,693.

Crooked Lake Canal—from Crooked Lake to Seneca Lake; 8 miles; 27 locks; completed in 1833; cost \$19,597 per mile—total cost, \$156,776.

Chenango Canal—from Utica to Binghamton; 97 miles; cost \$2,270,605.

Total cost of the canals above enumerated, \$11,962,711—Entire length, 655 m. The depth of water is 4 feet; width at the surface, 42 feet.

Black River Canal—to extend from the Erie Canal, at Rome, to the foot of High Falls on Black river; 35 m. long, and a feeder of 11½ miles; estimated cost, \$1,068,437.

Genesee Valley Canal—to extend from Rochester to Orleans, forming a communication with the Susquehanna and Ohio rs. Length, 107 m. Feeders, 15 m. Estimated cost, \$2,002,285.

The *Delaware and Hudson Canal* extends from Kingston, on the Hudson r. to Port Jervis, on the Delaware—59 miles;

thence up the Delaware to the mouth of Lackawaxen river—24 miles; thence in Pennsylvania, to Honesdale—26 miles. Total, 109 miles; cost, \$2,231,820. A rail road, 16 miles, is connected with it.

There have been 133 rail road companies incorporated from the year 1826 to 1837, with a capital of about \$55,000,000. Many of them, it is probable, will never be constructed.

The following rail roads are completed or under way:—

Mohawk & Hudson Rail Road—16 m. long; completed in 1832.

Saratoga & Schenectady Rail Road—22 m. long; completed in 1832.

Rochester Rail Road—from Rochester to Carthage; 3 m. long; completed in 1833.

Buffalo & Black Rock Rail Road—3 m. long; completed in 1835.

Ithaca & Oswego Rail Road—29 m. long; completed in 1834.

Reusselaer & Saratoga Rail Road—from Troy to Ballston Spa; 24½ m. long; completed in 1835.

Utica & Schenectady Rail Road—77 m. long; completed in 1836.

Buffalo & Niagara Falls Rail Road—23 m. long; completed in 1836.

Harlaem Rail Road—from the Bowery, N. Y. city, to Yorkville; 4 m. long; completed in 1834.

Auburn & Syracuse Rail Road—26 m. long; commenced.

Utica & Syracuse Rail Road—50 m. long; commenced; capital, \$800,000.

The New York & Erie Rail Road, one of the largest works of the kind, was commenced in November, 1835. Capital, \$10,000,000. The lengths of the several divisions are as follow:—

From Tappan Landing on Hud-	miles.
son r. to Deer Park Gap,	73½
From Deer Park Gap to Deposit,	115
From Deposit to Hornellsville,	163½
From Hornellsville to Cuba,	37
From Cuba to inclined plane,	83
From inclined plane to Dunkirk	
or Portland,	9
	481
The distance from N. York city to	
Tappan Landing,	24
Total,	505

Catskill & Canajoharie Rail Road; incorporated in 1830; capital, \$600,000.

Brooklyn & Jamaica Rail Road; incorporated in 1832; capital, \$300,000.

Among other rail roads, companies of which have been incorporated, are the following:—

New York & Albany Rail Road; incorporated in 1832; capital, \$3,000,000.

Lake Champlain & Ogdensburg Rail Road; incorporated in 1832; capital, \$3,000,000.

Long Island Rail Road—to extend from Brooklyn to Greenport; incorporated in 1834; commenced; capital, \$1,500,000.

Utica & Susquehannah Rail Road; incorporated in 1832; capital, \$1,000,000.

Watertown & Rome Rail Road; incorporated in 1832; capital, \$1,000,000.

Lockport & Niagara Falls Rail Road; 24 m. long; incorporated in 1834; commenced; capital, \$110,000.

Bath & Crooked Lake Rail Road; incorporated in 1831; capital, \$10,000.

Geneva & Canandaigua Rail Road; incorporated in 1831; capital, \$140,000.

NIAGARA County, in the W. part of N. Y. on L. Ontario. Contains a very good soil. Lockport, c. t. Pop. 1825, 14,069; 1830, 18,485; 1835, 26,490.

NIAGARA Falls, v. Niagara co. N. Y. Pop. 560.

NIAGARA Falls, a stupendous cataract in the Niagara r. at which the waters fall perpendicularly 164 feet on the American side, and 170 feet on the Canada side. The roar of the falls is heard 15 m. and at times from 30 to 40 m. Goat Island divides the falls into two unequal parts, and is connected with the American shore by a bridge. The W. side of the falls presents an irregular arch, called the Horse-shoe Fall. A staircase is constructed from Goat Island to the rocks below, by which the spectator may approach some distance under the arch formed by the falling waters. Splendid and commodious hotels are erected in the neighborhood of the falls; which in the summer season are crowded with visitors, who come from all parts of the country to view this most sublime spectacle in the world of the kind.

NIAGARA R. in the W. part of N. Y. forming part of the boundary between N. Y. and U. Canada. It is the channel for the waters of L. Erie flowing into L. Ontario. For the first 7 m. it is from half a m. to a m. in width. The r. is divided into two channels by Grand Island, below which it is one m. in width. Its width diminishes for 3 m. to about three-quarters of a m. to the great cataract. The whole length of the r. to L. Ontario, is 35 miles; the entire fall, 336 feet.

NORTH Cape, the most SE. point of Mich. on Lake Erie.

NORTH CAROLINA, one of the United States, bounded N. by Virginia, E. by the Atlantic, S. by South Carolina and Georgia, and W. by Tennessee. Its extreme length from E. to W. (not including Cape Hatteras,) is 480 m. Its extreme breadth, N. and S. 185 m. Area about 50,000 square m.

The first attempt to colonize the Carolinas was made by the French in the reign of Charles IX. from whom the name was derived, which was defeated by the Spaniards. Sir Walter Raleigh visited the country in 1584, and in the following year another attempt to settle it was made, but

no traces of the settlers were ever after discovered, having been, in all probability, murdered by the Indians. In 1640, several settlements were made by a number of persons who left Virginia on account of religious persecutions. In 1659, a small colony from Massachusetts established themselves on the banks of Cape Fear r. and left the country in 1663. At this time other settlements were made, and the plan of government afterwards adopted by the colony embraced the scheme of the celebrated John Locke. There was an hereditary nobility, and the chief magistrate was called the Palatine. The plan was abandoned as impracticable in 1693. In 1717, the colony came under the royal government, as the other colonies were, and remained so until the revolution. In 1729 it was separated from S. Carolina, with which it had always been united. The present constitution was adopted in 1776, and amended in 1835.

The surface of the state in the E. section is an extensive plain, with considerable swamps, and generally poor land, except on the margin of the rivers, which is very fertile. In the middle section the land is more hilly, and the W. limit is marked by a range of the Appalachian system, which take the names of Yellow, Iron, Smoky and Unaka Mountains. The Blue Ridge forms a parallel range, from 15 to 35 m. E. The soil in the W. part of the state is the most fertile, and the country in general very beautiful. The climate is temperate and healthy. In the E. parts it is unhealthy in the summer season, being subject to prevailing bilious and intermittent fevers. The winters are mild and agreeable.

Immense regions of the country are covered with pitch pine, affording large quantities of tar and turpentine for export. Indian corn and other small grains are raised in considerable quantities. Cotton, rice and tobacco are also produced. There are very few harbors on the coast, and much of the trade finds its way into Virginia and South Carolina. Lumber, grain, flour and provisions are articles of export.

Iron ore abounds in many parts of the state, but very little is done in manufacturing it. The gold mines have attracted great attention. The gold region embraces about 1,000 square miles. Part of the gold is obtained by mining, and part by washing the sand and gravel found in the gullies and beds of creeks. In 1824, this state furnished for the U. S. mint, gold to the value of \$5,000; in 1825, \$17,000; in 1829, \$134,000; in 1832, \$458,000;

in 1834, \$380,000; in 1835, \$263,500; in 1836, \$148,100: total amount to 1836, \$2,465,000—besides which, large quantities have been exported and otherwise disposed of. Since 1833 the quantity has annually decreased.

There are a number of cotton manufactories, which are rapidly increasing. The first in the state was established in 1818, at the falls of Tar r. in Edgecombe co.

The principal rivers of the state are the Roanoke, Chowan, Cape Fear, Pamlico, Tar, Neuse and Yadkin.

The chief towns are Newbern, Fayetteville, Wilmington, and Raleigh, the seat of government.

The principal sounds and bays are Pamlico Sound and Albemarle Sound, and Onslow and Raleigh bays. The prominent capes are Fear, Lookout and Hatteras.

The Legislature is composed of a Senate of 50 members, and a House of Commons of 120 representatives, who are chosen for two years. The Legislature meets biennially. The governor is also chosen for two years, and cannot hold his office more than four years out of any term of six years. His salary is \$2,000.

There is a literary fund for the support of common schools, consisting of swamp lands, estimated at 1,500,000 acres, valued at \$1,000,000, to which has been added from the U. S. surplus fund, \$1,000,000, and the future dividends from works of internal improvement.

The colleges in the state are, the University of North Carolina, at Chapel Hill, founded in 1791, containing 8 instructors, 130 students, and 5,000 volumes in the library. Davidson College, at Mecklenburg, founded in 1837. Besides these, there are the Episcopal School at Raleigh; Manual Labor School at Fayetteville; Manual Labor School at Wake Forest, and the Female Seminary at Salem.

The population in 1790 was 393,950; in 1800, 478,103; in 1810, 555,500; in 1820, 638,829; in 1830, 737,987, of whom 245,601 were slaves.

Internal Improvement.—The Dismal Swamp Canal lies partly in Virginia and partly in North Carolina. Cost \$879,864.

Lake Drummond Canal is a navigable feeder of the Dismal Swamp Canal, 5 m. long.

Northwest Canal connects Northwest r. with Dismal Swamp Canal—6 m. long.

Weldon Canal, round the falls of Roanoke, 12 m. long, is the commencement of the Roanoke navigation, which is to extend to Salem, Va. 232 m.

Fayetteville and Western Rail Road.

to extend from Fayetteville to the Yadkin r. near the Narrows. \$400,000 of the U. S. surplus fund has been appropriated to this work.

Wilmington and Raleigh Rail Road, to extend from Weldon, on the Roanoke, at the Portsmouth and Roanoke Rail Road, to Wilmington—170 m. \$500,000 of the U. S. surplus fund has been appropriated to this rail road. Estimated cost, \$1,500,000.

Raleigh and Gaston Rail Road, uniting with the Petersburg Rail Road at Gaston—86 m. long. Incorporated 1835.

The Louisville, Cincinnati and Charleston Rail Road will cross the W. part of the state.

The Petersburg and Roanoke, and the Portsmouth and Roanoke Rail Roads, 29 m. long, 17 of which are in this state.

Several other rail road companies have been incorporated.

In addition to the above, the state has appropriated of the U. S. surplus fund \$200,000 to draining the swamp lands.

 OHIO County, in the W. part of Ky. Hartford, c. t. Pop. 1830, 4,913.
 OHIO R. from which the state is named, is formed by the confluence of the Alleghany and Monongahela at Pittsburg, in the W. part of Pa. After a course of 908 m. it flows into the Mississippi. Its breadth varies from 400 to 1,400 yards. Below Cumberland r. its average width is over a mile. At Cincinnati it is 800 yards, which is its mean breadth. The elevation of the Ohio at Pittsburg is 678 feet, and at its junction with the Mississippi r. at low water, 283—having a fall of 395 feet in its entire length. The current of the river is gentle, and varies from two to four miles an hour. The only obstruction in general to navigation is the rapids at Louisville, where there is a canal to avoid them. The river is navigable for large steamboats half the year through its entire course. Its lowest stage is in September, and in March it is at its highest. Its depth varies at the different periods about fifty feet, and sometimes rises 10 or 12 feet in a single night. The Ohio flows through a fine, rich country, and from the beauty of the stream was called by the French discoverers "*la belle riviere*."
 OHIO, one of the United States, bounded N. by Lake Erie and the state of Michigan, E. by Pennsylvania and Virginia, S. by Virginia and Kentucky, and W. by Indiana. It is about 220 m. long by 220 broad, contains 44,000 square m. and returns 16,400,000 acres for taxation. The territory now forming the state,

was embraced in 1787 as part of the "territory northwest of the river Ohio." The first settlers were 47 emigrants, under Gen. Rufus Putnam and Rev. Menasseh Cutler, from the counties of Middlesex and Essex, Mas. who established themselves at Marietta, at the mouth of Muskingum r. on the 7th of April, 1788. The next year another settlement was made on the Ohio, 6 m. above the site of Cincinnati. The inhabitants were much exposed to hostilities from the Indians for a number of years, which were not effectually stopped until they were subdued by Gen. Wayne in 1795. From this period the settlement and prosperity of the territory have been unexampled. In 1802, it was admitted into the Union as an independent state, and in 1830 it was the fourth state in population in the Union. In 1790, the population was 3,000; in 1800, 45,365; in 1810, 230,760; in 1820, 581,434; in 1830, 935,872. Of this last number there were deaf and dumb, 426; blind, 232; free colored persons, 9,567.

The general surface of the state is remarkably level, exhibiting a moderate elevation of table land, but no mountains nor any considerable hills. The soil is very fertile, and the greater portion of the state fit for cultivation. Indian corn is raised in great abundance, and may be considered the staple. Hemp, flax and tobacco can also be raised in considerable quantities. Taken as a whole, there is no section of country in the world perhaps equally productive. Coal and iron are abundant in the eastern parts of the state. Marble is found in many places, and salt springs are numerous. The climate is generally mild, and warmer than other parts of the country in the same latitude. Except in the neighborhood of the marshes and flats, it is very healthy.

Among the curiosities are the numerous ancient mounds scattered over various parts of the state. Their origin is very uncertain. Some of them are from 40 to 70 feet high, with a level area of 40 feet diameter at the top, and a circumference at the base of 400 to 500 feet. There are also numerous ancient fortifications of a circular form.

The principal rivers are the Ohio, which forms the entire S. boundary of the state, Muskingum, Scioto, Gt. Miami, Lit. Miami, Maumee, Cuyahoga and Sandusky.

The principal cities and towns are Cincinnati, Cleveland, Zanesville, Columbus, the capital, Chillicothe, Steubenville, Dayton and Circleville.

Ohio is admirably situated for trade. Her central position, her noble rivers and

extensive lines of canals, must always secure to her enterprize a great and increasing commerce.

There are a number of large cotton and woollen manufactories, and a great quantity of domestic goods are made.

The Legislature consists of a Senate and House of Representatives. Senators are chosen for two years, and representatives annually. The governor is elected for two years. His salary is \$1,000.

Among the institutions of learning are the following:—University of Ohio, at Athens, founded 1821; has 2,000 volumes in the library. Miami University, at Oxford, founded 1824; 4,000 volumes in the library. Franklin College, at New Athens, founded 1825; 1,100 volumes in the library. Western Reserve College, at Hudson, founded 1826; 2,000 volumes in the library. Kenyon College, at Gambier, founded 1828; 2,300 volumes in the library. Granville College, at Granville, founded 1832; 3,000 vols. in the library. Marietta College, at Marietta, founded 1832; 2,500 vols. in the library. Oberlin Institute, at New Elyria; Cincinnati College; Woodward College, at Cincinnati, and Willoughby University, at Chagrin. There are theological departments in Kenyon, Granville and Western Reserve Colleges; Lane Theolog. Seminary, and a theological school at Columbus. There is also a medical college at Cincinnati.

The state has a considerable fund devoted to common school instruction. An excellent system has been established, and great efforts are being made to improve it as much as possible. The lands set apart for the school fund amount to over half a million of acres, some of which have been sold, and some let out on lease.

Internal Improvements.—The astonishing and rapid growth and prosperity of the state of Ohio, is equalled only by her magnificent works of internal improvement. It is only thirty-six years since she was admitted as a state into the Union, and now there are near 500 miles of navigable canal finished and in operation, and about 200 miles of canal and 100 miles slack water navigation under contract to be finished in 1839. There are also other canals and river improvements projected, which will soon swell the amount of inland navigation in this young state to upwards of 1,000 miles.

The Ohio Canal extends from Cleveland, on Lake Erie, to Portsmouth on the Ohio; length, 307 m.; commenced 1825, finished 1832. There is a navigable feeder to Zanesville, 14 m.; one to Columbus, 10 m.; and one to Lancaster, 9 m.

The Miami Canal, to extend from Cincinnati *via* Dayton, the valleys of St. Mary's and Auglaize rivers, to Defiance, on Maumee r. where it will unite with the Wabash and Erie Canal; is finished to St. Mary's. The distance by this route from Cincinnati to Lake Erie is 265 m.

The portion of the Wabash and Erie Canal which is in this state, is under contract. This Canal is to extend from Lafayette, on the Wabash in Indiana, to near the entrance of the Maumee r. into Lake Erie. 105 m. in Indiana, and 82 m. in Ohio—total length, 187 m.

Mahoning and Beaver Canal, to extend from the Pennsylvania Canal, at New Castle, Pa. to Akron, on the Ohio Canal. Length, 88 m. of which 77 m. are in Ohio.

Sandy Creek and Little Beaver Canal, to extend from Bolivar, on the Ohio Canal, E. to Ohio r.

Several other canal companies have been incorporated, most of which have not yet been commenced.

The following table exhibits the projected rail roads, the time incorporated, and capital of each:

Name.	When incor.	Capital.	Name.	When incor.	Capital.
Richmond & Miami,	1832		Cuyahoga & Erie,	1836	\$ 150,000
Mad River & Lake Erie,	1832		Fort Wayne & Piqua,	1836	1,000,000
Franklin & Wilmington,	1832		Little Miami,	1836	750,000

ONTARIO County, in the central part of N. York. A wealthy and productive agricultural co. All the territory W. of a line drawn N. & S. 1 m. E. of Geneva to the N. & S. & W. boundaries of the state, was formerly known as the "*Genesee Country*," and was part of the cession to Mas. and by that state sold to Gorham & Phelps, in 1787. Oliver Phelps first explored the country in the following year, and purchased 2½ millions of acres of the Indians. He established a land office at Canandaigua, in 1789, which was the first in America. Twelve counties have since been formed from Ontario. Canandaigua, c. t. Pop. 1830, 40,167; 1835, 40,870.

ONTARIO Lake, one of the five great lakes, between N. Y. and Upper Canada. It receives the waters of Lake Erie through Niagara r. on the SW. and discharges by St. Lawrence river on the NE. Its greatest length is 190 miles; greatest breadth, 50 m.; average breadth, 30 m. In addition to Niagara r. it also receives

the Genesee, Oswego, and Black rivers, and various smaller streams. The lake is never frozen over, and is of great depth, reaching in some places over 500 feet. Its mean depth is 492 feet. Its surface is 231 feet above the ocean, and 334 feet below Lake Erie. The Welland Canal connects the trade with Lake Erie. The falls, in Niagara r. and the rapids, and numerous islands and shoals in the St. Lawrence, prevent any other than artificial communication for the commerce of the lake. Oswego Canal connects its waters with the Erie Canal, and Black River Canal will afford another channel from the E. end of the lake to the Erie Canal.

OREGON City, v. Ogle co. Ill.

OREGON R. (or Columbia,) a large r. in the territory of Oregon, rising in the Rocky Mountains, and flowing into the Pacific Ocean in lat. 46° 15' N. It rises in two principal branches, the longest of which, Lewis r. rises in about lat. 40°, near Long's Peak. The N. branch is called Flat Head r. or Clark's Fork, and rises in about 46° N. lat. The Wallamut, or Multnomah, is another principal branch. Vessels of 300 tons ascend the r. as far as the Multnomah, 120 miles. Sloops may ascend to the head of tide-water, 184 miles; above this, there are rapids which interrupt the navigation. The whole length is about 1,500 miles. This river derived the name of Columbia from the ship Columbia, Capt. Gray, of

Boston, who was the first modern navigator who entered the river.

OREGON Territory, a large section, W. of the Rocky Mountains, extending from 42° to 54° N. lat. and to the Pacific Ocean on the W. containing about 300,000 square m. Besides the Rocky Mountains, there are two parallel ridges of mountains and several high peaks. The Oregon r. and its tributaries are the principal rs. The climate is mild and agreeable. The tops of the mountains are covered with perpetual snow. Much of the country is composed of extensive prairies. Pine and hemlock abound in the neighborhood of the sea shore. The soil in the valleys and along the shores of the rivers, is very fertile.

The principal articles of trade are furs, seal-skins, &c. Astoria is the principal settlement, where the Americans have a trading establishment. The country was first discovered by the Spaniards. In 1805, Lewis and Clark descended the r. and wintered on the shores of the Pacific. The Indians in the territory are estimated at 140,000.

PENNSVILLE, v. Morgan co. O.

PENNSYLVANIA, one of the United States, bounded N. by New York, E. by New Jersey, S. by Delaware, Maryland and Virginia, and W. by Virginia and Ohio. Greatest length E. and W. 305 m.—breadth, 160 m.—containing about 46,500 square m.

The territory was first settled by some Swedes in 1628, which was afterwards

broken up by the Dutch from New York, whose settlements were also in turn seized by the English. In 1681, William Penn, a Quaker, who was the son of Admiral Sir Wm. Penn, obtained a grant from Charles II. for the territory, including Delaware, and immediately commenced the settlement of it. He arrived at New Castle in 1682, and fixed the site of Philadelphia as the capital, then called Coal quanock, and laid out that city. In 1799 Delaware became a distinct colony. The settlement for 70 years was happily free from all disturbances with the Indians, which marked the early history of the other colonies. In 1718, Penn died in England, aged 74. The original charter continued until after the revolution. In 1790, a constitution was established, which continued until 1838, when a new constitution was formed.

Most of the central part of the state is mountainous. The Alleghanies, of the Appalachian chain, extend in a number of ridges in a NE. course—the nearest on the E. being about 150 to 170 miles from the sea. They are known by various names, the Kittatiny or Blue Mountains, Tuscarora Mountains, Ragged Mountains, Great Warrior Mountain, Laurel Hill and the Alleghany Mountains, which are the highest elevations. Most of these mountains are thickly covered with wood. E. and W. of the mountain ranges, the country is level or moderately undulating, and the soil fertile and productive in wheat and all kinds of grains and fruits.

The climate E. and W. of the mountains does not sensibly differ from that of other sections in the same parallels of latitude. In the mountainous regions, the winters are colder, and the snow lays longer and deeper.

The principal rivers are the Delaware, Susquehanna, Alleghany, Monongahela, Yioughiogeny, Kiskiminetas, Juniata, Schuylkill and Lehigh.

The most important towns are Philadelphia, Pittsburg, Lancaster, Reading, Harrisburg, the capital, Easton, Bethlehem, Norristown, Columbia, Doylestown and Germantown.

Pennsylvania is a great manufacturing state. The principal manufactures are in Philadelphia and Pittsburg and their neighborhoods. The most extensive are of cotton, wool, iron, glass and paper. Salt is manufactured largely from springs in the W. part of the state.

The foreign commerce of the state centres nearly altogether at Philadelphia. The value of imports is from \$12,000,000 to \$15,000,000 annually; of exports, from

\$4,000,000 to \$5,000,000; the tonnage about 100,000.

Anthracite coal abounds more extensively in this state than any other in the Union. The coal region lies principally among the mountains which run parallel to the Blue Ridge, between that ridge and the Susquehanna, and along the valleys of the Wyoming and Lackawanna. The valley of the anthracite region is about 60 miles long, and 5 to 6 broad. The coal beds vary in thickness from 3 feet to 26, and are most extensive in the vicinity of Mauch Chunk, on the Lehigh.

In the W. part of the state, bituminous coal is equally abundant. It is found along the Alleghany, Monongahela and Conemaugh rs. and elsewhere. In the neighborhood of Pittsburg it is very plentiful.

A committee of the Pennsylvania Legislature, in 1836, estimated the improvements connected with the anthracite coal trade to be, canals and rail roads, 486 miles, \$9,720,937; colliers' boats, cars, &c. \$1,270,260; capital in coal lands, \$4,900,000; mining capital and value of towns, \$3,375,000: total, \$19,166,217. The bituminous coal lands are supposed to comprehend 21,000 square miles, and the anthracite 975 square miles. The number of tons of anthracite coal shipped from the Schuylkill, Lehigh and Lackawanna mines, from 1820 to 1835, was 2,498,024.

In the bituminous coal region are also found many valuable salt springs, which, by boring, produce a strong solution.

The Legislature is composed of a Senate and House of Representatives. Senators are chosen for four years, and the representatives annually. The governor is chosen for three years, and has a salary of \$4,000.

Among the institutions of learning are the following:—University of Pennsylvania, at Philadelphia; Carlisle College; Jefferson College, at Canonsburg; Washington College; Alleghany College, at Meadville; Western University, at Pittsburg; Pennsylvania College, at Gettysburg; Lafayette College, at Easton; Haddington College; Marshall College, at Mercersburg; Medical Department in the University of Pennsylvania; Medical Department, Jefferson College, Philadelphia. Of the theological seminaries, there are—The Seminary of the Lutheran Church of the U. S. at Gettysburg; German Reformed, at York; Western Theological Seminary, at Alleghany; Theological School, at Canonsburg; Theological Seminary, at Pittsburg.

The system of common schools embraces about 3,400 district schools, 3,500 teachers, and 150,000 scholars. The whole number of children in the state between 5 and 15 is about 330,000. About \$200,000 annually of public money is appropriated to the schools. The public schools of Philadelphia are not included in the above. The state has a penitentiary at Philadelphia, and one at Pittsburg.

Population of the state, at various periods:—

	Population.	Slaves.
In 1701,	20,000	
1763,	280,000	
1790,	434,373	3,737
1800,	602,545	1,706
1810,	810,091	795
1820,	1,049,313	211
1830,	1,347,672	386

Internal Improvements.—This state has undertaken the most gigantic system of internal improvement. She has already upwards of 600 miles of state canals and 120 miles of rail roads in operation, which, with those in course of construction, will make, when completed, by the state and incorporated companies, 1,192 miles of canals, and 726 miles of rail roads—all undertaken since 1826; an achievement that would reflect honor upon the enterprise of any nation in the world.

The Pennsylvania state canals and rail roads consist of the following divisions: Columbia Rail Road, from Philadelphia to Columbia, 81½ miles; Canal—eastern division, Columbia to Hollidaysburg, 171½; Alleghany Portage Rail Road, Hollidaysburg to Johnstown, 36½; Canal—western division, Johnstown to Pittsburg, 105: total, 395 miles.

The Beaver Canal extends from Beaver to New Castle, 25 miles long.

The Mahoning and Beaver Canal is to extend from New Castle, Pa. to the Ohio Canal at Akron, O.

The Pittsburg and Erie Canal, of which the Beaver Canal is a section, is to extend from Pittsburg to Lake Erie, 73½ miles.

The following canals have been constructed by incorporated companies:—

Schuylkill, 108 miles; cost \$2,500,176.
Union Canal, 80 miles, and navigable feeders, 24 miles—total, 104 miles; cost \$2,000,000.

Lehigh, 46½ m.; 53 m. cost \$1,558,000.

Lackawaxen, 25 miles, and rail road; cost \$2,000,000.

Conestoga Navigation, 18 miles; cost \$68,540.

Codorus Navigation, 11 miles.

Rail roads constructed or commenced by incorporated companies:—

Mauch Chunk, from Mauch Chunk to the coal mines, 9 miles.

Room Run, from Mauch Chunk to the coal mines on Room Run, 5½ miles.

West Chester, from West Chester to the Columbia Rail Road, 9 miles.

Mount Carbon, 7¼ miles.

Schuylkill Valley, from Port Carbon to Tuscarora, 10 miles.

Branches, 20 miles.

Schuylkill, 13 miles.

Mill Creek, from Port Carbon to Mill cr. 7 miles.

Mine Hill and Schuylkill Haven, with branches, 20 miles.

Pine Grove, to the coal mines, 4 miles.

Little Schuylkill, from Pt. Clinton to Tamaqua, 23 miles.

Carbondale, 16½ miles.

Philadelphia and Trenton, 26¼ miles.

Philadelphia, Germantown and Norristown, 19 miles.

Philadelphia and Reading, (a continuation from Norristown,) projected—19 m.

Philadelphia and Baltimore, extending from Philadelphia to Wilmington, where it unites with the Wilmington and Susquehannah Rail Road, which is connected with the Baltimore and Port Deposit Rail Road; whole distance to Baltimore, 93 miles.

Central, from near Pottsville to Sunbury and Danville, 51½ miles.

Lackawaxen, 16¼ miles.

Beaver Meadow, 26¼ miles.

Williamsport and Elmira, 73¼ miles.

Reading and Port Clinton, 20 miles.

Lancaster and Harrisburg, 36 miles.

Harrisburg and Chambersburg, 50 m.

Strasburg, 3 miles.

Marietta and Columbia, 3 miles.

Downingtown and Norristown, 20 m.

PENN YAN, c. t. Yates co. N. Y. a flourishing village, situated about three-fourths of a mile below the foot of Crooked Lake, on the outlet, 16 m. SSW. of Geneva, 22 m. SE. of Canandaigua, 30 m. N. of Bath, 185 m. W. of Albany, and 314 m. N. of Washington City. Lying in a valley, on a fine plat of ground gently descending to the outlet, the approach to the village on every side is very beautiful. From the road on the E. particularly, the prospect is exceedingly picturesque—extending beyond the v. to the waters of the lake, with the promontory of Bluff Point rising on the W. and in the still further distance the highlands of Steuben. The singular name of the v. originated in the fact that its founders were a Pennsylvanian and a Yankee—

the first syllable of each name being united. There were then only two or three houses and a post office. The first postmaster was *Abraham Wagener, Esq.* who was the original founder, and the Pennsylvanian above mentioned.

The village contains four churches—a Presbyterian, Methodist, Baptist and Episcopalian—a new substantial courthouse, with a portico and four doric columns, a jail, a bank, with a capital of \$100,000, an academy and several select schools, two grist and two saw mills, two printing offices, and two weekly papers.

The situation of Penn Yan, in the centre of a beautiful agricultural county, with no other town in the vicinity to share its trade, ensures it a permanent and increasing prosperity. The outlet of the lake, through its entire course of 7 miles into Seneca Lake, affords a first rate water power, having a descent of 269 feet, which is used for a large number of grist, saw and fulling mills. The Crooked Lake Canal, 8 m. long, is constructed along the outlet, and affords a communication from the v. through Seneca Lake and the Cayuga & Seneca Canal, with the Erie Canal. Pop. in 1838, about 1,500.

PENNY HILL, v. Pitt co. N. C.

PENOBSCOT County, in the central part of Me. on Penobscot r. Watered by innumerable branches of the same. Bangor, c. t. Pop. 1830, 31,530; 1837, 51,694.

PENOBSCOT Indians. The remnant of that tribe live at Orono, or Oldtown, on the Penobscot r. Penobscot co. Me.

PENOBSCOT, v. Hancock co. Me. Pop. 1830, 1,271.

PENOBSCOT R. the largest in the state of Me. Its main branch rises in Somerset co. in the ridge which forms the Canada line, and flows through Chesuncook Lake; after uniting with the Mallowamkeag r. it flows S. into Penobscot Bay. It is navigated by vessels to Bangor, 50 m. Length about 150 m.

PENOBSCOT Bay, Me. at the outlet of Penobscot r. on the Atlantic. Has numerous islands. It is 30 m. long from N. to S. and 18 m. wide between the Isle of Haut and Owls Head.

PENSACOLA, city & c. t. Escambia co. Flor. 242 m. W. from Tallahassee, and 50 m. ESE. of Mobile, on a bay of the same name, with a good haven. It is an U. S. naval station, and the largest town in the territory. Pop. about 2,000.

PENSACOLA Bay, on the N. shore of the Gulf of Mexico. It is near 30 m. long, with an average width of 3 m. It

receives Escambia, Black Water and Yellow Water rs.

PENTECOST, p. o. Callaway co. Ky.

PENTECOST Mills, p. o. Jackson co. Ga.

PEORIA County, in the central part of Ill. on the W. side of Illinois r. Peoria, c. t. It is watered by the Kickapoo and other streams. Much of the land is prairie. Estimated population in 1838, 5,000.

PEORIA, c. t. Peoria co. Ill. 143 m. NW. from Vandalia. This is a very flourishing v. and has sprung up with astonishing rapidity. In 1833 it contained but 25 dwellings. It now contains five churches, a court house, 27 stores, an academy, and near 2,000 inhabitants.

PEORIA Lake, is an expansion of Illinois r. extending from Peoria NE. about 20 m.

PHILADELPHIA, t. Jefferson co. N. Y. Pop. 1830, 1,167.

PHILADELPHIA County, in the E. part of Pa. is bounded by Delaware, Montgomery and Bucks cos. and Delaware r. containing an area of about 155 square m. Besides the city of Philadelphia, the county contains several flourishing towns and settlements, viz: Germantown, Frankfort, Manayunk, Holmesburg, Bustletown, Hamilton & Mantua villages. The S. part of the co. is level, the N. part undulating and broken. Pop. 1830, city & co. 188,777.

PHILADELPHIA City, Philadelphia co. Pa. 93 m. NE. from Baltimore; 89 SW. from New York; 29½ SW. from Boston; 98 E. from Harrisburg, and 136 m. NE. from Washington City. N. lat. 39° 56' 51". W. lon. 75° 10' 05" from Greenwich. The city is handsomely laid out on the W. bank of Delaware r. extending 2 m. to the Schuylkill, about 3 m. along the Delaware, and about 5 m. above the confluence of those rivers.

Philadelphia was founded by William Penn, in 1682, and chartered in 1701. The streets of the city proper, (excluding the Liberties,) are laid out at right angles, generally about 50 feet wide—and kept remarkably clean. The houses are mostly of brick, of a neat, and many of them an elegant appearance. Among the public buildings are the United States Bank,

U. S. Mint, State House, Girard Bank, Bank of Pennsylvania, and Pennsylvania Hospital. In the vicinity are Girard's College, the Alms House, and Naval Asylum. The U. S. Bank is a beautiful marble structure, with 8 doric columns in front and 8 in the rear—built after the model of the Parthenon. The Girard College is a most magnificent building, of marble, supported on all sides by Corinthian pillars. Connected with it are two chaste and commodious buildings, also of marble. The Mint, the Exchange, Pennsylvania Bank, Girard Bank, and Masonic Hall, are also beautiful buildings. Religious, benevolent, and literary institutions are numerous. There are upwards of 100 houses for public worship. Among the charitable and benevolent institutions are the Asylums for orphans, deaf and dumb, widows and lunatics, Humane Society, and several Dispensaries. Among the literary institutions are the University, Philosophical Society, Athæneum, Franklin Institute, Academy of Natural Science, Academy of Fine Arts, Medical Society, College of Pharmacy, College of Physicians, &c. In the State House, which is now occupied by the Courts, is the Hall in which Congress sat when the Declaration of Independence was adopted. The Arcade, a beautiful building, contains the Philadelphia Museum, long known as Peale's Museum. The Market Houses in Market street, reach from Front to Eighth streets. There are several other markets in different parts of the town. They are all kept clean, and are well supplied with all kinds of farming produce. The public squares are beautifully adorned with shade trees.

One of the greatest undertakings in Philadelphia is the water works, on the Schuylkill, at Fair Mount. A dam is thrown across the river, which affords power sufficient for the machinery which forces the water into large basins on the top of the Mount, from which the city is supplied by pipes laid in every street, extending over 60 miles in length. The entire cost, including the former works, is about \$1,500,000. The expense of the works is only about \$4 a day.

Philadelphia is a very extensive manufacturing city. All the various branches of mechanic industry are carried on with great skill and perfection. Although enjoying an extensive commerce, its inland position is not so favorable in this respect as that of New York or Boston. For a considerable part of the winter the Delaware is closed with ice.

Philadelphia is distinguished for its

seminaries of education and the literary spirit of its inhabitants. Besides the public schools, which are the pride of the city, private schools are numerous and of the highest character. The Society of Friends, who form a large and highly respectable class of the inhabitants, are noted for their attention to their schools and institutions of learning and science. Their children are educated particularly in the solid and useful branches. The various benevolent operations also owe much of their active usefulness and energy to members of this society. In the Philadelphia public and primary schools there are annually taught about 12,000 scholars.

The Philadelphia Library, founded by Dr. Franklin, contains 45,000 volumes. The Philadelphia Society Library contains 10,000 volumes. There are several other very respectable libraries, and various literary institutions for mutual improvement, which have a favorable influence on the general character of its society.

Population of the city and liberties, in 1731, 12,000; in 1790, 42,520; in 1800, 70,280; in 1810, 92,247; in 1820, 108,116; in 1830, 167,811; of which the city proper contained 80,458; the northern suburbs 58,350; the southern suburbs 29,003.

- PITTSBURG, city & c. t. Alleghany co. Pa. at the junction of the Alleghany and Monongahela rs. 201 m. W. from Harrisburg, 223 NW. from Washington, 297 W. by N. from Philadelphia. This city is second only to Philadelphia in the state, and derives its importance principally from its manufactures, which are various and extensive, particularly in iron, glass, paper, cotton and wool. The country around abounds in inexhaustible quantities of bituminous coal. The large use made of this fuel gives the buildings a dark and smoky appearance, similar to the large manufacturing towns of England. The city is very favorably situated for trade and commerce. Numerous steamboats are annually built here for the western waters. The Pennsylvania state canals and rail roads centre here, and add greatly to the trade and wealth of the place. There is a fine bridge over the Alleghany, and another over the Monongahela, connecting the suburbs with the city. There are 16 churches, the Western University, a theological seminary of the Associate Reformed Church, an exchange, a museum, a high school, and a number of respectable private schools. The inhabitants are temperate, industrious and enterprising. The hills and country round in the summer season wear a fertile and luxuriant appearance. Pop. 1826, 10,515; 1830, 12,568.

POSTVILLE, v. Herkimer co. N. Y.

POTOMAC R. rises in the Alleghany Mountains, in Va. and Md. in two principal branches, and forms, in its course to the Chesapeake, nearly the entire boundary between those two states. It receives several streams, the largest of which is the Shenandoah r. It is about 560 miles long, and 7½ miles wide at its mouth. It

is navigable for the largest vessels to Washington City, about 300 m. from its mouth. Above this there are several falls, which are obviated by canals.

POTOMAC R. Mosquito co. E. Flor. flows into the Atlantic, by Hillsboro' Inlet.

POTOSI, c. t. Washington co. Mo. 127 m. SE. of Jefferson City, 70 m. SSW. from St. Louis. A rail road is projected to this place from St. Louis. It contains several lead furnaces and mills, and is rapidly improving.

POTSDAM, t. & v. St. Lawrence co. N. Y. 23 m. E. from Ogdensburg. Soil rich. The v. is on Racket r. at the falls. The v. contains 4 churches, an academy, an hotel, several mills, and about 900 inhabitants. Population of the whole t. in 1835, 3,810.

POTSDAM, p. o. Davidson co. Te.

POTTER County, N. part of Pa. Alleghany r. and various other streams rise in this co. Surface elevated. Coudersport, c. t. Pop. 1830, 1,265.

POTTER, t. Yates co. N. Y. Pop. 1835, 2,256. This t. was taken from Middlesex, 26th April, 1832. Surface hilly; soil a gravelly loam, or limestone, and of a good quality for wheat and other grains.

PRINCETON, v. Middlesex and Somerset cos. N. J. A beautiful village, distinguished as the seat of one of the oldest colleges in the U. States, and the Theological Seminary of the Presbyterian Church. It is 10 m. N. of Trenton, 40 NE. of Philadelphia, and 49 SW. of N. York. Besides the college building, there is a church, and about 140 houses. The college was first founded, in 1746, at Elizabethtown, and permanently established at Princeton, in 1757. The edifice is called Nassau Hall. It is 4 stories high, 175 feet long and 50 feet wide, and contains an excellent library of about 8,000 volumes, and a students' library of 4,000 vols. The Theological Seminary was established in 1812. It has 5 professors, and 7,000 vols. in the library. A battle was fought in Princeton, in 1777, between the British troops and a part of the American army, under Gen. Washington. The British lost 100 killed, and 300 prisoners.

PROVIDENCE County, in the N. part of R. I. Contains Pawtucket, Seekonk and Pawtuxet rs. and much water power, which is used for manufactories. Providence, c. t. Pop. 1820, 35,736; 1830, 47,018.

PROVIDENCE R. rises in Mas. and flows S. into Narraganset Bay below Providence.

PROVIDENCE City, Providence co. R. I. the metropolis and one of the capitals of the state, 41 m. SW. from Boston, 15 m. NW. of Bristol, 30 N. of Newport, 58 NE. of New London, 70 E. of Hartford, 394 NE. of Washington, and about 31 m. from the ocean. It is built on both sides of Providence r. over which there are two bridges. Vessels of 900 tons can come up to the city. Many of the buildings are very elegant. The principal public buildings are the state house, arcade, sixteen houses of public worship, Brown University, Dexter Asylum, Friends' boarding school, and several public schools. There are also several large manufactories. The arcade is a splendid building of granite, with two doric porticoes, 72 feet front, of six columns each—the shafts, 22 feet long, being each of a single block. The building is 222 feet deep; cost \$130,000. Brown University was founded in 1764, at Warren, and removed to Providence in 1770. Its principal hall is four stories high, and 150 feet long. It has 10 professors, 6,000 volumes in the college library, and 6,000 in the students' library. The Dexter Asylum for the Poor, finished in 1828, is a brick building 170 feet long, 45 wide, and 3 stories high. The public schools originated with the Mechanics' and Manufacturers' Association, in 1800. There are several libraries, containing in all several thousand volumes—including the Athænum, the Apprentices' and Provi-

ence Libraries. Providence is a place of considerable commercial enterprise, and has extensive manufactories of cotton, iron and machinery. The town was first settled by Roger Williams, who was forced to leave the Plymouth colony, particularly on account of his declaration in favor of *entire and unrestricted religious freedom among all sects*. He commenced the settlement near the mouth of the river Mooshasuck, giving it, in acknowledgment of the Divine protection, the name of Providence. Pop. 1825, 15,941; 1830, 16,832—since which it has greatly increased. The Blackstone Canal, and the Stonington and Boston Rail Roads terminate here.

RED River, Te. falls into the Cumberland below Clarkesville.

RED R. of Ky. falls into Kentucky r. between Clark and Estill cos.

RED R. of Lake Winnipeg, rises near the sources of the Mississippi r. and flows northerly 170 m. into the S. end of the lake.

RED R. one of the principal tributaries of the Mississippi, rises at the base of the Rocky Mountains, near Santa Fe. The

False Washita and Blue rs. are the main branches for near 400 m. It forms the boundary between the territory of the U. States and Texas, from 17° 45' to 23° W. from Washington. Entering the state of Ark. it flows S. into La. and in a southeasterly direction, until it enters the Mississippi r. in lat. 31° N. Much of its course is through rich and beautiful prairies of red soil, covered with grass, and vines of delicious grapes. About 100 m. above Natchitoches, commences the Raft—a broad swampy expansion of 20 or 30 m. in width. The r. here dividing into numerous shallows, becomes covered and obstructed with the masses of drift wood borne from the upper streams. Boats sometimes pass through these obstructions, and are often obliged to follow a stream into a distant lake, and pass into the r. below the Raft through the outlet. The r. is thus impeded for about 60 or 70 m. But for this, steamboats could ascend to the delightful region of country above it. The valley of the r. for a great distance above its mouth, is from 6 to 18 m. wide, and of superior fertility. Cotton is the staple. The whole length of this noble r. is estimated at 2,500 m.

RHINESTOWN, v. Cumberland co. Pa.

RHODE ISLAND, one of the United States, bounded N. and E. by Massachusetts, S. by the Atlantic, and W. by Connecticut. Mean length from N. to S. about 42 miles; mean breadth, about 29 miles; area 1,225 square m. It is the smallest state in the Union.

The surface of the country is generally level, except in the NW. part, which is hilly and broken. The soil is best adapted to grazing; but the island of Rhode Island is fertile, and productive in all kinds of grain. The rivers and bays afford a great variety of excellent fish. Iron abounds in considerable quantities. Copper is also found. The principal streams are the Providence, Pawtucket and Pawtuxet rs. Narraganset Bay extends from S. to N. over 30 miles into the state, and contains a number of islands, among which are Rhode Island, Conanicut, Prudence, Patience, and Hope islands. Block Island lies 10 m. S. of the coast, in the ocean. The climate is mild and salubrious.

The principal towns are Providence, Newport, Bristol, Warwick, and Pawtucket.

The principal commercial and manufacturing interests centre in Providence and the neighborhood. There are large manufactures of cotton, woollen, &c. at Providence, Pawtucket, Warwick, and Slatersville.

The General Assembly meets usually four times a year, at Providence, Newport, East Greenwich, and South Kingston. Rhode Island has no written constitution, but retains the forms prescribed by the charter originally granted by Charles II. in 1663.

There are about 650 common schools in the state, and 26,000 children of a suitable age for instruction. The legislature appropriates annually \$10,000 for the support of the schools; and this amount is increased by taxes laid in the towns. Brown University is the only college in the state. It was founded in 1764 at Warren, and removed to Providence in 1770.

The principal religious denominations are Baptists, Methodists, and Congregationalists.

Rhode Island was first settled at Provi-

dence, by Roger Williams, a minister who was obliged to leave the colony of Plymouth on account of his religious opinions. His followers soon increased, and a patent for the territory and permission to establish an independent government was obtained from the Plymouth Company, in 1644. The first General Assembly met in 1647.

Internal Improvements:—Blackstone Canal—extends from Providence to Worcester, Mas.—45 miles; finished in 1828; cost \$600,000.

New York, Providence, and Boston Rail Road—extends from Providence to Stonington, Ct.—47 m. long; of which about 40 m. are in Rhode Island.

The Boston and Providence Rail Road is chiefly in Mas.

Population:—in 1790, 68,825; 1800, 69,122; 1810, 76,931; 1820, 83,059; 1830, 97,212.

RHODE ISLAND, an island in Narraganset Bay, R. I. which gives name to the state. It is 15 m. long N. & S. and 3½ wide. It is a beautiful, fertile, and healthy spot, and a frequent resort for invalids from the south. A considerable portion of it is used for grazing sheep and neat cattle. The other parts are in a high state of cultivation. It contains the townships of Newport, Middletown, and Portsmouth.

RICHMOND, t. Crawford co. Pa.

RICHMOND, city, and port of entry, Henrico co. and capital of the state of Virginia, situated on the N. side of James r. at the head of tide water, 150 m. above the mouth, 25 N. of Petersburg, and 123 SW. of Washington. The situation of Richmond is healthy and agreeable. The houses are generally of brick, and have a neat appearance. The State House is justly admired for its architectural beauty. Among the places of public worship, is the *Monumental Church*, erected on the spot where the Richmond Theatre was burnt on the 26th Dec. 1811, at which the Governor of Va. and 71 other persons lost their lives. This city has considerable commerce and manufactures. Vessels drawing 15 feet can ascend the river to within 5 m. of Richmond, and vessels drawing 10 feet can come to Rockets, a little below the city. The falls, in which the r. descends 80 feet in 6 m. is avoided by a canal, and small boats reach over 200 m. above them. The Penitentiary and the Va. armory are here. The population in 1820, was 12,016; in 1830, 16,060, of which 6,345 were slaves, and 1,900 free blacks.

ROCHESTER, t. Windsor co. Vt. Pop. 1830, 1,392.

ROCHESTER, t. Plymouth co. Mas.
ROCHESTER, city, Monroe co. N. Y. situated on both sides of Genesee r. 7 m. S. of Lake Ontario, 73 E. of Buffalo, 219 W. of Albany, and 361 N. of Washington City. The public buildings are a court house, fourteen churches, an arcade, two market houses, three banks, and six fine hotels. The arcade is 100 feet front, 135 deep, and six stories high. The 1st Presbyterian and St. Paul's (Episcopal) churches are fine buildings. There are three bridges across the river, and a new aqueduct is now being erected for the Erie Canal.

Rochester owes its rise and greatness to the vast water power supplied by the Genesee r. Within the city limits the fall of the river is 268 feet. There are 22 large flouring mills with 100 run of stones, averaging 500,000 barrels of flour a year. There are also a number of manufactories and saw mills. Besides a large and increasing commerce by Lake Ontario, its internal trade through the Erie Canal is very extensive. Several of the lines of canal boats are owned here. In a few years, Rochester will also be connected with Albany and Buffalo by rail roads, which are now in a rapid course of construction. No city west of New York enjoys more of the substantial advantages of prosperity. Carthage, on the Genesee r. 2 m. below Rochester, and within its limits, is the port at which vessels and steamboats arrive. A rail road extends

from Rochester to Carthage, and it is proposed to continue it to Port Genesee on the lake.

There are several literary institutions, and a large number of respectable schools; two Institutes for the promotion of education, and the Franklin Institute and Athæneum. There are 7 printing offices and six newspapers, two of which are daily.

Rochester was founded in 1812, by Nathaniel Rochester, Wm. Fitzhugh, and Charles Carroll of Maryland, from the first of whom it took its name. It was incorporated as a village in 1817, and as a city 28th April, 1834. It includes an area of 4,324 acres. Pop. in 1820, 1,502; 1830, 9,269; 1835, 14,404.

- ROCKY Mount, v. Fairfield dist. S. C. 55 m. from Columbia.
- ROCKY Mount, p. o. Merriwether co. Ga.
- ROCKY Mount, v. Autauga co. Ala.
- ROCKY Mountains, that part of the Chippewayan chain which lies in the western possessions of the U. States, dividing the streams which flow into the Pacific, from those which flow towards the Atlantic. Their extent, height, and breadth, are much greater than those of the Alleghanies. In lat. 47° they are covered with snow in July. Frequent explosions and a loud rumbling noise are heard by trappers who visit them, supposed to be volcanic. Their appearance is dark, sterile, and rugged. Some of the peaks are 12 to 18,000 feet high. Lewis and Clarke suffered greatly in crossing these mountains. On their return, in May, the snow was 10 feet deep. Captain Pike, in attempting to explore the southern parts was completely bewildered in the snows and precipices, and lost a number of his party. Their geological structure, as far as known, appears to be granite.

SAINT Joseph, p. o. Franklin co. Flor.

SAINT Joseph's, t. Williams co. O.

SAINT JOSEPH County, one of the S. counties of Mich. crossed by St. Josephs r. into which various streams flow in the co. Much of the surface is a rich prairie, with belts of excellent timber. Centreville, c. t. Pop. 1834, 3,168, and rapidly increasing.

SAINT Joseph, v. Berrien co. Mich. at the mouth of St. Josephs r. on Lake Michigan.

SAINT Joseph Island, in St. Mary's Strait, Mich.

SAINT Joseph, t. Berrien co. Mich. Pop. 1834, 600.

SAINT Joseph, c. t. Berrien co. Mich. at the mouth of St. Josephs r. a thriving and flourishing village, with an increasing trade. Pop. about 1,200.

SAINT Joseph's R. of the Maumee, rises by various sources in Hillsdale co. Mich. flows thence across the NW. corner of Ohio into Indiana, where it unites with the St. Marys, at Fort Wayne, to form the Maumee, which flows NE. into Lake Erie. Length of the St. Joseph's about 85 m.

SAINT Joseph's R. Mich. rises in Hillsdale co. in the S. part of the state; flowing NW. and SW. it enters Indiana, and again returns into Mich. and runs northerly into Lake Michigan, in Berrien co. It receives Elkhart r. Pigeon and Hog crs. and other streams. Its course is through a beautiful and fertile section of country. Length about 175 m. It is

navigable 140 m. from its mouth, and is about 100 yards wide at South Bend. Length, by its windings, about 240 m.

SAINT JOSEPH County, in the N. part of Ia. having St. Joseph's r. in the NE. The sources of the Kankakee drain the SW. part of the co. South Bend, c. t. Pop. 1834, about 1,800. Surface varied and undulating. The soil is various, from barren to exceedingly fertile. There are several considerable marshes, of which the Kankakee is the most extensive.

ST. LANDRY Parish, La. (See Opelousas.)

SAINT LAWRENCE County, in the N. part of N. Y. on St. Lawrence r. Much of the surface is hilly, and in the SE. and E. parts covered with extensive forests. A considerable part of the soil is a light sandy loam. Indian, Oswegatchie, Grasse, Racket and St. Regis rs. flow through it. Pop. 1830, 36,354; in 1835, 42,047.

SAINT Lawrence, v. Chatham co. N. C.

SAINT Leonards, v. Calvert co. Md.

SAINT Louis, v. Bartholomew co. Ia.

SAINT LOUIS County, E. part of Mo. a fine agricultural co. with soil of the first quality. Bituminous coal is found here in great quantities. St. Louis, c. t. Pop. 1830, 14,125; 1836, 19,593.

SAINT Louis, city & c. t. St. Louis co. Mo. on the W. side of Mississippi r. 134 m. E. from Jefferson City, 18 m. by water below the mouth of the Missouri, and 200 m. above the mouth of the Ohio. The town is pleasantly and advantageously situated for trade, and is very healthy. There are six churches, including a splendid Catholic cathedral, 136 feet long by 84 broad, and 50 feet high. The houses are neat, and many of them ornamented with gardens of shrubbery. Enjoying a central position, with the advantages of three important rivers—the Mississippi, Missouri and Illinois—St. Louis has every prospect of becoming a great and flourishing city. The University of St. Louis is conducted by Catholics—founded 1829. It has 15 instructors, and about 6,500 volumes in the library. There are various other literary and benevolent institutions, among which are the Hospital, "Convent of the Sacred Head," Orphan Asylum, Female Charitable Association, and a number of very respectable schools. The population in 1830 was 6,694, but has since greatly increased.

SAINT Louis R. Wis. T. unites with Fond du Lac r. to form the head waters of Lake Superior.

SAINT Lucia R. East Florida, flows into the Atlantic.

SAINT Marks, v. Leon co. Flor. on St. Marks r.

SAINT Marks R. Flor. falls into the Gulf of Mexico. It is navigable for sloops to St. Marks v.

SAINT Martins, v. Worcester co. Md.

SAINT MARTINS Parish, in the S. part of La. St. Martinsville, c. t. Pop. 1830, 6,442.

SAINT Martinsville, c. t. St. Martins par. La. 176 m. W. of New Orleans. Contains about 60 dwellings.

SAINT Marys, p. o. Chester co. Pa.

SAINT MARYS County, in the S. part of Md. on the Potomac. The seat of government was in this co. until its removal to Annapolis in 1699. The first settlement of Md. was made here. Pop. 1830, 13,459.

SAINT Marys R. a considerable river in Ga. and Flor. rising in Okefinoke Swamp, and after a remarkable curve to the S. it flows E. into the Atlantic. Its course is over 100 miles, generally through narrow strips of wet hammocks. The growth upon the banks is pine. The harbor at the mouth of the river is very fine, having at the bar 20 feet water in common tides. The tide flows up the river about 50 or 60 m.

SAINT Marys, v. & seaport, Camden co. Ga. at the mouth of St. Marys r. 235 m. SE. from Milledgeville. It is a frequent resort in winter for invalids from the north.

SAINT MARYS Parish, La.

SAINT MARYS R. rises in Mercer and Shelby cos. O. and runs NW. into the Maumee r. in Allen co. Ia. Navigable 20 m.

SAINT Marys, t. & c. t. Mercer co. O. on St. Marys r. Pop. 1830, 650.

SALEM, p. o. Somerset co. Me.

SALEM, t. Rockingham co. N. H. Pop. 1830, 1,302.

SALEM, t. Orleans co. Vt.

SALEM, city & c. t. Essex co. Mas. 14 m. NNE. of Boston, and 24 S. of Newburyport—the second town in trade and population in the state, and the oldest town in New England except Plymouth, being settled in 1628. It is situated on a peninsula formed by two inlets from the sea, over one of which is a bridge over 1,500 feet long, which connects Salem with Beverly. Its commerce is chiefly with the East Indies, and a great amount of capital is invested in it. The harbor is good, and vessels drawing 12 feet water can be admitted to the town, and of greater depth a short distance below. The houses are generally neat and in good taste, and some of them elegant. Most of those recently erected are of brick. There are 16 churches of the various denominations, eight banks, several insurance companies, a court house, jail, alms house, an East India Museum, a lyceum, and a market house. There are two libraries, containing about 10,000 volumes, and three semi-weekly and two weekly papers. There are a large number of very respectable schools, and no people in the United States pay more attention to the education of their children. The East India Museum was established by a society, incorporated in 1801, of persons that had sailed round Cape Horn or the Cape of Good Hope. One of their objects was to promote a knowledge of trade and navigation to the East Indies.

SALEM, t. New London co. Ct. Pop. 1830, 958.

S. SAVANNAH, t. Wayne co. N. Y.

SAVANNAH, city, c. t. & seaport, Chatham co. Ga. 167 m. SE. of Milledgeville. It is situated on a high bank of the Savannah r. 17 m. above its mouth.

It was founded by Gen. Oglethorpe, in 1733. There are 10 public squares, and 10 houses of public worship. It is the principal commercial port of the state. The exports consist chiefly of cotton and rice. A great part of the town was destroyed by fire in 1820, which has since been rebuilt. The city was formerly unhealthy, but it has much improved since the rice lands are no longer inundated. There is a large academy, a theatre, hospital, and several benevolent institutions. Pop. 1830, 7,303.

SAVANNAH R. forms the boundary between S. C. and Ga. Steam boats of 150 tons ascend to Augusta. Large vessels reach Savannah, 17 m. Length, 125 m.

SAVANNAH R. two streams of that name in Wis. T. One flows into St. Louis r. of Lake Superior, the other into the Mississippi r.

SCHENECTADY County, in the E. part of N. Y. Mohawk r. and the Erie Canal pass through it. Much of the soil is sandy, and not generally rich, except along the Mohawk. Part of the surface is uneven and broken. Schenectady City is the c. t. Pop. 1830, 12,347; 1835, 16,230.

SCHENECTADY, city & c. t. Schenectady co. N. Y. on the SE. side of Mohawk r. 16 m. NW. of Albany. It contains a court house, 8 churches, a bank, an academy, a seminary for females, a lyceum, and several select schools; and 6 newspapers are published. Union College, which is located E. of the city, was incorporated in 1794. Its buildings are two edifices of brick, each 200 feet long, and 4 stories high. It has 10 professors, about 300 students, 5,500 volumes in the college library, and about 9,000 in the students' library.

Schenectady has the advantage of rail roads to Albany, Saratoga, and Utica. Pop. 1830, 4,268; 1835, 6,272.

SCHUYLER, t. Herkimer co. N. Y. Pop. 1835, 2,153.

SCHUYLER County, W. part of Ill. on Illinois r. Watered by Sugar, Crooked and M'Kees crs. The surface is flat on the Illinois, and subject to inundation. The soil generally is rich; much of it is prairie, and a considerable portion covered with heavy timber. Rushville, c. t. Pop. 1835, 6,361.

SCHUYLERVILLE, v. Saratoga co. N. Y. on the Hudson r. and Champlain Canal. Contains several factories and mills, and about 350 inhabitants.

SCHUYLKILL County, E. part of Pa. Surface much diversified—much of it is mountainous. Contains inexhaustible quantities of anthracite coal of the best quality, which is extensively worked and transported to Philadelphia, New York and other places. Orwigsburg, c. t. Pop. 1830, 20,744.

SCHUYLKILL, t. Schuylkill co. Pa. Pop. 1830, 1,200.

SCHUYLKILL, t. Chester co. Pa. Pop. 1830, 1,434.

SCHUYLKILL Haven, v. Schuylkill co. Pa.

SCHUYLKILL R. a beautiful river of Pa. rising in Luzerne co. and flowing SE. until it unites with the Delaware r. 6 m. below Philadelphia. For most of its course it is not navigable, having many shallows and falls; but the canals along its banks afford a conveyance to Philadelphia for the rich supplies of coal from its sources. The tide ascends to the dam at Philadelphia, where the water is used for supplying that city. Its entire length is 140 m.

- SING Sing, (Mount Pleasant, t.) v. Westchester co. N. Y. 32 m. N. of New York, 120 S. of Albany, on the E. side of Hudson r. Contains four churches, an academy and seminary, and about 1,200 inhabitants. The dwellings are neat, and some of them elegant. The Eastern Penitentiary is located here. This prison, as well as the other state prison at Auburn, is conducted on the most efficient and economical plan. Since the year 1833, the income of this prison, from the labor of the convicts, has exceeded the expenses. The average cost of each prisoner is about \$63. The prisoners are kept at hard labor during the day, and confined separately in cells at night.—They have a chaplain, and on the Sabbath the benefit of Sabbath schools and religious instruction.

SOUTH CAROLINA, one of the United States, bounded N. by North Carolina, SE. by the Atlantic, and SW. and W. by Georgia. It is 200 m. long by 125 m. broad, containing about 30,000 square m.
The state was first settled in 1670, at

Port Royal; and Charleston was permanently settled in 1680. A grant was made as early as 1662, by Charles II. to Lord Clarendon and seven others, of the territory between N. lat. 31° and 36° 30'. The proprietary government was very complex and difficult, which was increased by the adoption of Mr. Locke's scheme. In 1719, the two Carolinas were separated, and organized under the royal government. In 1695, Governor Smith introduced the cultivation of rice, and cotton followed soon after—two very important events in the history of the state. South Carolina suffered much in contests with the Indians, and also in the revolution, in which she became distinguished.

The surface of the country along the coast, and extending 100 miles into the interior, is a level plain. W. of this, the surface rises into ranges of little sand hills, resembling the waves of the ocean, which extend 50 or 60 miles. Beyond this, the country exhibits a fine belt of rich and well cultivated soil called the Ridge, extending from the Savannah to Broad r.; and all W. and NW. is a beautiful luxuriant country, resembling the finest sections of the northern states. The western limit of the state is mountainous.

The soil of South Carolina is divided into six classes:—1. The tide swamp; 2. Inland swamp; 3. High river swamp, or low grounds; 4. Salt marsh; 5. Oak and hickory highland; 6. Pine barren. The first and second classes are particularly adapted to rice and hemp; the third to corn, hemp and indigo; the fifth is very fertile, and adapted to the cultivation of corn, indigo and cotton. The pine barrens are not much cultivated. Cotton and rice are the great staple commodities, large quantities of which are annually exported. Very little cotton was raised in the state previous to 1795.

The winters are mild, and the seasons of vegetation commence as early as January and February, and continue till October or November. Snow often covers the mountains, but is seldom seen in the plains. For seven years in Charleston, the thermometer was not known to rise above 93°, or to fall below 17°. In the low country the inhabitants are much subject to fevers in the summer season; but in the more elevated regions, the air is as salubrious as in any part of the United States. The characteristics of the inhabitants of South Carolina are public spirit, hospitality and benevolence.

The principal rivers are the Great Pee-dee, Santee, Savannah, Edisto, Congaree and Wateree.

The principal towns are Charleston, which is the largest, Georgetown, Columbia, the capital, Beaufort and Camden.

The Legislature is composed of a Senate and House of Representatives. Senators are chosen for four years—representatives for two years. The governor is chosen by the Legislature for two years. His salary is \$3,500.

The principal denominations of Christians are Presbyterians, Baptists, Methodists and Episcopalians.

Education is encouraged by an annual appropriation for that purpose. The principal literary institutions are the College of S. Carolina, at Columbia, founded in 1804, which has nine instructors, an average of 150 students, and 10,000 volumes in the library; and Charleston College, founded in 1785, which has seven instructors, and an average of 65 students.

	<i>Population. Slaves.</i>	
In 1701,	7,000	
1750,	64,000	
1790,	249,073	107,094
1800,	345,591	146,151
1810,	415,115	196,365
1820,	502,741	258,475
1830,	581,458	315,365

Of the last number, there were deaf and dumb, 174; blind, 102; aliens, 489.

Internal Improvements.—The Santee Canal extends from Charleston harbor to the Santee r. 22 miles; finished in 1802; cost \$650,667. By this canal, and the improvement of the Santee and Congaree rs. a water communication has been opened from Charleston to Columbia.

The Catawba r. has been improved by five short canals, amounting in all to 11½ miles.

Saluda Canal, from the Saluda Shoals to Granby Ferry, on the Congaree, 6 m.

There are several other small canals constructed to avoid obstructions in the rivers.

The South Carolina Rail Road, extends from Charleston to Hamburg, on the Savannah r.; length 136 miles; completed in 1833.

The great project of forming a rail road communication from Charleston to Cincinnati and Louisville, on the Ohio r. has been undertaken; charters have been procured from the several states, surveys made, and a considerable portion of the subscriptions paid in. The distance in a straight line between Charleston and Cincinnati is 520 miles. The distance on the route of the proposed road is 607 miles, as follows:—From Cincinnati to Cumberland Gap, 210 miles; thence to the

junction of French Broad r. 52 miles; thence by French Broad and Saluda rs. to Columbia, S. C. 215 miles; thence to Charleston, 130 miles: total, 607 miles.

There have also been three routes explored, for the purpose of connecting the Atlantic with the Mississippi.

1. "The northern route of the Atlantic and Mississippi Rail Road," from Memphis, Te. to Charleston, S. C. 740 miles; estimated cost, \$15,000,000.

2. The southern route, from Memphis, Te. to Savannah, Ga. 700 miles; estimated cost, \$12,000,000.

3. The Chesapeake and Mississippi Rail Road, from Memphis to Chesapeake Bay. Examined from Memphis to the easterly base of the Cumberland Mountains, near the confluence of Holston and Clinch rivers, 356 miles—more than one-third the entire route. Estimated cost of the part surveyed, \$6,500,000.

STETSON, v. Penobscot co. Me.

STEBEN, t. Washington co. Me. Pop. 1830, 695.

STEBEN County, one of the S. tier of cos. in the W. part of N. Y. The surface is hilly, with an elevation of 1,500 feet above tide water. The principal streams are the Conhocton and Canisteo, which flow through deep and precipitous valleys, uniting with the Tioga in the t. of Painted Post, to form the Chemung, a branch of the Susquehannah. The soil is generally good for pasture, and a considerable portion of it is well adapted to wheat. The N. Y. & Erie Rail Road will pass through this county. Bath, c. t. Pop. 1830, 33,851; 1835, 41,435.

STEBEN, t. Oneida co. N. Y. Pop. 1835, 2,160.

SUSQUEHANNAH, t. Cambria co. Pa.

SUSQUEHANNAH River, a large stream in Pa. formed by two branches uniting at Northumberland, in Northum-

berland co. The W. branch rises principally in Cambria co. The E. or N. branch rises in Otsego co. N. Y. After the junction, the r. flows S. and SE. into the head of Chesapeake Bay. It is one mile and a quarter wide at its mouth, but is navigable only five miles. Immense quantities of lumber and produce are floated down at high water on arks and rafts. Its entire length by the N. branch is 450 m.

SYRACUSE, c. t. Onondaga co. N. Y. 133 m. W. of Albany, and by the canal 171; and 61 m. from Utica. It is a very flourishing town, and has sprung up principally since the construction of the Erie canal. It contains 4 churches, a court house, a bank, an academy, a high school, a lyceum, two printing offices, at which weekly papers are published, and about 750 dwellings. The population in 1830 was 2,565; in 1835, 4,103. The Oswego canal unites with the Erie canal at this place. There are two fine hotels; the Syracuse House is a large structure 4 stories high, affording a beautiful prospect from the top. There are many large and commodious brick stores. It is a place of extensive business, which is yearly increasing.

TENNESSEE River, p. o. Macon co. N. C.

TENNESSEE R. an important tributary of the Ohio, formed principally by two main branches, Holston and Clinch rs. in Tennessee, which rise in the Alleghany Mountains in the SW. part of Va. It thence flows S. into Alabama, crosses the N. part of that state, and again enters

Tennessee; crossing the state N. it enters Kentucky, and falls into the Ohio r. 57 m. above its mouth, and 13 m. below the mouth of Cumberland r. Its entire length is about 1,200 m.; for near 1,000 m. it is navigable, having but few obstructions. Its principal head branches are Clinch, Holston, French Broad, Nolachucky, Tellico and Richland rs. It flows through a country the greater part of which is remarkable for its fertility.

TENNESSEE, one of the U. States, bounded N. by Kentucky and Virginia, E. by North Carolina, S. by Georgia, Alabama and Mississippi, and W. by Arkansas and Missouri. It is 430 m. long by 104 broad, containing 40,000 square m.

The earliest permanent settlement was made in 1757, by the erection of Fort Loudon. Between 1765 and 1770, settlements were made on the Holston r. by inhabitants from Virginia and N. Carolina, which were much harassed by Indian warfare. The territory continued to form a part of North Carolina until 1790, when it was organized into a separate territorial government, which continued until 1796, when a state constitution was formed; and on the 1st June of the same year, Tennessee was admitted into the Union as an independent state.

The state is divided into East and West Tennessee by the Cumberland Mountains, which extend in a NE. and SW. direction. The E. part is hilly, and rises to the chain of mountains which form the eastern boundary of the state. These are known by the names of Stone, Unaka, Bald, and Iron or Smoky Mountains. The middle and western parts of the state are level and undulating. The soil is exceedingly various. The valleys in the eastern section are very fertile, containing large proportions of lime. In the middle, much of the land is of an indifferent quality. In the west it is rich and productive.

The principal rivers are the Tennessee, Cumberland, Clinch, Holston, Forked Deer, Big Hatchee, Obion and French Broad.

The climate is generally healthy. The winters are mild, and the summers are pleasant.

Cotton is the staple production. Wheat, corn, rye and barley are also raised. There are no extensive manufactories; but iron, cotton and hemp have been manufactured to a considerable extent.

Some of the most remarkable features in the state, are the bold and picturesque scenery of the mountains, with their lofty

precipitous sides; the numerous cascades falling from 200 to 400 feet; and caves of such immense depths and extent that some of them have never been fathomed or explored. One of these caves was descended 400 feet to the bottom, which was of smooth limestone, where was found a stream of water sufficient to turn a mill. Some of the caves have been explored 10 or 12 miles. "On some spurs of the Cumberland Mountains," says Mr. Flint, "are marked in solid limestone, the footsteps of men, horses, and other animals, as fresh as if recently made, and as distinct as if impressed upon clay-mortar." Near the S. boundary are found trees in an entire state of petrification, one of which is a cypress four feet in diameter. Bones are found, which indicate an animal 20 feet high. Walls of faced stone exist in various places, and other works of a people now unknown. On some of the highest rocks are paintings, in good preservation, the colors as fresh as if recently put on. The foot-prints of animals and human beings are imbedded in the limestone rock, and what is remarkable, the human feet have uniformly six toes. One of these tracks is sixteen inches long. No satisfactory explanation has ever been made of these remarkable appearances.

The Legislature consists of a Senate of 25 members, and a House of Representatives of 75 members—all elected for two years. Their pay is \$4 a day. The governor is elected for two years; salary, \$2,000.

Of religious denominations, the Baptists, Methodists and Presbyterians are the most numerous.

There are five colleges in the state:—Greenville College, founded 1794, has a library of 4,000 vols. Washington College, founded 1794. University of Nashville, founded 1806; 6,000 vols. in the libraries. East Tennessee College, at Knoxville, founded 1807; 3,500 volumes in the libraries; and Jackson College, near Columbia, founded 1830, with a library of 1,500 volumes.

	Population.	Slaves.
In 1800,	105,602	13,584
1810,	261,727	44,535
1820,	420,813	80,107
1830,	681,906	141,603

Of the population in 1830, 208 were deaf and dumb, 176 blind, and 121 aliens.

Internal Improvements.—The New Orleans and Nashville Rail Road, 560 m. long, has been surveyed. Other rail roads have been projected; but very little has yet been accomplished in this state in internal improvements.

TRENTON, city & t. Mercer co. N. J. and capital of the state, situated on the E. side of Delaware river, 10 m. SW. of Princeton, 26½ m. by rail road NE. of Philadelphia, and 166 m. NE. from Washington. Lat. 40° 14' N. Long. 2° 23' E. from Washington. The river is navigable for sloops to the falls at this place. The city contains the state and county buildings, an academy, several churches, and some extensive cotton manufactories. This place was distinguished for the victory of Gen. Washington over the British army, on the 26th December, 1776. On the night of the 25th, Washington crossed the Delaware during a severe storm of snow and rain, and attacked the enemy in the N. and W. part of the town. The British lost 20 killed, and about 1,000 prisoners. The Americans lost 2 killed and 5 wounded, and 2 were frozen to death.

TROY, city & c. t. Rensselaer co. N. Y. 6 m. N. of Albany, on the E. bank of Hudson r. at the head of tide. Its situation is handsome and elevated, and the streets are regularly laid out. There are 13 churches, some of which are very elegant, 4 banks, a court house, of marble, a jail, an orphan asylum, and several respectable academies, seminaries, and scientific institutions. It is a place of extensive business. The inhabitants have long been distinguished for public spirit, literary taste, and commercial enterprize. A large number of vessels and boats are owned here, which do business on the r. with N. York, and on the canal. The houses are mostly of brick, many of them large and elegant. The city is supplied with water, by means of pipes, from an eminence of 72 feet, in the neighborhood. Poesten Kill, which empties into the Hudson in the S. part of the town, affords a first rate water power for manufactories and flouring mills. Large quantities of grain are purchased annually, and manufactured into flour. The roads in the neighborhood of Troy are very superior, some of which are Macadamized. A rail road is constructed to Ballston Spa, 24 miles long. It crosses the r. on a bridge 1,600 feet long. The population of Troy in 1820, was 5,264; in 1825, 7,859; in 1830, 11,556; in 1835, 16,959.

UTICA, city, Oneida co. N. Y. situated on the S. side of Mohawk r. Incorporated in 1817, and as a city, in 1832. It is one of the most flourishing inland towns in the state. Its increase in wealth, trade, and manufactures, has been very great, especially since the completion of the Erie Canal. It is 96 m. W. of Albany, 140 E. of Rochester, by canal, and 202 E. of Buffalo. It contains 16 houses of public worship, some of which are very elegant, 3 banks, and numerous religious, benevolent, and literary institutions, including lyceums, libraries, academies, and various seminaries in which the higher branches of education are taught. Many of the dwellings are very beautiful. The stores are numerous, and well built. All the varieties of mechanical and manufacturing industry are actively employed. The hotels are large, and well conducted. There are six weekly papers, three of them religious. Numerous canal boats are constantly arriving and departing, loaded with freight and merchandise. A rail road from Schenectady terminates here, and another to Syracuse will shortly be in operation. The Utica & Schenectady Rail Road was opened on the 25th July, 1836. The distance is 77 m. The first trip was made,

exclusive of stoppages, in 3 hours 23 minutes. The population of the city has increased very rapidly. In 1820, it was 2,972; 1825, 5,040; 1830, 8,323; 1835, 10,183.

VERMONT, one of the United States, bounded N. by Lower Canada, E. by New Hampshire, S. by Massachusetts, and W. by New York. It is 158 m. long, and its greatest breadth 90 m. Its average breadth is about 60 m.—containing 10,220 square m.

Vermont was settled by inhabitants from Massachusetts in 1724; but Lake Champlain was discovered 115 years be-

fore by the French. In 1731 the French made a settlement at Crown Point, and built a fort. New York and New Hampshire both laid claim to the territory of Vermont, giving rise to many disputes, which were protracted until the revolution. In 1778 a constitution was adopted, and Vermont declared to be an independent state. In 1791, she was admitted into the Union. Vermont bore a distinguished part in the revolution. Her troops were called the "Green Mountain boys."

The Green Mountains, from which Vermont receives her name, on account of the evergreens which cover them, range through the centre of the state from S. to N. They are from 12 to 15 miles wide, and completely covered with wood and shrubs. On the tops the trees are small, and diminish into shrubbery of spruce and hemlock. The summits of the mountains are generally broken and rocky, and the sides in many places precipitous. The highest elevations are Killington Peak, near Rutland; Camel's Rump, between Burlington and Montpelier; and Mansfield Mountain, which rise from 3,500 to 4,000 feet above tide.

The principal rivers are the Connecticut, (which forms the E. boundary,) Onion, La Moille, Missinqua, and Otter cr. which fall into Lake Champlain, and White, Pasumpsic and West rs. which flow into the Connecticut. Lake Memphremagog is in the N. part of the state.

The chief towns are Burlington, Middlebury, Windsor, Bennington, Brattleboro', and Montpelier, the capital.

The climate is cold and severe in winter, but the air is pure and healthy. The soil in many parts is fertile, but it is chiefly appropriated to raising stock. Large flocks of the finest sheep are to be seen on the rich pastures, and great quantities of wool are annually produced. Since the completion of the Champlain Canal, much of the trade finds its way to New York. There is also considerable trade with Montreal. Iron exists in great abundance. Lead, zinc and copper are found in many parts of the state.

The principal denominations of Christians are Congregationalists and Baptists, of which the former are the most numerous.

The Legislature consists of a Senate and House of Representatives. The Senate has 30 members—the House has one representative from each town. They are all elected annually. The governor is elected annually, with a salary of \$750.

There are three colleges in the state :—

The University of Vermont, at Burlington, founded in 1791, which contains 9,000 volumes in the college and students' libraries; Middlebury College, founded in 1800, with libraries of 6,000 volumes; and Norwich University, founded 1834. Considerable attention is paid to the general education of the young. The schools are supported by yearly taxes, and a fund is now accumulating, the income of which is to be applied to supporting free schools.

Population at different periods: in 1790, 85,539; 1800, 154,465; 1810, 217,895; 1820, 235,764; 1830, 280,657.

Internal Improvements.—Except some small canals for the improvement of the Connecticut river, no canal or rail road has yet been constructed in this state. In 1835, the following rail road companies were incorporated:

"Vermont Central Rail Road Company," for a rail road from Lake Champlain along the valley of Onion r. to a point on the Connecticut r. to meet a projected rail road through New Hampshire, by way of Concord, to Boston.

The Brattleboro' and Bennington Rail Road Company; the Connecticut and Pasumpsic River Rail Road Company; and the Rutland and Connecticut River Rail Road Company.

VIRGINIA, one of the United States, bounded N. and NE. by Pennsylvania and Maryland, E. by the Atlantic, S. by North Carolina and Tennessee, and W. and NW. by Kentucky. It is the largest state in the Union. Its average length E. and W. is 355 miles; average breadth 190 miles, comprising an area of 65,600 square miles.

Virginia, sometimes called the "Ancient Dominion," was the first settled of all the American colonies, and was named in honor of Elizabeth the virgin queen. James river was discovered in 1607, by an expedition under Captain Newport, accompanied by the celebrated Captain Smith. They formed a settlement at Jamestown, and suffered much by famine and the hostilities of the Indians. Smith was taken prisoner, and when about to be executed, he was saved by the interposition of Pocahontas, the king's daughter. Such were the sufferings of the colonists, that the remnant which remained were on the eve of departure for England in 1610, when the timely arrival of lord Delaware prevented it. In 1620, a Dutch vessel arrived in James river with 20 African slaves, which was the first introduction of slavery into the North American colonies. In 1622, the Indians made a sudden and desperate attack upon the settlers, and 347 whites, including women and children, were dreadfully massacred. A severe and vindictive war followed this aggression, all improvements were for a while suspended, and the colonists, reduced and harassed, were again disposed to abandon the country. Relief was immediately despatched from England, and the direction of affairs was confided to a governor and council appointed by the king. After various vicissitudes, the colony settled down into tranquillity, and the settlements had extended beyond the mountains, when in 1753 the French made hostile encroachments, which again involved the colony in the calamities of war. It was during this war that the youthful Washington first distinguished himself, and gave presage of that renown which attended his future career. Besides the Father of his Country, Virginia gave birth to many illustrious citizens and statesmen, who bore a conspicuous part in the revolution, and added to the glory of their native state in the noble efforts she made throughout the great struggle for liberty. In 1776 a constitu-

tion was formed; which was revised in 1830, by a convention, over which the venerable ex-president Madison presided. Of the eight presidents of the United States, Virginia has given four.

The surface of the state presents several parallel chains of mountains, commencing about 180 miles from the sea, and running in a SW. direction. The Alleghanies have their widest base in this state, occupying the central region from 80 to 100 miles in breadth. Between these ridges are valleys of the greatest fertility. The eastern section is generally level, the soil sandy, and not very productive, except along the rivers, which is exceedingly fertile. Above the falls of the rivers, the land is better, and admits of profitable cultivation. The section west of the Alleghanies is mountainous and broken, interspersed with rich valleys and limestone country; a large portion of which is covered with forest trees. The climate is diversified according to the face of the country. In the low alluvial parts, it is hot and unhealthy; the summers are long and oppressive, and the winters mild and agreeable. In the mountainous districts, the weather is considerably colder, and the air more salubrious.

Iron ore, lead, coal and gypsum, abound in the mountain region, and gold has been obtained in the eastern part of the state, between the Potomac and James rivers—chiefly in Spottsylvania co. and neighborhood. Salt springs are numerous. There are many mineral springs in the mountains, and hot springs in Bath county and neighborhood. Among the natural curiosities of Virginia, the greatest are Weyers cave, and the natural bridge. The former is in Augusta county, and was discovered in 1806, by a hunter, whose name it bears. The splendor and magnificence of its halls and apartments exceed all description. The natural bridge, or rock bridge, is formed by a great rock thrown across an enormous chasm about 200 feet deep. The bridge is 60 feet wide at top, and covered with trees. There is another natural bridge in the SW. part of the state, but of much less size and proportion. There is also another cave on Jackson river, near Covington, of greater extent, but less beautiful than Weyers cave.

The chief agricultural productions are tobacco, wheat, and Indian corn. In the east part nearly all the labor is performed by slaves. There is not much attention paid to manufactures. There are some cotton factories, and a considerable quantity of salt is manufactured yearly.

The most numerous religious sect are the Baptists. There are, also, a large number of Presbyterians, Methodists, and Episcopalians.

The principal rivers in Virginia, are the Potomac, Shenandoah, James, Rappahannock, York, Mattaponi, Pamunky, Staunton, Great Kanawha, Little Kanawha, and Monongahela. The chief towns are, Richmond, the capital, Norfolk, Petersburg, Wheeling, Fredericksburg, Lynchburg, Williamsburg, Yorktown, and Portsmouth.

Mount Vernon, celebrated as the residence of Washington, is on the western shore of the Potomac, 15 m. below Washington City. His tomb is a simple excavation in the side of a bank, walled with brick, and overgrown with cedars.

The Legislature consists of a Senate and House of Representatives. The senators are chosen for 4 years, the representatives annually. The governor is elected for 3 years, and receives a salary of \$3,333 33.

There are five colleges in the state. William & Mary College, at Williamsburg, founded 1693, has 4,500 volumes in the library; Hampden Sidney College, Prince Edward county, founded 1783, has 8,500 volumes in the library; Washington College, at Lexington, founded 1812, has 1,500 volumes; the University of Virginia, at Charlottesville, founded 1819, has about 11,000 volumes; and Randolph-Macon College, at Boydton, founded 1832. There are three Theological schools or departments: one at Richmond, one in Prince Edward county, and one in Fairfax county. There is a school fund of about \$1,580,000, producing an annual revenue of near \$80,000. Of the expenditure for education, \$45,000 only, are given to the common schools, the balance to the University. The number of banks in the state, according to a letter of the secretary of the treasury, dated January 4, 1837, was four, with eighteen branches; and a capital of \$6,711,300.

Population at different periods:—

		Slaves.
In 1790,	747,610	292,627
1800,	880,200	346,968
1810,	974,622	392,518
1820,	1,065,366	425,153
1830,	1,211,375	469,757

Of the last number, there were deaf and dumb, 554; blind, 675; aliens, 518; white males, 347,887; white females, 346,383. Total whites, 694,270. Free colored, 47,348. The number of paupers is estimated at 2,500, and their annual

expense for support, at about \$100,000. Poor houses, with farms, are erected in about one fourth of the counties; in the others the paupers are allowed a certain sum for their support. The annual expense of each pauper in the poor houses is from 30 to \$40, while those otherwise supported, cost from 40 to \$80 a year.

Internal Improvements.—The *Dismal Swamp Canal* connects Chesapeake Bay with Albemarle sound. It is 22½ m. long, 60 feet wide, and 6¼ feet deep. Cost \$879,864.

Lower Appomattox Canal, cost \$39,092. Upper Appomattox Canal, cost \$135,529. Rappahannock Canal, cost \$64,576.

The James River and Kenawha Company, was incorporated in 1832, with a capital of \$5,000,000, to connect the James r. with the Kenawha by means of a canal and rail road, thus forming the nearest communication between the Ohio r. and the Atlantic. The state has subscribed near \$2,000,000 of the capital. The company commenced operations in 1835. The state has also subscribed \$250,000 to the Chesapeake & Ohio Canal.

Large sums have been expended by incorporated companies for the navigation of rivers, among which are the following: Roanoke navigation; cost, \$416,181. Rivanna; cost, \$78,400. A company was incorporated in 1834, for the improvement of the Shenandoah and its branches; capital, \$500,000. Banister River Navigation Company, incorporated 1835; capital, \$20,000.

The following rail roads have been completed, or are in progress: *Petersburg & Roanoke Rail Road*, length 59 m.; capital, \$602,500. *Winchester & Potomac Rail Road*, from Winchester to Harpers Ferry, 30 m.; capital, \$300,000; cost about \$425,000. *Chesterfield Rail Road*, from Richmond to the Coal Pits, 13 m.; capital, \$150,000.

The *Portsmouth & Roanoke Rail Road*, from Portsmouth to Roanoke, N. C. 77½ m.; capital \$475,000.

Richmond, Fredericksburg, & Potomac Rail Road, 58 m.; capital, \$700,000.

Greensville & Roanoke Rail Road, from Hicksford to Gaston, N. C. 18 m.

In addition to the above, about 20 rail road companies have been incorporated in 1835 and 1836, embracing a capital of nearly \$13,000,000, but as the greater portion of them will not probably be commenced for some years to come, they are not here inserted.

At the session of 1836-'37, the Legislature appropriated the following sums to various improvements:

James River & Kanawha Co.	\$1,990,800
Falmouth & Alexandria Rail Road,	400,000
Roanoke, Danville, & Junction Rail Road,	320,000
Baltimore & Ohio Rail Road,	302,100
Richmond & Petersburg Rail Road,	300,000
Lynchburg & Tennessee Rail Road,	200,000
Dismal Swamp Canal,	126,000
Louisa Rail Road,	120,000
Portsmouth & Roanoke Rail Road,	50,000
City Point Rail Road,	60,000
And other appropriations, amounting in all to	\$4,500,000.

WASHINGTON City, in the District of Columbia, the seat of the general gov-

ernment, is situated on the NE. side of Potomac river, near the head of tide, and about 125 miles from its mouth, and 295 from the ocean. The plan of the city is admirably laid out for the display of the public buildings. The avenues are 10 in number, and named after different states. These diverge from two principal centres, at one of which is the President's house, and at the other the capitol. The smaller streets generally cross each other at right angles. The Pennsylvania avenue, which is beautifully adorned with trees, forms a direct communication between the capitol and the President's house. The city is laid out on a plan embracing upwards of 8 square miles, but the buildings occupy but a small portion of that surface, and are much scattered.

The capitol is a splendid edifice, of the Corinthian order, built of white freestone. Its dimensions are as follows:

Length of front,	350 ft.
Depth of wings,	121
East projection,	65
West do.	83
Height of wings,	70
Height of centre dome,	120
Length of representatives' hall,	95
Height of do.	60
Length of senate chamber,	74
Height of do.	42
Height of rotunda,	90
Diameter of do.	90
Cost of the building, upwards of	\$2,000,000.

The capitol contains several pieces of sculpture, a fine library of 25,000 volumes, and the national paintings, by Trumbull.

The square on which it is situated, contains 22½ acres, and is enclosed by a substantial iron railing.

The President's house is a beautiful building of freestone, 170 feet long by 85 wide, and two stories high, with a high basement, ornamented with a circular Ionic portico. It is about a mile west of the capitol.

There are several other large buildings for the accommodation of the departments of the treasury, secretary of state, patent office, general post office, &c. There are also, in the city and suburbs, an extensive navy yard, marine barracks, an armory, and a penitentiary. Columbian college is situated a mile N. of the President's house. It has 8 professors, and 4,000 volumes in the library. The population of Washington City, in 1820, was 13,247; in 1830, 18,333. It will probably never be a city of much commercial importance, owing its advantages almost entirely to its being the seat of the national govern-

ment; but its population is constantly and rapidly increasing. In the winter, during the session of Congress, it is a place of much fashion and gaiety.

The city was laid out under the direction of Washington, while President. The seat of government was removed there from Philadelphia, in 1800, and it was incorporated in 1802. In August, 1814, the capitol, President's house, and public offices were burnt by the British, under General Ross, together with the valuable public library. The public buildings were rebuilt soon after the war. The capitol is in N. lat. $38^{\circ} 52' 54''$; W. long. from Greenwich, $77^{\circ} 1' 48''$.

WASHINGTON County, District of Columbia. It contains the cities of Washington and Georgetown. Pop. 1830, including both cities, 30,262.

WEST Point, Orange co. N. Y. the seat of the United States Military Academy, and an important fortress during the revolution; situated on the W. side of the Hudson, 51 miles above New-York. From the singular projection of this point the river is here but half a mile wide; a chain was stretched across in the revolu-

tionary war, to prevent the passage of the enemy's ships. This was protected by fort Clinton, which was erected on the eminence, 188 feet high; and on an island near the opposite bank of the river, other batteries were erected. Back of fort Clinton, and on a still higher point, 598 feet above the river, fort Putnam was erected, which covered the works below, and commanded the river. This strong position, so important to the Americans, was equally desired by the British. To deliver this fortress and all the garrison into the hands of the enemy, was the object of Arnold's treason, for which the unfortunate Andre suffered. The plain on which the academy, barracks, &c. are situated, covers about 250 acres of land. There is an excellent hotel kept in the best manner, for the accommodation of visitors. The academy was established in 1802. The number of cadets is limited to 250, who are destined for officers of the army. Their age on admission must be between 14 and 22. The cost of each cadet to government is about 335 dollars annually. They encamp about 8 weeks during the year. There are 30 professors and instructors, and the course of study occupies 4 years. A chaste marble monument bearing the name of Kosciusko, erected by the pupils, stands on the bank near the river.

WHITLEYSBURG, v. Kent co. Del.

WHITE Marsh, t. Montgomery co. Pa. Pop. 1830, 1,924.

WHITE Mountains, N. H. a ridge with several important elevations, extends in the southern part of the state; the highest of which is called Moosehillock, and is upwards of 4,600 feet high. In Coos co. in the northern part of the state, the White Mountains reach their greatest elevation. They are the highest mountains in the U. S. except the Rocky Mountains, and are celebrated for their bold and magnificent scenery. Mount Washington, the loftiest summit, is 6,428 feet above the level of the sea, and is composed of immense rocks of granite and gneiss, fantastically heaped up by nature. The view from the top is indescribably sublime and beautiful. The highest summits are covered with snow the greater part of the year. They are sometimes seen from the sea 60 m. distant. The other principal eminences are Mounts Adams, Jefferson, Madison, Monroe, Franklin, and Pleasant, which are from 4,310 to 5,385 feet high. A remarkable feature is a gap, called The Notch, which forms a passage between these rugged steeps, by which travellers may ascend to the top of Mount Washington.

WISCASSET, t. and port of entry, Lincoln co. Me. Pop. 1830, 2,255. A place of considerable commerce.

WISCONSIN Territory, comprises that portion of the United States lying N. of the state of Illinois; E. of the Mississippi r. and a line drawn from its source due north to the boundary between the United States and British possessions; S. of the boundary between the British possessions and the United States and Lake Superior, and W. of Lake Michigan, and Menomonic and Montreal rivers, comprising upwards of 100,000 square miles.

The surface of the country in the surveyed parts S. of Green Bay, Fox, and Wisconsin rivers, is composed of timbered and prairie lands, with some swamps. In many parts the surface is beautifully undulating.

The soil is generally of great fertility, and from one to ten feet deep, productive of wheat, corn, and other grains in great abundance. The counties of Grant, Crawford, Racine, Rock, and Walworth, are particularly distinguished for the richness of the soil. In Grant county considerable quantities of lead and copper ores are found.

The principal streams are the Missouri, which washes the W. border, Wisconsin, Rock, Fox, Chippeway, St. Croix, Black, Rum, Muddy, and St. Louis.

Madison, in Dane county, is the capital of the Territory.

The population of counties in 1838 was as follows:

Brown,	3,048	Milwaukee,	3,131
Crawford,	1,220	Racine,	2,054
Dane,	172	Rock,	480
Dodge,	18	Walworth,	1,019
Grant,	2,763	Washington,	64
Green,	494		
Iowa,	3,218	Total,	18,149
Jefferson,	468		

The county of Crawford is estimated now to contain a population of 2,500; of Dane, 500.

The Legislature consists of a Council of 13 members elected for 4 years, and a House of Representatives of 26 members chosen for 2 years. Their pay is \$3 a day. The governor's term is 2 years—salary \$2,500.

IOWA Territory comprises all that portion of country lying west of the Mississippi River, north of the state of Missouri, West of the Missouri River, and south of the line between the United States and

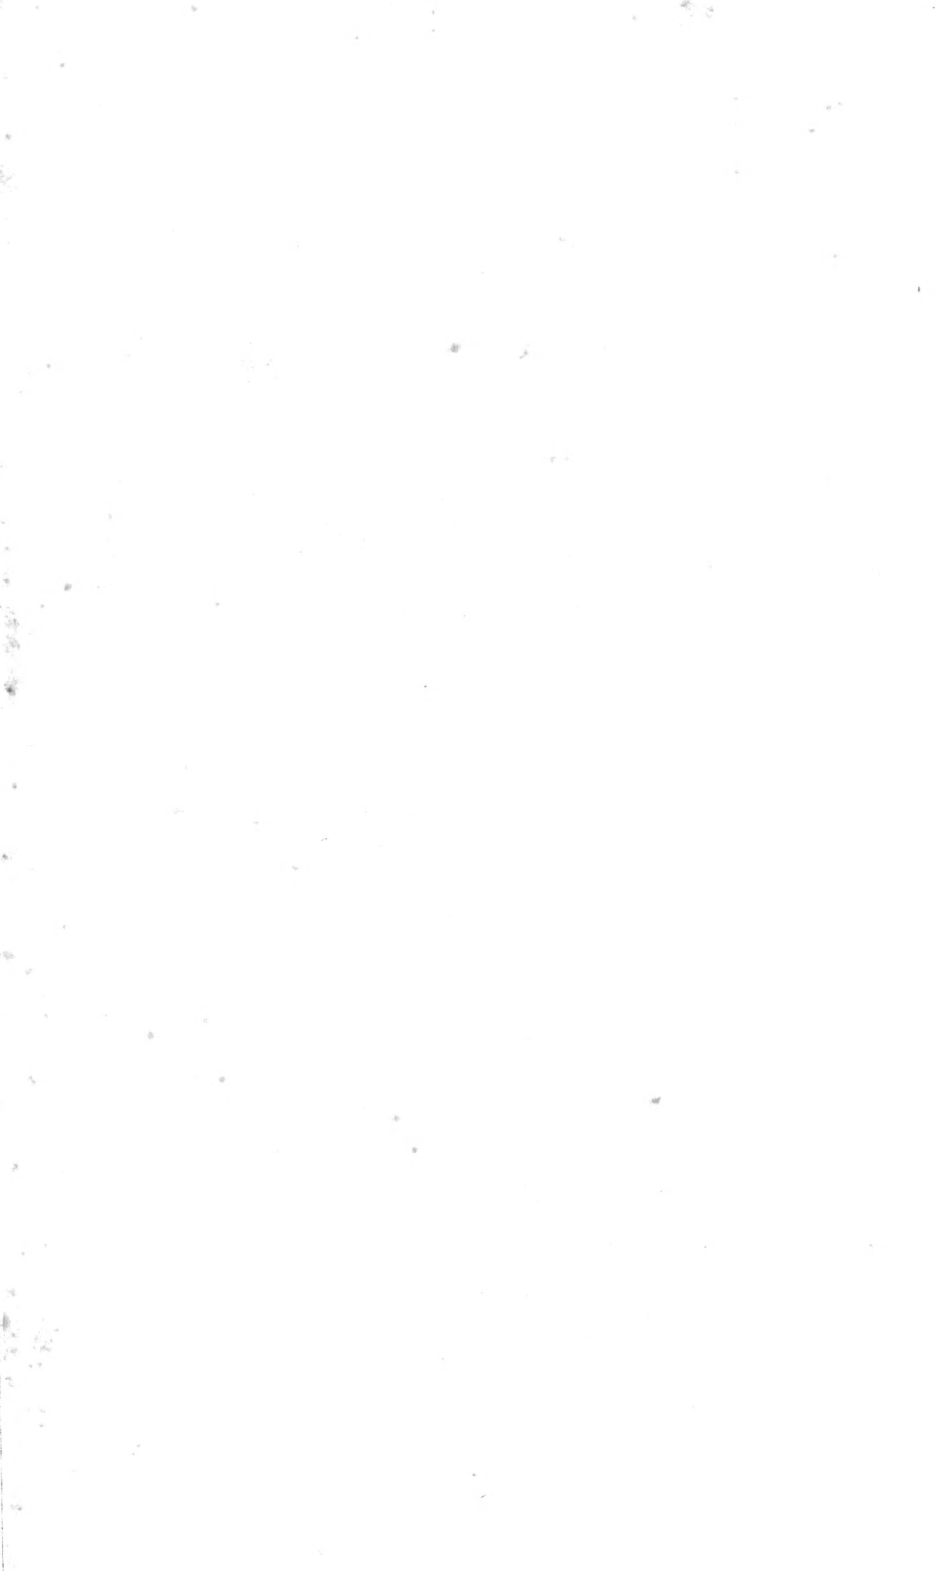

the British possessions. It was organized into a separate territory by Congress, in June, 1838. The country in the southern and southwest parts of the territory is beautiful and undulating, containing a large portion of excellent timber and rich prairies, the greater part of which is well watered with springs and mill streams. Settlements are extending very rapidly. There are twenty-one counties all situated in the east and southeast parts of the territory; their names are as follows: Benton, Buchanan, Cedar, Clayton, Clinton, Des Moines, Delaware, Du Buque, Fayette, Henry, Jackson, Johnson, Jones, Keokuck, Lee, Linn, Louisa, Muscatine, Scott, Slaughter, and Van Buren.
 The governor is appointed for three years, with a salary of \$2,500. The legislature consists of a council of thirteen members, elected for two years, and a house of representatives of twenty-six members, elected annually. Pay of the members \$3 a day.
 The population of the territory in 1838, was 22,859, of which Des Moines contained 4,650; Van Buren, 3,174; Henry, 3,058; Du Buque, 2,381; Scott, 1,252; and Muscatine, 1,247.
 The principal rivers are the Des Moines, St. Peters, Upper Iowa, and Lower Iowa.
IOWA County, Wis. Ter. soil fertile; Mineral Point, c. t. pop. 1838, 3,218.
